## SECTION - 1 AGRICULTURE BIOTECHNOLOGY

|     |                                                                                                                              |    |
|-----|------------------------------------------------------------------------------------------------------------------------------|----|
| 1.  | Organic Farming vs. Sustainable Production                                                                                   | 1  |
|     | — Harbans Kaur Kehri and Sudhir Chandra                                                                                      |    |
| 2.  | Biological Action of Herbicides on Cyanobacteria — An Overview                                                               | 10 |
|     | — Surendra Singh, Pallavi Datta and Rekha Patel                                                                              |    |
| 3.  | Research Priorities in Relation to Pathogens Posing Problem in Forestry Practices                                            | 15 |
|     | — Jamaluddin                                                                                                                 |    |
| 4.  | <i>Mycorrhizae</i> in Ecosystems — An Ecofriendly Approach for Improved Plant Growth                                         | 24 |
|     | — S.K. Dwivedi and P. Dwivedi                                                                                                |    |
| 5.  | Exploiting <i>Mycorrhiza</i> for Oilseed Crop Production                                                                     | 33 |
|     | — Anil Prakash and Vandana Tandon                                                                                            |    |
| 6.  | Heterogenicity in the Distribution of Endomycorrhizal species in Sweet Potato Soils of India                                 | 39 |
|     | — V.S. Harikumar and V.P. Potty                                                                                              |    |
| 7.  | Effect of Aluminium on Mineral Nutrition of the Ectomycorrhizal Fungus <i>Cantharellus cibarius</i>                          | 43 |
|     | — M. Sudhakaran Reddy, Ajay Pandey, N. Tejprakash and V. Ramamurthy                                                          |    |
| 8.  | Utilization of Region specific Cyanobacteria as Biofertilizer for Rice — A Case Study                                        | 47 |
|     | — Siba P. Adhikary                                                                                                           |    |
| 9.  | Isolation and Screening of <i>Azospirillum</i> Strains for Developing Biofertilizer for Wheat ( <i>Triticum aestivum</i> L.) | 57 |
|     | — R.P. Singh, G.R. Lawanaya and A. Vaishampayan                                                                              |    |
| 10. | Negative (Stimulatory) Allelopathy of <i>Lantana camara</i> L. on Linseed var. Kiran                                         | 63 |
|     | — P. Oudhia, S.S. Kolhe and R.S. Tripathi                                                                                    |    |
| 11. | Gene Transfer Through Somatic Hybridization in Brassicas                                                                     | 67 |
|     | — R.P. Singh, B.K. Prasad, S.P. Singh and B.D. Singh                                                                         |    |
| 12. | Selection of <i>Azotobacter</i> Strains for Growth and Survival under Stress Conditions                                      | 74 |
|     | — Nirmala Agrawal and H.P. Singh                                                                                             |    |

