CHAPTER 1

From Lipid Phases to Membrane Protein Organization: Fluorescence Methodologies in the Study of Lipid-Protein Interactions

C. REYES MATEO, RODRIGO F.M. DE ALMEIDA, LUIS M.S. LOURA,
and MANUEL PRIETO

1.1	General Background	1
1.2	Fluorescence Methodologies	2
1.2.1	Fluorescence Resonance Energy Transfer	2
1.2.2	Anisotropy	5
1.2.3	Quenching	7
1.3	Fluorophores in Lipid Protein Studies	10
1.3.1	Membrane Probes	10
1.3.2	Protein/Peptide Fluorescence	12
1.3.2.1	Intrinsic Fluorescence from Aromatic Side-Chains	12
1.3.2.2	Introducing and Changing the Intrinsic Fluorescence of Proteins/Peptides	14
1.3.3	Why use Peptides?	15
1.4	Relevant Problems in Lipid-Protein Interaction and Fluorescence	16
1.4.1	Partition to the Membrane	16
1.4.2	Protein/Peptide Aggregation	18
1.4.3	Lipid Selectivity: the Annular Region	20
1.4.4	Protein/Peptide Dynamics	22
1.4.5	Protein/Peptide Topography	23
1.4.6	Modulation of Membrane Properties	25
	References	26

CHAPTER 2

NMR of Membrane Proteins in Lipid Environments: the Bcl-2 Family of Apoptosis Regulators

XIAO-MIN GONG, JUNGYUEN CHOI, and FRANCESCA M. MARASSI

2.1	Introduction	35
2.2	The Bcl-2 Family Proteins and Programmed Cell Death	36
2.3	Protein Expression and Purification	38
2.4	NMR in Micelles	41

2.4.1	Determining the Structures of Proteins in Micelles	42
2.4.2	tBid in Micelles	43
2.5	NMR in Bilayer Membranes	45
2.5.1	Bcl-XL and tBid in Bilayers	45
2.5.1.1	Membrane-Associated Bcl-xL	46
2.5.1.2	Membrane-Associated tBid	46
2.5.2	Determining the Structures of Proteins in Bilayers	49
2.5.3	Conformation of tBid in Lipid Bilayers	51
	Acknowledgements	54
	References	54

CHAPTER 3

X-ray and Neutron Diffraction Approaches to the Structural Analysis of Protein-Lipid Interactions 63

JUAN A. HERMOSO, JOSÉ M. MANCHEÑO, and EVA PEBAY-PEYROULA

3.1	Structure Determination by Protein Crystallography: a General Overview	63
3.1.1	Crystal Structure Determination	63
3.1.2	Protein Expression, Solubilization and Purification in Membrane Proteins	64
3.1.3	Structural Analysis of Protein-Lipid Interactions by X-Ray Crystallography: Some General Remarks	66
3.2	Membrane Protein Crystallization	67
3.2.1	The "Classical" Approach	67
3.2.2	Alternative Methods	70
3.3	Diffraction Studies	72
3.3.1	X-Ray versus Neutron Diffraction	72
3.3.2	Neutron Diffraction with Contrast Variation	72
3.4	Protein-Lipid Interactions in 3D Structures	73
3.4.1	Integral Membrane Proteins.	76
3.4.1.1	General Features of Membrane Protein Structures.	77
3.4.1.2	Lipids Identified in the Structures	79
3.4.2	Structural Features of Peripheral Proteins Involved in Signaling and Subcellular Targeting	81
3.4.3	Pore-Forming Protein Toxins	84
3.4.4	Lipases	91
3.4.5	Hydrophobic Ligand-Binding Proteins	93
3.4.5.1	Lipocalins	93
3.4.5.2	Intracellular Lipid-Binding Proteins.	95
3.4.5.3	Serum Albumin	96
3.4.5.4	Lipid-Transfer Proteins.	97
3.5	Conclusions and Future Prospects	100
	References	100

