1 The Molecular Genetic Basis of Positional Information in Insect Segments

(With 11 Figures)

JOAN E. HOOPER AND MATTHEW P. SCOTT

1	Introduction	1
2	The Experimental Basis for Positional Information and Its Local Character	2
2.1	Ablation and Grafting Experiments Reveal the Importance of Local Cell-Cell Interactions	2
2.2	Mechanisms of Regulative Responses	6
2.3	Models of Positional Information	7
3	<i>Drosophila</i> Development and Segmentation Genes	10
3.1	How a Syncytium Becomes a Metameric Embryo	10
3.2	Parasegments and Segments	15
3.3	The Developmental Origins of Adult Structures	16
4	Segment Polarity Genes, the Genetically Defined Components of the Intrasegmental Patterning System	17
4.1	The Phenotypes of Mutations in Segment Polarity Genes	17
4.2	Cell Fates Are Transformed by Segment Polarity Gene Mutations	22
4.3	Segment Polarity Genes Mediate Cell Communication	22
4.4	Segment Polarity Genes Specify Morphology	23
4.5	Segment Polarity Genes Functions in Internal Tissues	24
4.6	Maternal and Zygotic Requirements for Segment Polarity Genes	24
4.7	How Many Segment Polarity Genes Are There?	25
5	Segment Polarity Genes Maintain the Integrity of the Parasegment Border	25
5.1	Initiation of the Segment Pattern	26
5.2	Regulation of the Domain of <i>en/hh</i> Expression	27
5.2.1	<i>nkd</i> and <i>sgg</i> Repress <i>en</i> Expression away from the Parasegment Border	27
5.2.2	A <i>Wg</i> Signal Promotes <i>en</i> and <i>hh</i> Expression Near the Parasegment Border	27
5.2.3	Transcriptional Regulation by the EN Protein	29
5.3	Regulation of the Domain of <i>wg</i> Expression	30
5.3.1	<i>ptc</i> and <i>cos-2</i> Repress <i>wg</i> Expression Away from the Parasegment Border	32

5.3.2	An E/H Signal Promotes <i>wg</i> Expression Near the Parasegment Border	32
5.3.3	The <i>wg</i> Signal Is Required as an Autocrine Factor for <i>wg</i> Expression	34
5.4	The Gooseberry Paradox	35
5.5	A Missing Link; Polarized Responses to Bidirectional Signals	35
6	Segment Polarity Genes and Morphogenesis	36
6.1	A Late Functions of <i>wg</i> Specifies Naked Cuticle	37
6.2	Specification of Neuroblasts and Sensory Structures	37
6.3	Specification of Imaginal Discs	37
7	Segment Polarity Genes, Positional Information, and Future Prospects	38
