

CONTENTS

Sl. No.	Chapters	Page No.
1.	Introduction, Techniques and Basic Aspects	1
2.	Somatic embryogenesis	31
3.	Micropropagation	40
4.	Protoplast Culture and Somatic Hybridization	54
5.	Synthetic Seeds	82
6.	Production of Haploids	92
7.	Meristem Culture and Production of Disease - Free Plants	110
8.	Somaclonal Variation	118
9.	Production of Stress Tolerant Plants	131
10.	Cryopreservation	138
11.	Biodiversity and Biotechnology	143-164
