

CONTENTS

<i>Contributors</i>	<i>xi</i>
<i>Preface</i>	<i>xvii</i>
<i>Volumes in Series</i>	<i>xix</i>

1. Qualitative Analysis and Quantitative Assessment of Changes in Neutral Glycerol Lipid Molecular Species Within Cells **1**

Jessica Krank, Robert C. Murphy, Robert M. Barkley, Eva Duchoslav, and Andrew McAnoy

1. Introduction	2
2. Reagents	3
3. Methods	4
4. Results	7
5. Conclusions	19
Acknowledgments	19
References	19

2. Glycerophospholipid Identification and Quantitation by Electrospray Ionization Mass Spectrometry **21**

Pavlina T. Ivanova, Stephen B. Milne, Mark O. Byrne, Yun Xiang, and H. Alex Brown

1. Introduction	22
2. Nomenclature	25
3. Mass Spectrometry	26
4. General Strategy for Phospholipid Isolation and Mass Spectral Analysis	27
5. Extraction and Mass Spectral Analysis of Global Glycerophospholipids	28
6. Polyphosphoinositide Extraction and Mass Spectral Analysis	35
7. Computational Analysis of Mass Spectral Data	41
Acknowledgments	54
References	54

3. Detection and Quantitation of Eicosanoids via High Performance Liquid Chromatography-Electrospray Ionization-Mass Spectrometry	59
Raymond Deems, Matthew W. Buczynski, Rebecca Bowers-Gentry, Richard Harkewicz, and Edward A. Dennis	
1. Introduction	60
2. Methods	62
3. Results and Discussion	74
Acknowledgments	80
References	81
4. Structure-Specific, Quantitative Methods for Analysis of Sphingolipids by Liquid Chromatography-Tandem Mass Spectrometry: "Inside-Out" Sphingolipidomics	83
M. Cameron Sullards, Jeremy C. Allegood, Samuel Kelly, Elaine Wang, Christopher A. Haynes, Hyejung Park, Yanfeng Chen, and Alfred H. Merrill, Jr.	
1. Introduction: An Overview of Sphingolipid Structures and Nomenclature	86
2. Analysis of Sphingolipids by Mass Spectrometry	89
3. Analysis of Sphingolipids by "OMIC" Approaches	92
4. Materials and Methods	95
5. Materials	98
6. Extraction	98
7. Identification of the Molecular Species by Tandem Mass Spectrometry	100
8. Quantitation by LC-ESI-MS/MS Using Multireaction Monitoring	101
9. Analysis of (Dihydro)Ceramides, (Dihydro)Sphingomyelins, and (Dihydro)Monohexosyl-Ceramides in Positive Ion Mode	104
10. Other Methods	109
Acknowledgments	111
References	112
5. Analysis of Ubiquinones, Dolichols, and Dolichol Diphosphate-Oligosaccharides by Liquid Chromatography-Electrospray Ionization-Mass Spectrometry	117
Teresa A. Garrett, Ziqiang Guan, and Christian R. H. Raetz	
1. Introduction	118
2. Materials	121
3. Liquid Chromatography-Mass Spectrometry	122
4. Preparation of Lipid Extracts	122
5. LC-MS Detection and Quantification of Coenzyme Q	123
6. LC-MS Detection and Quantification of Dolichol	130

7. LC-MS and LC-MS/MS Characterization of Dolichol Diphosphate-Linked Oligosaccharides	136
Acknowledgment	140
References	140
6. Extraction and Analysis of Sterols in Biological Matrices by High Performance Liquid Chromatography Electrospray Ionization Mass Spectrometry	145
Jeffrey G. McDonald, Bonne M. Thompson, Erin C. McCrum, and David W. Russell	
1. Introduction	146
2. Supplies and Reagents	148
3. Extraction of Lipids from Cultured Cells and Tissues	149
4. Saponification of Lipid Extracts	151
5. Solid-Phase Extraction	152
6. Analysis by HPLC-ESI-MS	153
7. Quantitation	156
8. Data	157
9. Discussion, Nuances, Caveats, and Pitfalls	162
Acknowledgments	168
References	169
7. The Lipid Maps Initiative in Lipidomics	171
Kara Schmelzer, Eoin Fahy, Shankar Subramaniam, and Edward A. Dennis	
1. Introduction	172
2. Building Infrastructure in Lipidomics	173
3. Classification, Nomenclature, and Structural Representation of Lipids	174
4. Mass Spectrometry as a Platform for Lipid Molecular Species	177
5. Future Plans	180
Acknowledgments	182
References	182
8. Basic Analytical Systems for Lipidomics by Mass Spectrometry in Japan	185
Ryo Taguchi, Mashahiro Nishijima, and Takao Shimizu	
1. Introduction	186
2. Lipid Bank and Related Databases	187
3. Strategies for Lipid Identification and Quantitative Analysis by Mass Spectrometry	188

