CONTRIBUTORS	ix
PREFACE	xi
TERMS AND ABBREVIATIONS	xiii
CONTENTS OF OTHER VOLUMES	xv

1. General Anatomy of the Gills

G. M. Hughes

I. Introduction	1
II. Development of Gills	5
III. Gill Organization	11
IV. Modifications in Relation to Habit	26
V. Gill Ventilation and Role of Branchial Muscles	36
VI. Gill Morphometry	40
VII. Conclusions	63
References	63

2. Gill Internal Morphology

Pierre Laurent

I. Introduction	73
II. The Gill Vasculature	77
III. The Gill Epithelia	138
IV. Concluding Remarks	171
References	172

3. Innervation and Pharmacology of the Gills

Stefan Nilsson

I. General Introduction	185
II. Organization of the Branchial Nerves	186
III. Sensory Pathways	190
IV. Pharmacology of the Branchial Vasculature	200
V. Autonomic Nervous Control of the Branchial Vasculature	206
VI. Control of the Branchial Vasculature by Circulating Catecholamines	209
VII. Possible Sites of Drug and Nerve Action	212
References	219

4. Model Analysis of Gas Transfer in Fish Gills

Johannes Piiper and Peter Scheid

I. Introduction	230
II. The Countercurrent Model	230
III. Compound Models for Functional Inhomogeneities	239
IV. Nonlinear Equilibrium Curves	243
V. Diffusion Resistance of Interlamellar Water	249
VI. Factors Not Included in Models	253
VII. Interpretation of Experimental Data	257
Appendix: Cocurrent System	258
References	259

5. Oxygen and Carbon Dioxide Transfer across Fish Gills

David Randall and Charles Daxboeck

I. Introduction	263
II. Gill Ventilation ($\dot{V}_g$)	266
III. Gill Blood Flow	272
IV. Blood	290
V. Oxygen Transfer	293
VI. Carbon Dioxide Transfer	295
VII. Interaction between CO_2 and H^+ Excretion	298
VIII. Control of Oxygen and Carbon Dioxide Transfer	301
References	307

6. Acid-Base Regulation in Fishes

Norbert Heisler

I. Introduction	315
II. Techniques for Measurement of Acid-Base Ion Transfer	317
III. Steady State Acid-Base Regulation	336
IV. Acid-Base Regulation and Ionic Transfer Processes during Stress Conditions	346
V. Mechanisms and Sites of Acid-Base Relevant Transepithelial Ion Transfer Processes	382
References	392

Appendix: Physicochemical Parameters for Use in Fish

Respiratory Physiology

Robert G. Boutilier, Thomas A. Heming, and George K. Iwama

I. Introduction	401
II. Physicochemical Properties of Plasma	402
III. Physicochemical Properties of Water	412
IV. Ammonia	420