CHAPTER 4

The Role of Proteins in the Formation of Domains in Membranes 111

RICHARD M. EPAND

4.1	Domains	111
4.2	Proteins that Bind Specific Lipids.	113
4.3	Non-Specific Interactions of Proteins with Membranes	113
4.3.1	Electrostatic Interactions	114
4.3.2	Hydrophobic Interactions with Acyl Chains	115
4.3.2.1	Transmembrane Helices	115
4.3.2.2	Lipidation	115
4.4	Juxta-Membrane Domains	116
4.5	Energy Minimization as a Driving Force for Domain Formation	120
	References	121

CHAPTER 5

Lateral Membrane Structure and Lipid-Protein Interactions 127

JESÚS PÉREZ-GIL, ANTONIO CRUZ, JORGE BERNARDINO DE LA SERNA

5.1	Introduction	127
5.2	Lateral Lipid Organization in Membranes	128
5.3	Membrane Lateral Organization and Lipid-Protein Interactions	132
5.4	Lipid Domains and Protein-Protein Interactions	136
	Acknowledgements	137
	References	137

CHAPTER 6

The Membrane as a System:**How Lipid Structure Affects Membrane Protein Function 141**

ANTHONY G. LEE

6.1	Introduction	141
6.2	The Structure of a Lipid Bilayer.	141
6.2.1	Glycerol Backbone and Headgroup Structures	142
6.2.2	Fatty Acyl Chain Region of the Bilayer.	146
6.2.2.1	How Similar is the Hydrocarbon Core of a Lipid Bilayer to that of a Simple Liquid Alkane?	151
6.2.3	Dimensions of a Lipid Bilayer	152
6.2.4	Mixing of Lipids in the Liquid Crystalline Phase.	153
6.2.5	Non-Bilayer Phases	153
6.2.6	Bilayer Deformation Energies	155
6.3	Lipid-Protein Interactions.	156
6.3.1	Headgroup Interactions	157
6.3.2	Fatty Acyl Chains	161

6.3.3	Effects of Internal Bilayer Pressures and Curvature Stress	163
6.4	Extrapolation from Model Systems to Biological Membranes	164
6.4.1	Is there a Special Role for Lipids Preferring a Non-Bilayer Phase?	165
6.5	Summary.	168
	References	168

CHAPTER 7

Peptide–Lipid Interaction:

Shedding Light into the Mode of Action and Cell Specificity

of Antimicrobial Peptides 177

YECHIEL SHAI

7.1	Introduction	177
7.2	The Target of Most Antimicrobial Peptides	178
7.3	How do AMPs Select Their Target Cell?	180
7.3.1	The Role of the Membrane and Peptide Properties in the Biological Function	180
7.3.2	Peptide Sequence and Organization in Solution and Membranes	181
7.3.2.1	Peptide Hydrophobicity and Charge	182
7.3.2.2	The Role of the Amphipatic Structure and its Stability	182
7.3.2.3	The Role of Peptide Self-Association in Solution and/or in Membranes	186
7.4	Mode of Action of AMPs	188
7.4.1	The Barrel-Stave Model	189
7.4.2	The Carpet Model.	190
7.5	Summary.	193
	Acknowledgements	193
	References	193

CHAPTER 8

Structural and Functional Modulation of Ion Channels

by Specific Lipids: from Model Systems to Cell Membranes 203

A.M. FERNANDEZ, J.A. POVEDA, J.A. ENCINAR, A. MORALES,
and J.M. GONZÁLEZ-ROS

8.1	Introduction	203
8.2	Importance of Lipid–Protein Interactions in Ion Channel Modulation	204
8.3	Hypothetical Nature of Lipid–Protein Interactions	205
8.4	Influence of Lipids on nAChR Function	208
8.5	nAChR Modulation by other Lipophilic Compounds	211
8.6	Influence of Lipids on nAChR Structure.	213
8.7	PA–nAChR Interaction.	216

8.8	From Model in Vitro Systems to Cell Membranes: the <i>Xenopus</i> Oocyte as a Cell Model for the Study of Lipid-Protein Interactions	219
	References	222