4. Several Practical Lipidomics Methods by Mass Spectrometry	190
5. Strategies for Identification of Individual Molecular Species in Glycerolipids and Glycerophospholipids by Lipid Search	192
6. Quantitative Analysis or Profiling of Lipid Molecular Species	197
7. Application of Several Different Methods in Lipidomics	199
8. Future Program for Lipidomics	208
Acknowledgments	209
References	209
9. The European Lipidomics Initiative: Enabling Technologies	213
Gerrit van Meer, Bas R. Leeflang, Gerhard Liebisch, Gerd Schmitz, and Felix M. Goñi	
1. Introduction	214
2. Methods of Lipidomics: Quantitative Analysis in Time	215
3. Imaging Lipids	218
4. Methods to Study the Physical Properties of Lipids	219
5. Data Handling and Standardization	224
6. Perspectives	226
Acknowledgments	227
References	227
10. Lipidomic Analysis of Signaling Pathways	233
Michael J. O. Wakelam, Trevor R. Pettitt, and Anthony D. Postle	
1. General Considerations	235
2. Lipid Extraction	235
3. HPLC-MS Analysis	237
4. General Phospholipid HPLC	237
5. Ceramide, Diacylglycerol, and Monoracylglycerol Separation	239
6. Phosphoinositide Separation	240
7. Analysis of Phospholipid Synthesis by ESI-MS/MS Using Stable Isotopes	241
8. Labeling Protocols	242
9. Lipid Extraction for ESI-MS/MS	243
10. LC-MS Analysis (<i>methyl-d₉</i>)-Choline	243
11. MRM Analysis of (<i>methyl-d₉</i>)-Choline Enrichment in Cell and Tissue Phosphorylcholine	244
12. ESI-MS/MS Analysis of Native and Newly Synthesized Phospholipids	244
13. Data Analysis	245
References	246

11. Bioinformatics for Lipidomics	247
Eoin Fahy, Dawn Cotter, Robert Byrnes, Manish Sud, Andrea Maer, Joshua Li, David Nadeau, Yihua Zhou, and Shankar Subramaniam	
1. Introduction	248
2. Lipid Structure Databases	249
3. Lipid-Associated Protein/Gene Databases	254
4. Tools for Lipidomics	256
5. Lipid Pathways	268
6. Challenges for Future Lipid Informatics	270
Acknowledgments	272
References	272
12. Mediator Lipidomics: Search Algorithms for Eicosanoids, Resolvins, and Protectins	275
Charles N. Serhan, Yan Lu, Song Hong, and Rong Yang	
1. Introduction: Metabolomics and Mediator Lipidomics-Informatics	276
2. Engineered Animals and Human Tissues	278
3. New Chemical Mediator Pathways in Resolution of Inflammation	279
4. Logic Diagram to Identify PUFA-Derived Lipid Mediators: Eicosanoids, Resolvins, and Protectins	284
5. Cognoscitive-Contrast-Angle Algorithm	286
6. Theoretical Database for Novel LM and Search Algorithm	292
7. Discussion	308
8. Conclusions and Next Steps	311
Acknowledgments	313
References	313
13. A Guide to Biochemical Systems Modeling of Sphingolipids for the Biochemist	319
Kellie J. Sims, Fernando Alvarez-Vasquez, Eberhard O. Voit, and Yusuf A. Hannun	
1. Introduction	320
2. System Map: Specifying the Model	322
3. Symbolic Equations: From Words and Pictures to Equations	327
4. Numerical Equations: From the Symbolic to a Computational Model	331
5. Model Analysis: Steady State, Stability, and Sensitivity	341
6. Simulation: What Happens If...?	345
7. Conclusion	346

8. Epilogue	346
Acknowledgments	348
References	348
14. Quantitation and Standardization of Lipid Internal Standards for Mass Spectroscopy	351
Jeff D. Moore, William V. Caufield, and Walter A. Shaw	
1. Introduction	352
2. Lipid Handling Guidelines	352
3. Chemical Characterization of Lipid Stocks	353
4. Preparation of Working Lipid Standards	355
5. Packaging of Lipid Standards	359
6. Quality Control and Stability Testing	361
7. Discussion	364
References	366
