

Contents in Brief

Introduction

D.J. COVE, S. BRODY, S. OTTOLENGHI, and V.E.A. RUSSO	1
--	---

Section 1 Microbial Systems, Both Prokaryote and Eukaryote

Chapter 1 Virus Assembly and Morphogenesis

P.G. STOCKLEY	13
---------------------	----

Chapter 2 *Bacillus subtilis* Sporulation: a Paradigm for the Spatial and Temporal Control of Gene Expression

J. ERRINGTON	28
--------------------	----

Chapter 3 Development in *Caulobacter crescentus*

R. BRYAN	45
----------------	----

Chapter 4 *Streptomyces coelicolor*: a Mycelial, Spore-Bearing Prokaryote

K.F. CHATER	61
-------------------	----

Chapter 5 The Programme of Cell Type Determination in Fission Yeast

B. ARCANGIOLI and A.J.S. KLAR	75
-------------------------------------	----

Chapter 6 Development in *Neurospora crassa*

V.E.A. RUSSO and N.N. PANDIT	88
------------------------------------	----

Chapter 7 Genetic Regulation of Sporulation in the Fungus *Aspergillus nidulans*

A.J. CLUTTERBUCK and W.E. TIMBERLAKE	103
--	-----

Chapter 8 Development of Trypanosomes

N. AGABIAN and S. METZENBERG	121
------------------------------------	-----

Chapter 9 *Dictyostelium*: From Unicellularity to Multicellularity

S. BOZZARO	137
------------------	-----

Chapter 10 Control of the Cell Cycle in Yeasts

P. FANTES	150
-----------------	-----

Chapter 11 Circadian Rhythms of Neurospora

S. BRODY	165
----------------	-----

*Section 2 Plants**Chapter 12 Regulation of Development in the Moss, Physcomitrella patens*

D. J. COVE	179
------------------	-----

Chapter 13 Plant Photoperception: the Phytochrome System

R. A. SHARROCK	194
----------------------	-----

Chapter 14 Exploration of Agrobacterium tumefaciens

B. HOHN	206
---------------	-----

Chapter 15 Exploitation of Agrobacterium tumefaciens

C. KONCZ and J. SCHELL	217
------------------------------	-----

Chapter 16 Developmental Genetics of Arabidopsis

D. BRADLEY and R. E. PRUITT	225
-----------------------------------	-----

Chapter 17 Homeotic Genes in the Genetic Control of Flower Morphogenesis in Antirrhinum majus

Z. SCHWARZ-SOMMER, H. SAEDLER, and H. SOMMER	242
--	-----

Chapter 18 The Rhizobium-Legume Symbiosis

A. DOWNIE and N. BREWIN	257
-------------------------------	-----

*Section 3 Animals**Chapter 19 Embryogenesis in Caenorhabditis elegans*

L. EDGAR	273
----------------	-----

Chapter 20 Generation of Temporal and Cell Lineage Asymmetry During C. elegans Development

G. RUVKUN	295
-----------------	-----

Chapter 21 Genetic and Molecular Analysis of Early Pattern Formation in Drosophila

D. TAUTZ	308
----------------	-----

Chapter 22 Generation of Pattern in Drosophila melanogaster Adult Flies

A. GARCIA-BELLIDO and M. MARI-BECCA	328
---	-----

<i>Chapter 23</i> Genetic Mechanisms in Early Neurogenesis of <i>Drosophila melanogaster</i> J.A. CAMPOS-ORTEGA and E. KNUST	343
<i>Chapter 24</i> <i>Xenopus</i> Embryogenesis T. PIELER	355
<i>Chapter 25</i> The Developmental Regulation of the Genes Coding for 5S Ribosomal RNA in <i>Xenopus laevis</i> A.P. WOLFFE	370
<i>Chapter 26</i> From <i>Drosophila</i> to Mouse C.G. LOBE and P. GRUSS	382
<i>Chapter 27</i> Cloning Developmental Mutants from the Mouse t Complex D.P. BARLOW	394
<i>Chapter 28</i> The Use of in Situ Hybridisation to Study the Molecular Genetics of Mouse Development D.G. WILKINSON	409
<i>Chapter 29</i> Insertional Mutagenesis and Mouse Development M.R. KUEHN and J.P. STOEY	420
<i>Chapter 30</i> The Introduction of Genes into Mouse Embryos and Stem Cells E.F. WAGNER and G. KELLER	440
<i>Chapter 31</i> Skeletal Muscle Differentiation D.F. PINNEY and Ch.P. EMERSON, Jr.	459
<i>Chapter 32</i> Hepatocyte Differentiation C.J. KUO and G.R. CRABTREE	479
<i>Chapter 33</i> Cellular Differentiation in the Hematopoietic System: an Introduction M. INTRONA, J. GOLAY, and S. OTTOLENGHI	499
<i>Chapter 34</i> The Role of Oncogenes in Myeloid Differentiation M. INTRONA and J. GOLAY	504
<i>Chapter 35</i> Developmental Regulation of Human Globin Genes: a Model for Cell Differentiation in the Hematopoietic System S. OTTOLENGHI	519
<i>Chapter 36</i> Growth Control in Animal Cells L. PHILIPSON and V. SORRENTINO	537
<i>Glossary</i>	554
<i>Subject Index</i>	565
