

## **Brief Contents**

### **Volume 1**

Foreword V

Preface VII

Table of Contents XI

List of Contributors XXII

Chapter 1 Basic concepts of gene expression 1

Chapter 2 Sample preparation and supplementary tools 97

Chapter 3 Methods for analysing mRNA expression 163

### **Volume 2**

Chapter 4 High-throughput and industrial methods for mRNA expression analysis 409

Chapter 5 Protein expression analysis 623

Chapter 6 Methods for mRNA and protein expression analysis *in situ* and *in vivo* 703

Chapter 7 Computational methods and bioinformatic tools 769

Index 905
