CONTENTS OF VOLUME II	xi

MACROMOLECULAR STRUCTURE AND FUNCTION

Introduction. By A. Tiselius	3
The Structure of Globular Proteins. By J. C. Kendrew	5
Molecular Configuration of Nucleic Acids. By M. H. F. Wilkins	13
Partition of Macromolecules in Aqueous Two-Phase Systems. By Per-Åke Albertsson	33
The Reactivity of Certain Functional Groups in Ribonuclease A towards Substitution by 1-Fluoro-2,4-dinitrobenzene. Inactivation of the Enzyme by Substitution at the Lysine Residue in Position 41. By C. H. W. Hirs, Mirjam Halman and Jadwiga H. Kycia	41
The Relation of the Secondary Structure of Pepsin to Its Biological Activity. By Gertrude E. Perlmann	59
The Problem of Nucleotide Sequence in Deoxyribonucleic Acids. By Erwin Chargaff	67
Problems in Polynucleotide Biosynthesis. By J. N. Davidson	95
Enzymic Formation of Deoxyribonucleic Acid from Ribonucleotides. By Peter Reichard	103
Studies on the Mechanism of Synthesis of Soluble Ribonucleic Acid. By E. S. Canellakis and Edward Herbert	113

MICROSOMES AND PROTEIN SYNTHESIS

The Endoplasmic Reticulum: Some Current Interpretations of Its Form and Functions. By Keith R. Porter	127
Pinocytosis. By H. Holter	157
The Ergastoplasm in the Mammary Gland and Its Tumours: An Electron Microscope Study with Special Reference to Caspersson's and Santesson's A and B Cells. By F. Haguenau and K. H. Hollmann	169
The External Secretion of the Pancreas as a Whole and the Communication between the Endoplasmic Reticulum and the Golgi Bodies. By Gottwalt Christian Hirsch	195

	PAGE
Immunological Studies of Microsomal Structure and Function. By Peter Perlmann and Winfield S. Morgan	209
Amino Acid Incorporation by Liver Microsomes and Ribonucleoprotein Particles. By Tore Hultin, Alexandra von der Decken, Erik Arrhenius and Winfield S. Morgan	221
The Effects of Spermine on the Ribonucleoprotein Particles of Guinea-Pig Pancreas. By Philip Siekevitz	239
The Correlation between Morphological Structure and the Synthesis of Serum Albumin by the Microsome Fraction of the Rat Liver Cell. By P. N. Campbell	255
Amino Acid Transport and Early Stages in Protein Synthesis in Isolated Cell Nuclei. By Vincent G. Allfrey	261
Effects of 8-Azaguanine on the Specificity of Protein Synthesis in <i>Bacillus cereus</i> . By H. Chantrenne	281
Purine and Pyrimidine Analogues and the Mucopeptide Biosynthesis in Staphylococci. By H. J. Rogers and H. R. Perkins	289
Studies on the Incorporation of Arginine into Acceptor RNA of <i>Escherichia coli</i> . By H. G. Boman, I. A. Boman and W. K. Maas	297

POLYSACCHARIDES

Introduction. By Gunnar Blix	311
The Growth of Saccharide Macromolecules. By Shlomo Hestrin	315
Mucopolysaccharides of Connective Tissue. By Albert Dorfman and Sara Schiller	327
Separation of Oligosaccharides with Gel Filtration. By Per Flodin and Kåre Asperg	346
AUTHOR INDEX	351
SUBJECT INDEX	359
