Oxygen, Cyanide and Energy Generation in the Cystic Fibrosis

Pathogen *Pseudomonas aeruginosa*

Huw D. Williams, James E.A. Zlosnik, Ben Ryall

1. Introduction to <i>Pseudomonas aeruginosa</i>	3
2. Oxygen and <i>P. aeruginosa</i> Infection of the Cystic Fibrosis Lung – the Scope of this Review.	4
3. Means of Energy Generation in <i>P. aeruginosa</i>	7
4. Aerobic Respiration in <i>P. aeruginosa</i>	7
5. Anaerobic Respiration	31
6. Fermentation	40
7. Anaerobic Metabolism in the Cystic Fibrosis Lung	42
8. Synthesis of the Respiratory Inhibitor Hydrogen Cyanide in <i>P. aeruginosa</i>	43
9. Mucoid Conversion of <i>P. aeruginosa</i> in the Cystic Fibrosis Lung: the Role of Oxygen and Energy Metabolism	47
10. Conclusion	50
References	50

Structure, Mechanism and Physiological Roles of Bacterial

Cytochrome *c* Peroxidases

John M. Atack, David J. Kelly

Abbreviations	74
1. Introduction: Enzymic Mechanisms to Combat Oxidative and Peroxidative Stress.	74

2. Phylogenetic Analysis of Bacterial CCPs Reveals a Novel Sub-Group of Tri-Haem Proteins	79
3. MauG Proteins	83
4. Structure of Bacterial CCPs	83
5. Mechanistic Aspects of Catalysis by Bacterial CCPs	88
6. Electron Donors and Electron Transport in Bacterial CCPs	90
7. Roles of CCPs in Bacterial Cells	93
8. Concluding Remarks	98
Acknowledgements	98
References	98

Respiratory Transformation of Nitrous Oxide (N₂O) to Dinitrogen by *Bacteria* and *Archaea*

Walter G. Zumft and Peter M.H. Kroneck

Abbreviations	109
1. Introduction	110
2. Chemistry of N ₂ O	112
3. Genomic and Organismal Resources	114
4. Properties of N ₂ O Reductase	127
5. Structure of N ₂ O Reductase	131
6. Novel Cu Centres in N ₂ O Reductase	136
7. Organization of <i>nos</i> Genes, Gene Expression, Regulation	152
8. Evolutionary Aspects and Phylogenetic Relationships	157
9. Topology and Transport Processes	168
10. Cu Centre Assembly	175
11. Electron Donation and Maintenance of Activity <i>in vivo</i>	180
12. A Glimpse of History	194
13. Conclusions and Perspectives	196
Acknowledgements	197
References	197

A Circadian Timing Mechanism in the Cyanobacteria

Stanly B. Williams

1. Introduction	231
2. The Cyanobacterial Circadian Clock: The <i>S. Elongatus</i> PCC 7942 Kai Locus	242

3. Sequence, Structure and Function of Clock Proteins and the Kai-Clock Complex	245
4. Clock-Controlled Gene Expression	266
5. Clock Input	270
6. Other Components: The <i>rpo</i> (Sigma Factor) and <i>cpmA</i> Genes	274
7. Conclusions	276
Acknowledgments	281
References	282
