Introduction	7
Data compilation and coding	9
Categories for coding the ecological preferences	12
Acknowledgements	25
References	26
Ecological parameters	29
Species inventory	31
Ecoregional distribution	67
Endemism	117
Stream zonation preference	139
Altitude preference and altitude preference (WFD)	163
Microhabitat/substrate preference and habitat specialist	191
Hydrologic preference	221
Current preference	229
Temperature preference and temperature range preference	255
pH preference	267
Salinity preference	273

Feeding type	279
Respiration	291
Resistance/resilience to droughts	323
Life duration	329
Emergence/flight period and duration of emergence period	335
Reproductive life cycles per year	355
References to the ecological parameters	361