- |     |                                                                                                                                                                                                                                |     |
|-----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 13. | A Highly Efficient Micropropagation Protocol of Teak ( <i>Tectona grandis</i> L.)<br>— S.K. Tiwari, E.A. Siril and K.P. Tiwari                                                                                                 | 82  |
| 14. | Pesticide Tolerance by Common Non-Heterocystous Filamentous Cyanobacteria of Rice Fields of Uttar Pradesh<br>— O.N. Tiwari and G.L. Tiwari                                                                                     | 89  |
| 15. | <i>Eucalyptus pauciflora</i> — A Potential Source of Sustainable, Ecofriendly Storage Pesticide<br>— Amritesh Chandra Shukla Shahi and Anupam Dikshit                                                                          | 93  |
| 16. | A Biocontrol Formulation for Post-Emergence Damping-off of <i>Moringa pterygosperma</i><br>— N.S.K. Harsh and B.M. Ojha                                                                                                        | 108 |
| 17. | Need for Strain Improvement of Plant Growth Promoting Fungi to Increase Growth and Yield of Crops<br>— Bharat Rai and T. Santavir Singh                                                                                        | 116 |
| 18. | Induction of Callus and Organogenesis from Cultured Shoot Apex for the Micropropagation of <i>Cestrum nocturnum</i> Linn.<br>— Manju Kumari, Manoj Kumar, J.D. Choudhary and L.N. Shukla                                       | 121 |
| 19. | Cloning of Nitrate Reductase Gene ( <i>Nia-D</i> ) of <i>Aspergillus niger</i> and It's use for Transformation of <i>Beauveria bassiana</i><br>— J.R. Kinghorn, Shiela E. Unkles, R.C. Rajak, G. Venkateswerlu and S.S. Sandhu | 127 |
| 20. | Microbial Quality of Osmo-Dehydrated Banana<br>— P. Heartwin, Amala Dhas, K. Thangavel, Z. John Kennady and R. Kailappan                                                                                                       | 133 |
| 21. | Natural Incidence of Toxigenic <i>Aspergillus flavus</i> Ink Strains on the Surface of Preharvest Jujube Fruits ( <i>Ziziphus mauritiana</i> Lamk)<br>— Yash Paul Singh and Geeta Sumbali                                      | 140 |
| 22. | Algalization Studies on Chickpea ( <i>Cicer arietinum</i> L.)<br>— S.B. Angadi Jagannath, Umapati Dengi and Eshwarlal Sedamakar                                                                                                | 145 |
| 23. | Management of Mango Leaf Litter Using Microorganisms<br>— P.D. Desai and K.J. Shah                                                                                                                                             | 151 |
| 24. | Effect of <i>Azotobacter</i> inoculation and Nitrogen levels on Growth and Yield of Radish ( <i>Raphanus sativus</i> L.)<br>— O. Basavaraju, A.R. Madhava Rao, and T.H. Shankarappa                                            | 155 |
| 25. | Applicability of Fly-Ash, Phosphate Solubilizing Microbes and Mycorrhizae for Sustainable Productivity of Banana<br>— N.V. Phirke, S.B. Chincholkar, K.R. Yadav and R.M. Kothari                                               | 161 |
| 26. | Acute Toxicity of Selected Insecticides to the Infective Stage of <i>Steinernema</i> sp. Newfoundland Strain No. 1 (L1C)<br>— M.G. Worthman and J.R. Finney - Crawley                                                          | 166 |

## SECTION - 2

### INDUSTRIAL BIOTECHNOLOGY

- |     |                                                                                                                                                                               |     |
|-----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 27. | S.W.O.T. Analysis of Commercial Biotechnology — The Indian Context<br>— Dr. Abhay Deshpande                                                                                   | 181 |
| 28. | Biodiversity, Biotechnology and Innovative Biochemistry in the Discovery of Novel Secondary Metabolites<br>— B.N. Ganguli                                                     | 189 |
| 29. | Pharmaceutical Potential of Cyanobacteria<br>— T. Thirunalasundari and G. Subramanian                                                                                         | 199 |
| 30. | Synthesis of Surface Active Compounds by Microorganisms<br>— Swaranjit Singh                                                                                                  | 208 |
| 31. | Cyclodextrinase Activity of A Natural Isolate of Alkalophilic <i>Bacillus</i><br>— A.M. Sonawane, Nawani, and B.P. Kapadni                                                    | 216 |
| 32. | Studies on Microbial Degradation of Polystyrene : Lactose, Polystyrene, Starch Composites<br>— S. Mishra, N.R. Talele and N.V. Phirke                                         | 223 |
| 33. | Citric Acid Production by <i>Aspergillus niger</i> in Solid State Fermentation<br>— Luciana P.S. Vandenberghe, Carlos R. Soccol, Ashok Pandey and J.M. Lebeault               | 227 |
| 34. | Selection of Suitable Substances for Mass Multiplication of <i>Glomus mosseae</i> and Mixed Vam. Fungi Isolated from Coal Mine Over - Burden<br>— K.K. Chandra and Jamahuddin | 232 |
| 35. | Citric Acid Production from Agricultural Wastes by <i>Aspergillus niger</i> under Solid State Fermentation<br>— Lingappa, K. and Chandrashekhar Naik                          | 235 |
| 36. | Detection and Development of <i>Lactobacilli</i> and their Bioprocessing Features<br>— M.B. Sulochana, B. Sharada and A. Dayanand                                             | 239 |
| 37. | Characterization and Detergent Compatibility of Thermostable Alkaline Protease from <i>Bacillus</i> sp. IS-3<br>— J.K. Gupta, L.K. Purva Gupta and S.K. Soni                  | 244 |
| 38. | In vitro Production of Alkaloids of <i>Rauwolfia serpentina</i> Benth.<br>— N.B. Singh and B.N. Pandey                                                                        | 251 |

