About the Editor

Preface

Section I The History

Chapter 01	Transcription: The Never Ending Story	3
------------	---------------------------------------	---

Section II The Machinery

Chapter 02	The General Transcription Machinery and Preinitiation Complex Formation	21
Chapter 03	The Dynamic Association of RNA Polymerase II with Initiation, Elongation, and RNA Processing Factors during the Transcription Cycle	49
Chapter 04	General Cofactors: TFIID, Mediator and USA	67
Chapter 05	Chromatin and Regulation of Gene Expression	95
Chapter 06	HATs and HDACs	111
Chapter 07	Structure and Function of Core Promoter Elements in RNA Polymerase II Transcription	135

Section III The Regulators

Chapter 08	Transcriptional Activators and Activation Mechanisms	147
Chapter 09	Transcriptional Repressors and Repression Mechanisms	159
Chapter 10	STATs in Cytokine-mediated Transcriptional Regulation	175
Chapter 11	Transcriptional Regulation by Smads	185
Chapter 12	The Rb and E2F Families of Proteins	207
Chapter 13	c-Jun: A Complex Tale of a Simple Transcription Factor	219
Chapter 14	HIV Tat and the Control of Transcriptional Elongation	239
Chapter 15	Post-translational Modifications of the p53 Transcription Factor	257
Chapter 16	Actions of Nuclear Receptors	273
Chapter 17	NFAT and MEF2, Two Families of Calcium-dependent Transcription Regulators	293
Chapter 18	Hox Genes	309
Chapter 19	Nuclear Factor-kappa B	321
Chapter 20	The ATF Transcription Factors in Cellular Adaptive Responses	329

Section IV The Genome

Chapter 21	Function and Mechanism of Chromatin Boundaries	343
Chapter 22	Heterochromatin and X Inactivation	365
Chapter 23	DNA Methylation Regulates Genomic Imprinting, X Inactivation, and Gene Expression during Mammalian Development	377
Chapter 24	Comparative Genomics of Tissue Specific Gene Expression	393
Chapter 25	Transcription and Genomic Integrity	409
Chapter 26	Cell Death and Transcription	431

Section V Special Topics

Chapter 27	Pre-mRNA Splicing in Eukaryotic Cells	447
Chapter 28	Genome Organization: The Effects of Transcription-driven DNA Supercoiling on Gene Expression Regulation	469
Chapter 29	The Biogenesis and Function of MicroRNAs	481
Chapter 30	Transcription Factor Dynamics	493
Chapter 31	Actin, Actin-Related Proteins and Actin-Binding Proteins in Transcriptional Control	503
Chapter 32	Wnt Signaling and Transcriptional Regulation	519
Chapter 33	Regulatory Mechanisms for Floral Organ Identity Specification in <i>Arabidopsis thaliana</i>	533
Chapter 34	Transcription Control in Bacteria	549
Chapter 35	Gene Therapy: Back to the Basics	565
