

Contents

List of Contributors	vii
Preface	xi
Acknowledgments	xv
Section I: Glycoconjugate Structural Analysis	1
1. High-Sensitivity Analytical Approaches to the Analysis of N-Glycans Yehia Mechref and Milos V. Novotny	3
2. O-Glycan Complexity and Analysis Lance Wells	45
3. Glycosaminoglycans Fuming Zhang, Zhenqing Zhang, and Robert J. Linhardt	59
Section II: Glycotranscriptomics	81
4. Isotopic Labeling of Glycans for Quantitative Glycomics Richard D. Cummings and David F. Smith	83
5. Glycotranscriptomics Alison Nairn and Kelley Moremen	95
Section III: Protein–Glycan Interactions	137
6. Glycan-Binding Proteins and Glycan Microarrays David F. Smith and Richard D. Cummings	139
7. Chromatographic and Mass Spectrometric Techniques Jun Hirabayashi	161
Section IV: Glycobioinformatics	177
8. Integration of Glycomics Knowledge and Data William S. York, Krys J. Kochut, and John A. Miller	179
9. KEGG GLYCAN for Integrated Analysis of Pathways, Genes, and Glycan Structures Kosuke Hashimoto and Minoru Kanehisa	197
10. Carbohydrate Structure Databases R. René Ranzinger, Stephan Herget, Thomas Lütteke, and Martin Frank	211

Section V: Glycomes	235
11. Glycomics of the Immune System Pierre Redelinghuys and Paul R. Crocker	237
12. Mouse and Human Glycomes Simon J. North, Sara Chalabi, Mark Sutton-Smith, Anne Dell, and Stuart M. Haslam	263
13. Genetic and Structural Analysis of the Glycoprotein and Glycolipid Glycans of <i>Drosophila melanogaster</i> Mary Sharrow, Kazuhiro Aoki, Sarah Baas, Mindy Porterfield, and Michael Tiemeyer	329
14. Malaria Eugene Davidson	347
15. Glycomics in Unraveling Glycan-Driven Immune Responses by Parasitic Helminths Irma van Die and Richard D. Cummings	367
Section VI: Disease Glycomes	397
16. Cancer Glycomics J. Michael Pierce	399
17. Introduction to Human Glycosylation Disorders Hudson H. Freeze and Erik Eklund	431
Index	465
Color Plate Section
