

CONTENTS

1 Basic Reading for Molecular Biology	1
1.1 SMALL MOLECULES	1
1.2 GENES ARE DNA	9
1.3 CHROMOSOMES	12
1.4 CLUSTERS AND REPEATS	18
1.5 GENOMES EVOLVE BOTH BY ACQUIRING NEW SEQUENCES AND BY REARRANGING EXISTING SEQUENCES	22
1.6 REPLICATION OF DNA	27
1.7 DNA REPAIR	31
1.8 TRANSCRIPTION	37
1.9 REGULATION OF GENE EXPRESSION	41
1.10 THE OPERON	47
1.11 RIBOZYMES HAVE VARIOUS CATALYTIC ACTIVITIES	52
1.12 DETERMINATION OF PROTEIN SEQUENCES	56
1.13 PROTEIN SYNTHETIC APPARATUS	61
1.14 PROTEIN TRAFFICKING	67
1.15 CHAPERONES MAY BE REQUIRED FOR PROTEINFOLDING	70
1.16 CELL CYCLE	76
1.17 APOPTOSIS	82
1.18 ONCOGENES CODE FOR COMPONENTS OF SIGNAL	

TRANSDUCTION CASCADES	87
1.19 THE LOGIC OF INTRACELLULAR SIGNALING: LESSONS FROM COMPUTER-BASED "NEURAL NETWORKS"	92
1.20 IMMUNE DIVERSITY	100
1.21 NUCLEIC ACID HYBRIDIZATION	105
2 Reading Materials	112
2.1 THE RNA WORLD: A CRITIQUE	112
2.2 RNA AND DNA AS CATALYSTS	125
2.3 RNA INTERFERENCE AND GENE SILENCING: HISTORY AND OVERVIEW	132
2.4 PROTEINS SYNTHESIS	143
2.5 PHOSPHORYLATION-DEPENDENT PROTEIN INTERACTIONS AT THE NUCLEAR ENVELOPE	150
2.6 GENE REGULATION IN EUKARYOTES	154
2.7 THE CELL CYCLE	159
2.8 THE POLYMERASE CHAIN REACTION	163
2.9 APPLICATIONS OF MICROARRAYS	179
2.10 MODEL ORGANISMS: GERMS, WORMS, WEEDS, BUGS & RODENTS	183
2.11 FUNCTIONAL GENOMICS	189
2.12 PROTEOMICS AND THE NEW BIOLOGY	194
2.13 MOLECULAR LINGUISTICS: EXTRACTING INFORMATION FROM GENE AND PROTEIN SEQUENCES	198
2.14 BIOLOGICAL CLOCKS	203
2.15 AIDS AND HIV	208
2.16 GENE THERAPY	216

2.17	MAD COW DISEASE	223
2.18	CONCERN GROWS OVER GENETICALLY MODIFIED FOOD	227
3	研究性论文写作指南	235
Appendix I	生物类期刊影响因子排名	259
Appendix II	词汇索引	267
Reference		281
