

Section 1

HEMATOLOGY

1-1 The Compound Microscope	2
1-2 The Study of Common Objects	10
1-3 Collection of Blood Samples	11
1-4 Hemocytometry (Cell Counting) The Diluting Pipettes	18
1-5 Hemocytometry (Cell Counting) The Counting Chamber	23
1-6 Examination of Fresh Blood Drop Preparation Preparing a Peripheral Blood Film	26
1-7 Estimation of Hemoglobin	29
1-8 The Red Cell Count	38
1-9 The Packed Cell Volume (PCV) (Hematocrit, Hct)	45
1-10 Normal Blood Standards (Absolute Corpuscular Values and Indices)	48
1-11 The Total Leucocyte Count (TLC), White Cell Count (WCC)	51
1-12 Staining a Peripheral Blood Film	
The Differential Leucocyte Count (DLC)	59
1-13 The Cooke-Arneth Count (Arneth Count)	72
1-14 The Eosinophil Count	73
1-15 Study of Morphology of Red Blood Cells	74
1-16 The Reticulocyte Count	75
1-17 The Erythrocyte Sedimentation Rate (ESR)	77
1-18 Blood Grouping (Syn: Blood Typing)	82
1-19 Tests for Hemostasis	
(Bleeding Time, Coagulation Time, Platelet Count, and other Tests)	93
1-20 Osmotic Fragility of Red Blood Cells	107
1-21 Specific Gravity of Blood and Plasma	
(Copper Sulphate Falling Drop Method)	111
1-22 Determination of Viscosity of Blood	115

Section 2

HUMAN EXPERIMENTS

2-1	Stethography (Recording of Normal and Modified Movements of Respiration)	116
2-2	Determination of Breath Holding Time (BHT)	121
2-3	Spirometry: Determination of Vital capacity, Peak Expiratory Flow Rate, and Lung Volumes and Capacities	122
2-4	Pulmonary Function Tests	131
2-5	Cardiopulmonary Resuscitation (CPR) (Cardiopulmonary-Cerebral Resuscitation, CPR)	132
2-6	Recording of Systemic Arterial Blood Pressure	137
2-7	Effect of Posture, Gravity, and Muscular Exercise on Blood Pressure	149
2-8	Cardiac Efficiency Tests (Exercise Tolerance Tests)	152
2-9	Demonstration of Carotid Sinus Reflex	154
2-10	Demonstration of Venous Blood Flow	155
2-11	Recording of Venous Pressure	155
2-12	Demonstration of Triple Response	156
2-13	Perimetry (Charting the Field of Vision)	157
2-14	Mechanical Stimulation of the Eye	161
2-15	Physiological Blind Spot	161
2-16	Near Point and Near Response	162
2-17	Sanson Images	162
2-18	Demonstration of Stereoscopic Vision	163
2-19	Dominance of the Eye	163
2-20	Subjective Visual Sensations	163
2-21	Tuning-Fork Tests of Hearing	163
2-22	Localization of Sound	166
2-23	Masking of Sounds	166
2-24	Sensations of Touch, Pain, Temperature	166
2-25	Sensation of Taste	169
2-26	Sensation of Smell	169
2-27	Electroencephalography (EEG)	170
2-28	Recording of Auditory Evoked Potentials	173
2-29	Electromyography (EMG)	174
2-30	Conduction Velocity in Median Nerve	175

2-31	Electrocardiography (ECG)	176
2-32	Preparing a Diet Sheet	179
2-33	Pregnancy Tests	181
2-34	Methods of Family Planning	182
2-35	Experiments on Student Physiograph	184

Section 3

CLINICAL EXAMINATION

3-1	The Respiratory System	188
3-2	The Cardiovascular System	192
3-3	The Digestive System and Abdomen	197
3-4	The Nervous System	200

Section 4

EXPERIMENTAL PHYSIOLOGY (AMPHIBIAN AND MAMMALIAN EXPERIMENTS)

4-1	Study of Apparatus	219
4-2	Dissection of Gastrocnemius Muscle-Sciatic Nerve Preparation and Study of its Excitability	227
4-3	Simple Muscle Twitch (Effect of a Single Stimulus)	229
4-4	Effect of Changing the Strength of Stimulus	234
4-5	Effect of Temperature on Muscle Contraction	237
4-6	Velocity of Nerve Impulse	238
4-7	Effect of Two Successive Stimuli	238
4-8	Genesis of Tetanus (Effect of Many Successive Stimuli)	240
4-9	Phenomenon of Fatigue and its Site (Effect of Continued Stimulation)	243
4-10	Effect of Load and Length on Muscle Contraction (Free- and After-loading)	244
4-11	Exposure of Frog's Heart and Normal Cardiogram	246
4-12	Effect of Temperature on Frog's Heart	248
4-13	Effect of Adrenalin, Acetylcholine, and Atropine on Heart	249
4-14	Effect of Stimulation of Vagosympathetic Trunk and Crescent; Vagal Escape; Effect of Nicotine and Atropine	250
4-15	Properties of Cardiac Muscle (Stannius Ligatures)	252

4-16	Perfusion of Isolated Heart of Frog	255
4-17	Study of Reflexes in Spinal and Decerebrate Frogs	255
4-18	Movements of Amphibian Intestine <i>in Situ</i>	257
4-19	Experiments on Anesthetized Dog	257
4-20	Urinary Output in Anesthetized Dog	261
4-21	Perfusion of Isolated Heart of Rabbit	261
4-22	Movements of Isolated Intestine of Rabbit	262

Section 5

CHARTS

5-1	Arterial Pulse Tracing	264
5-2	Jugular Venous Pulse Tracing	266
5-3	Electrocardiogram (ECG)	267
5-4	Cardiac Cycle	270
5-5	Oxygen Dissociation Curve	272
5-6	Lung Volumes and Capacities	275
5-7	Strength-Duration Curve	275
5-8	Action Potential in a Large Myelinated Nerve Fiber	276
5-9	Action Potentials in Cardiac Muscle Fibers	280
5-10	Dye Dilution Curve	281
5-11	Snellen's Chart	284
5-12	Jaeger's Chart	285
5-13	Ishihara Charts	286
5-14	Oral Glucose Tolerance Test (OGTT)	287
5-15	Fractional Test Meal (Gastric Analysis)	291

Section 6

CALCULATIONS

Calculations	295
Appendix	301
Index	311
