Preface.....	V
--------------	---

Contributors.....	XI
-------------------	----

1. Biodiversity and Community Structure

1. Latitudinal and Altitudinal Patterns in Species Richness and Mortality Factors of the Gallling Sawflies on *Salix* Species in Japan
Heikki Roininen, Takayuki Ohgushi, Alexei Zinovjev, Risto Virtanen, Veli Vikberg, Kotaro Matsushita, Masahiro Nakamura, Peter W. Price, and Timo O. Veteli3
2. Species Richness of Eriophyid Mites on Finnish Trees and Shrubs
Pekka Niemelä, Heikki Roininen, Henri Vanhanen, and Timo O. Veteli21
3. Diversity, Biology, and Nutritional Adaptation of Psyllids and their Galls in Taiwan
Man-Miao Yang, Ling-Hsiu Liao, Mei-Fiang Lou, Wei-Chung Chen, Shih Shu Huang, Gene-Sheng Tung, Yu-Chu Weng, and Chia-Chi Shen.....33
4. Trophic Shift in $\delta^{15}\text{N}$ and $\delta^{13}\text{C}$ through Gallling Arthropod Communities: Estimates from *Quercus turbinella* and *Salix exigua*
Christopher T. Yarnes and William J. Boecklen43
5. Temporal Variation in the Structure of a Gall Wasp Assemblage along a Genetic Cline of *Quercus crispula* (Fagaceae)
Masato Ito55
6. Effects of Floods on the Survival and Species Component of *Rhopalomyia* Gall Midges (Diptera: Cecidomyiidae) Associated with *Artemisia princeps* (Asteraceae) Growing in a Dry Riverbed in Japan
Tomoko Ganaha, Nami Uechi, Machiko Nohara, Junichi Yukawa, and Yukihiro Shimatani67
7. Guild Structure of Gall Midges on *Fagus crenata* in Relation to Snow Gradient: Present Status and Prediction of Future Status as a Result of Global Warming
Naoto Kamata, Shinsuke Sato, and Jiro Kodani79

2. Biological Control and Galling Arthropods

8. **Early Parasitoid Recruitment in Invading Cynipid Galls**
Karsten Schönrogge, Seiichi Moriya, George Melika, Zoë Randle, Tracey Begg, Alexandre Aebi, and Graham N. Stone91
9. **Parasitoid Recruitment to the Globally Invasive Chestnut Gall Wasp *Dryocosmus kuriphilus***
Alexandre Aebi, Karsten Schönrogge, George Melika, Alberto Alma, Giovanni Bosio, Ambra Quacchia, Luca Picciau, Yoshihisa Abe, Seiichi Moriya, Kaori Yara, Gabrijel Seljak, and Graham N. Stone.....103
10. **Cynipid Gall Wasps in Declining Black Oak in New York: Relationships with Prior Tree History and Crown Dieback**
Carolyn C. Pike, Daniel J. Robison, and Lawrence P. Abrahamson.....123
11. **Gall-forming Cecidomyiidae from Acacias: Can New Parasitoid Assemblages be Predicted?**
Robin J. Adair and Otilie C. Naser133
12. **Recent Outbreaks of the Maize Orange Leafhopper *Cicadulina bipunctata* Inducing Gall-like Structures on Maize in Japan**
Masaya Matsumura, Makoto Tokuda, and Nobuyuki Endo149

3. Galling Arthropods - Plant Interactions

13. **Different Oviposition Strategies in Two Closely Related Gall Midges (Diptera: Cecidomyiidae): Aggregation versus Risk Spreading**
Ken Tabuchi and Hiroshi Amano161
14. **A Protective Mechanism in the Host Plant, *Aucuba*, against Oviposition by the Fruit Gall Midge, *Asphondylia aucubae* (Diptera: Cecidomyiidae)**
Kensuke Imai169
15. **Genetic Variation in the Timing of Larval Mortality and Plant Tissue Responses Associated with Tree Resistance against Galling Adelgids**
Kenichi Ozaki and Yasuaki Sakamoto177

16. **Variable Effects of Plant Module Size on Abundance and Performance of Gallling Insects**
 Dan Quiring, Leah Flaherty, Rob Johns, and Andrew Morrison189
17. **Biology and Life History of the Bamboo Gall Maker, *Aiolomorphus rhopaloides* Walker (Hymenoptera: Eurytomidae)**
 Ei'ichi Shibata199
18. **Effects of Host-tree Traits on the Species Composition and Density of Gallling Insects on Two Oak Species, *Quercus crispula* and *Quercus serrata* (Fagaceae)**
 Noriyuki Ikai and Naoki Hijii209

4. Indirect Effects of Gallling Arthropods

19. **Positive Indirect Effects of Biotic- and Abiotic-mediated Changes in Plant Traits on Herbivory**
 Masahiro Nakamura219
20. **Deer Browsing on Dwarf Bamboo Affects the Interspecies Relationships among the Parasitoids Associated with a Gall Midge**
 Akira Ueda, Teruaki Hino, and Ken Tabuchi229
21. **Influence of the Population Dynamics of a Gall-inducing Cecidomyiid and Its Parasitoids on the Abundance of a Successor, *Lasioptera yadokariae* (Diptera: Cecidomyiidae)**
 Junichi Yukawa, Shigekazu Haitzuka, Katsuhiko Miyaji, and Takahiro Kamikado241

5. Evolution and Taxonomy

22. **Evolution of Wing Pigmentation Patterns in a Tephritid Gallmaker: Divergence and Hybridization**
 Jonathan M. Brown and Idelle Cooper253
23. **The Evolution of Gall Traits in the Fordinae (Homoptera)**
 Moshe Inbar265
24. **Life History Patterns and Host Ranges of the Genus *Asphondylia* (Diptera: Cecidomyiidae)**
 Nami Uechi and Junichi Yukawa275

25. Taxonomic Status of the Genus <i>Trichagalma</i> (Hymenoptera: Cynipidae), with Description of the Bisexual Generation Yoshihisa Abe	287
26. Phylogenetic Position of the Genus <i>Wagnerinus</i> Korotyaev (Coleoptera: Curculionidae) Associated with Galls Induced by <i>Asphondylia baca</i> Monzen (Diptera: Cecidomyiidae) Toshihide Kato, Hiraku Yoshitake, and Motomi Ito	297
Key Word Index.....	307
