
Contents

Part I	Handling of Cells in Single Cell Experiments	1
1	Maintaining Cells Under the Microscope	3
	CAN INCE	
2	Simple Perfusion Chambers for Single Cell Measurements	9
	KEI INOUE	
3	Temperature Control on the Stage of the Microscope....	19
	ARIE DE VOS, BERT VAN DUIJN, AND ANNEKE WILTINK	
4	A Modified U-Tube Drug Application System	24
	MISA DZOLJIC	
5	Laser Microsurgery as a Tool in Single Cell Research ...	31
	PETTIE P. BOOIJ AND ALBERTUS H. DE BOER	
Part II	Ion Channel and Membrane Potential Measurements Using the Patch-Clamp Technique	41
II-1	Introduction to the Measurement Technique	41
6	Significance of Ion Channels and Membrane Potential Changes in Cells	43
	SANDOR DAMJANOVICH	
7	Practical Introduction to Patch Clamping by Simulation Experiments with Simple Electrical Circuits	52
	DIRK L. YPEY	

8	Improved Electrophysiological Measurements by Series Resistance Compensation	88
	A.C.G. VAN GINNEKEN AND A.O. VERKERK	
9	Preparation of Patchable Plant Cell Protoplasts and a Procedure for the Improvement of Gigaseal Formation	99
	SAKE A. VOGELZANG AND MARGREET BLOM-ZANDSTRA	
II-2	Single Channel Measurements	109
10	Recording and Analysis of ATP-Sensitive Potassium Channels in Inside-Out Patches of Rabbit Ventricular Myocytes	111
	MARIEKE W. VELDKAMP	
11	Mechanotransduction and Mechanosensitive Ion Channels in Osteoblasts	125
	RANDALL L. DUNCAN	
12	The Study of (Plant) Ion Channels Reconstituted in Planar Lipid Bilayers	135
	HENK MIEDEMA	
13	Ion Channel Measurement on the Cell Nucleus	153
	FEDERICA BERTASO, RAFFAELLA TONINI, AND MICHELE MAZZANTI	
14	Monitoring Cytosolic Calcium and Membrane Potential from Cell-Attached Patch-Clamp Currents in Human T Lymphocytes	171
	JOS A.H. VERHEUGEN	
II-3	Whole Cell Measurements	185
15	Membrane Potential and Action Potential Measurements in Whole Cell and Perforated Patch Configurations	187
	ZHENG WANG, DIRK L. YPEY, AND RUTGERIS J. VAN DEN BERG	
16	Perforated Patch-Clamp Technique in Heart Cells.	207
	E. ETIENNE VERHEIJCK	

17	Measurement and Analysis of Different Aspects of Potassium Currents in Human Lymphocytes.	214
	REZSO GÁSPÁR JR., ZOLTAN VARGA, GYÖRGY PANYI, ZOLTAN KRASZNAI, CARLO PIERI, AND SANDOR DAMJANOVICH	
18	Ionic Conductances in Chicken Osteoclasts	236
	ZOLTAN KRASZNAI, ADAM F. WEIDEMA, REZSO GÁSPÁR, GYÖRGY PANYI, AND DIRK L. YPEY	
19	GABA _A Receptor-Mediated Chloride Currents in Acutely Dissociated Hippocampal Neurons	246
	MISA DZOLJIC AND WYTSE J. WADMAN	
20	Measurement of Whole Cell Potassium Currents in Protoplasts from Tobacco Cell Suspensions	256
	BERT VAN DUIJN	
21	Inward Rectifying Potassium Conductance in Barley Aleurone Protoplasts	269
	MARCEL T. FLIKWEERT AND MEI WANG	
Part III	Fluorescence to Measure Intracellular Ions.	283
III-1	Introduction to the Measurement Technique	283
22	An Introduction to the Use of Fluorescent Probes in Ratiometric Fluorescence Microscopy	285
	PIET VIS AND JOLANDA LEMMERS	
23	How To Use Video Cameras To Acquire Images	306
	JOCHM HERRMANN	
24	Strategies for Studying Intracellular pH Regulation	318
	JAN H. RAVESLOOT	
III-2	Flow Cytometer Measurements	343
25	An Introduction to the Working Principles of the Flow Cytometer	345
	SANDOR DAMJANOVICH, CARLO PIERI, LASZLO BENE, ATTILA JENEI, AND REZSO GÁSPÁR, JR.	

26	Flow Cytometric Membrane Potential Measurements	351
	SANDOR DAMJANOVICH, CARLO PIERI, LASZLO BENE, ATTILA JENEI, AND REZSO GÁSPÁR, JR.	
27	Flow Cytometric Measurement of Cytosolic Calcium in Lymphocytes	361
	ERIKA BAUS, JACQUES URBAIN, OBERDAN LEO AND FABIENNE ANDRIS	
III-3	Microfluorescence Measurements	377
28	Cytosolic pH and Cell Movement Measurement in <i>Dictyostelium</i>	379
	KEI INOUE	
29	Analysis of Agonist-Induced Cell Recruitment in Terms of Intracellular Calcium Mobilization in a Population of Enzymatically Dispersed Pancreatic Acinar Cells	402
	ROLF L.L. SMEETS, REMKO R. BOSCH, AND PETER H.G.M. WILLEMS	
III-4	Confocal Microscopy	411
30	Quantitative Confocal Fluorescence Measurements in Living Tissue	413
	MARK FRICKER, RACHEL ERRINGTON, JULIAN WOOD, MONIKA TLALKA, MIKE MAY AND NICK WHITE	
31	Cytosolic Calcium Measurements with Confocal Microscopy	446
	WIM J.J.M. SCHEENEN