## SECTION - 3

### ENVIRONMENTAL BIOTECHNOLOGY

- |     |                                                                                                                |     |
|-----|----------------------------------------------------------------------------------------------------------------|-----|
| 29. | Studies on Leaching of Copper from Mosaboni Ore using Thermophilic Bacteria<br>— Asha Gupta and Kumar Birendra | 257 |
|-----|----------------------------------------------------------------------------------------------------------------|-----|

- 
- |     |                                                                                                                                                                                                  |     |
|-----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 40. | Influence of Inoculum types on Bioextraction Profile of Copper and Zinc from GMDC Concentrate in STR<br><br>— D.R. Tipre, S.B. Vora and S.R. Dave                                                | 263 |
| 41. | Role of Symbiotic Micro-Organisms in Sustainable Plant Growth on Heavy Metal Contaminated Industrial Sites<br><br>— T.M. Chaudhry and A.G. Khan                                                  | 270 |
| 42. | Potentials of <i>Pseudomonas pickettii</i> Strain US 321 in Bioremediation<br><br>— Upma Gulati and Sheela Srivastava                                                                            | 280 |
| 43. | Bioremediation of Cadmium by Metal Resistant Strain of Cyanobacteria<br><br>— S.K. Verma, Shuchi Jain, V. Raveender and P.I. Rosanto                                                             | 284 |
| 44. | Microbial Degradation of Crude oil and Some Petrochemical Pollutants<br><br>— Anjana Desai, Hanson K.G., Arpana Acharya and Dharmendra Patel                                                     | 291 |
| 45. | Herbicides Induced <i>in vitro</i> Protein Degradation Mutagenicity and Cytotoxicity in Bacteria<br><br>— Richa Jaiswal, Saba Siddiqui, and Javed Musarrat                                       | 300 |
| 46. | Studies on the Interaction among Soil Algae <i>in vitro</i><br><br>— Anil Kumar Sinha, Kamini Kumari and B.N. Verma                                                                              | 309 |
| 47. | Influence of Carbofuran on the Activity of Soil Enzymes in Submerged Rice Soil Ecosystem<br><br>— Z.J. Kennedy and S. Sundarav Arathan                                                           | 322 |
| 48. | Management and Utilization of Wastes from Broccoli ( <i>Brassica oleracea</i> var. <i>italica</i> )<br><br>— Ganesh Hedawoo and R.P. Thakre                                                      | 327 |
| 49. | Biotechnological Impact on Sulfur Metabolizing Enzymes of Cyanobacterium <i>Anacystis nidulans</i><br><br>— Deepti Verma                                                                         | 333 |
| 50. | A Study of Phytoremediation of Sewage Water by Seeds of <i>Strychnos potatorum</i> L.f. and Gum of <i>Sterculia urens</i> Roxb.<br><br>— Ravi Upadhyay                                           | 340 |
| 51. | Biodegradation of Keratin by Keratinolytic Fungi<br><br>— Sanjana Kaul and Geeta Sumbali                                                                                                         | 344 |
| 52. | The Cellulolytic Activity of Some Biodegrading Fungi<br><br>— A.A. Fulzele and R.P. Thakre                                                                                                       | 350 |
| 53. | Activity of a Thermophilic Fungus From India<br><br>— R.V. Shukla                                                                                                                                | 354 |
| 54. | Degradation of $\gamma$ -Hexachlorocyclohexane in Soil and Food Environments by the Bacterial Strain BI-100 — A Biotechnological Approach<br><br>— A.K. Maiti, J. Datta, D.P. Modak and P.K. Ray | 358 |
