CONTRIBUTORS TO VOLUME 423	ix
VOLUMES IN SERIES	xiii

Section I. Structural Approaches

1. The PICM Chemical Scanning Method for Identifying Domain-Domain and Protein-Protein Interfaces: Applications to the Core Signaling Complex of <i>E. coli</i> Chemotaxis	RANDAL B. BASS, AARON S. MILLER, SUSAN L. GLOOR, AND JOSEPH J. FALKE	3
2. Use of Site-Directed Cysteine and Disulfide Chemistry to Probe Protein Structure and Dynamics: Applications to Soluble and Transmembrane Receptors of Bacterial Chemotaxis	RANDAL B. BASS, SCOTT L. BUTLER, STEPHEN A. CHERVITZ, SUSAN L. GLOOR, AND JOSEPH J. FALKE	25
3. Measuring Distances by Pulsed Dipolar ESR Spectroscopy: Spin-Labeled Histidine Kinases	PETER P. BORBAT AND JACK H. FREED	52
4. Rigid Body Refinement of Protein Complexes with Long-Range Distance Restraints from Pulsed Dipolar ESR	JAYA BHATNAGAR, JACK H. FREED, AND BRIAN R. CRANE	117
5. TonB/TolA Amino-Terminal Domain Modeling	KIMBERLY L. KELLER, KERRY K. BRINKMAN, AND RAY A. LARSEN	134
6. Functional Dynamics of Response Regulators Using NMR Relaxation Techniques	ALEXANDRA K. GARDINO AND DOROTHEE KERN	149
7. The Design and Development of Tar-EnvZ Chimeric Receptors	TAKESHI YOSHIDA, SANGITA PHADTARE, AND MASAYORI INOUE	166
8. Functional and Structural Characterization of EnvZ, an Osmosensing Histidine Kinase of <i>E. coli</i>	TAKESHI YOSHIDA, SANGITA PHADTARE, AND MASAYORI INOUE	184

9. Light Modulation of Histidine-Kinase Activity in Bacterial Phytochromes Monitored by Size Exclusion Chromatography, Crosslinking, and Limited Proteolysis	STEFFI NOACK AND TILMAN LAMPARTER	203
10. A Temperature-Sensing Histidine Kinase—Function, Genetics, and Membrane Topology	YVONNE BRAUN, ANGELA V. SMIRNOVA, HELGE WEINGART, ALEXANDER SCHENK, AND MATTHIAS S. ULLRICH	222
11. The Regulation of Histidine Sensor Kinase Complexes by Quorum Sensing Signal Molecules	MATTHEW B. NEIDITCH AND FREDERICK M. HUGHSON	250

Section II. Reconstitution of Heterogeneous Systems

12. Liposome-Mediated Assembly of Receptor Signaling Complexes	DAVID J. MONTEFUSCO, ABDALIN E. ASINAS, AND ROBERT M. WEIS	267
13. Analyzing Transmembrane Chemoreceptors Using <i>In Vivo</i> Disulfide Formation Between Introduced Cysteines	WING-CHEUNG LAI AND GERALD L. HAZELBAUER	299
14. Using Nanodiscs to Create Water-Soluble Transmembrane Chemoreceptors Inserted in Lipid Bilayers	THOMAS BOLDOG, MINGSHAN LI, AND GERALD L. HAZELBAUER	317
15. Assays for CheC, FliY, and CheX as Representatives of Response Regulator Phosphatases	TRAVIS J. MUFF AND GEORGE W. ORDAL	336
16. Genetic Dissection of Signaling Through the Res Phosphorelay	NADIM MAJDALANI AND SUSAN GOTTESMAN	349

Section III. Intracellular Methods and Assays

17. <i>In Vivo</i> Measurement by FRET of Pathway Activity in Bacterial Chemotaxis	VICTOR SOURJIK, ADY VAKNIN, THOMAS S. SHIMIZU, AND HOWARD C. BERG	365
18. <i>In Vivo</i> and <i>In Vitro</i> Analysis of the <i>Rhodobacter sphaeroides</i> Chemotaxis Signaling Complexes	STEVEN L. PORTER, GEORGE H. WADHAMS, AND JUDITH P. ARMITAGE	392
19. <i>In Vivo</i> Crosslinking Methods for Analyzing the Assembly and Architecture of Chemoreceptor Arrays	CLAUDIA A. STUDDERT AND JOHN S. PARKINSON	414

20. A "Bucket of Light" for Viewing Bacterial Colonies in Soft Agar	JOHN S. PARKINSON	432
21. Phenotypic Suppression Methods for Analyzing Intra- and Inter-Molecular Signaling Interactions of Chemoreceptors	PETER AMES AND JOHN S. PARKINSON	436
22. Single-Cell Analysis of Gene Expression by Fluorescence Microscopy	TIM MIYASHIRO AND MARK GOULIAN	458

Section IV. Genome-Wide Analyses of Two-Component Systems

23. Two-Component Systems of <i>Mycobacterium tuberculosis</i> —Structure-Based Approaches	PAUL A. TUCKER, ELZBIETA NOWAK, AND JENS PREBEN MORTH	479
24. Transcriptomic Analysis of ArlRS Two-Component Signaling Regulon, a Global Regulator, in <i>Staphylococcus aureus</i>	YINDUO JI, CHUANXIN YU, AND XUDONG LIANG	502
25. Global Analysis of Two-Component Gene Regulation in <i>H. pylori</i> by Mutation Analysis and Transcriptional Profiling	BIJU JOSEPH AND DAGMAR BEIER	514
26. Phosphotransfer Profiling: Systematic Mapping of Two-Component Signal Transduction Pathways and Phosphorelays	MICHAEL T. LAUB, EMANUELE G. BIONDI, AND JEFFREY M. SKERKER	531
27. Identification of Histidine Phosphorylations in Proteins Using Mass Spectrometry and Affinity-Based Techniques	ANDREW R. S. ROSS	549
