

CONTENTS

Contributors	xiii
Preface	xix
Volumes in Series	xxi

Section I. Trypanosome U Insertion/Deletion 1

1. Isolation and Compositional Analysis of Trypanosomatid Editosomes 3

Aswini K. Panigrahi, Achim Schnauffer, and Kenneth D. Stuart

1. Introduction	4
2. Isolation of Enzymatically Active Editosomes	4
3. Identification of Protein Components	10
4. Tandem Affinity Purification of Editosomes	15
5. Characterization of Complexes	18
References	22

2. Uridine Insertion/Deletion Editing Activities 25

Jason Carnes and Kenneth D. Stuart

1. Introduction	26
2. Full-Round Insertion and Deletion	27
3. Precleaved Insertion and Deletion	35
4. TUTase Activity	40
5. Ligase Activity	41
6. Helicase Activity	42
7. Real-Time PCR of Editing <i>In Vivo</i>	43
References	52

3. RNA Editing Uridyltransferases of Trypanosomatids 55

Ruslan Aphasizhev and Inna Aphasizheva

1. Introduction	56
2. Purification of the RNA Editing TUTase 1 from Mitochondria of <i>Leishmania tarentolae</i>	58
3. Expression and Purification of Recombinant RET1	62
4. Isolation of the Editosome-Embedded and Recombinant RNA Editing TUTase 2	64
5. Affinity Isolation of RET2-Containing Complex from <i>T. brucei</i>	65

6. Expression and Purification of the Recombinant TbRET2	68
7. Uridyltransferase Activity Assays for the 20S Editosome and Recombinant RET2	69
8. <i>In Vitro</i> Analysis of Protein-Protein Interactions Involving TbRET2	71
References	72
4. Isolation of RNA Binding Proteins Involved in Insertion/Deletion Editing	75
Michel Pelletier, Laurie K. Read, and Ruslan Aphasizhev	
1. Introduction	76
2. Purification and Characterization of Mitochondrial RNA Binding Proteins 1 and 2 from <i>Leishmania tarentolae</i>	80
3. Purification of the MRP1/2 Complex from <i>Leishmania tarentolae</i>	81
4. Analysis of MRP1/2 Interactions in Mitochondrial Extracts	86
5. Reconstitution of the MRP1/2 Complex from Recombinant Proteins	89
6. RNA Binding and RNA Annealing Activities of the MRP1/2 Complex	91
7. Purification of RBP16 from Procyclic Form <i>Trypanosoma brucei</i>	94
8. Purification of RBP16 from the Bloodstream Forms <i>Trypanosoma brucei</i>	97
9. Expression and Purification of Recombinant RBP16	99
References	103
5. RNA-Protein Interactions in Assembled Editing Complexes in Trypanosomes	107
Jorge Cruz-Reyes	
1. Introduction	108
2. Site-Specific Photocrosslinking Methodology to Detect Direct Interactions of Purified Editing Complexes with Substrates for Full-Round Editing	110
3. Assays to Assess the Specificity of RNA-Protein Crosslinking Interactions in Editing Complexes	117
4. Additional Applications	121
5. Concluding Remarks	123
References	123
6. Strategies of Kinetoplastid Cryptogene Discovery and Analysis	127
Dmitri A. Maslov and Larry Simpson	
1. Introduction	128
2. Cell Growth	129
3. DNA Isolation	131
4. Search for Cryptogenes	132
5. Elucidation of Edited mRNA Sequences	134
6. Search for Guide RNA Genes	135
References	136

Section II. <i>Physarum</i> Insertion Editing	141
7. RNA Editing in <i>Physarum</i> Mitochondria: Assays and Biochemical Approaches	143
Elaine M. Byrne, Linda Visomirski-Robic, Yu-Wei Cheng, Amy C. Rhee, and Jonatha M. Gott	
1. Introduction	144
2. Experimental Systems	145
3. RNA Editing Assays	158
References	171
8. Computational Approaches to Insertional RNA Editing	173
Ralf Bundschuh	
1. Introduction	174
2. Overview	175
3. Building Gene Models	176
4. Locating Genes	178
5. Determining Start and Stop Codons	183
6. Predicting Editing Site Locations	185
7. Conclusions	193
References	194
9. Evolution of RNA Editing Sites in the Mitochondrial Small Subunit rRNA of the Myxomycota	197
Uma Krishnan, Arpi Barsamian, and Dennis L. Miller	
1. Introduction	198
2. Isolation and Amplification of Myxomycete DNA for Sequence Analysis	201
3. Analysis of Mitochondrial DNA and cDNA Sequences of the SSU rRNA Core Region	204
References	218
Section III. 5' Deletion/Insertion Editing of tRNAs	221
10. Analysis of 5'- or 3'-Terminal tRNA Editing: Mitochondrial 5' tRNA Editing in <i>Acanthamoeba castellanii</i> as the Exemplar	223
Amanda J. Lohan and Michael W. Gray	
1. Introduction	224
2. Methods	226
3. Concluding Remarks	240
References	240

Section IV. A-to-I Editing 243

11. Comparative Genomic and Bioinformatic Approaches for the Identification of New Adenosine-to-Inosine Substrates 245

Jaimie Sixsmith and Robert A. Reenan

1. Adenosine-to-Inosine RNA Editing 246
2. Bioinformatics 248
3. Comparative Genomics 249
4. Nervous System Targets of RNA Editing Identified by Comparative Genomics (Hoopengardner *et al.*, 2003) 251
5. Molecular Determinants and Guided Evolution of Species-Specific RNA Editing (Reenan, 2005) 252
6. Systematic Identification of Abundant Adenosine-to-Inosine Editing Sites in the Human Transcriptome (Levanon *et al.*, 2004) 256
7. Evolutionary Conserved Human Targets of Adenosine-to-Inosine RNA Editing (Levanon *et al.*, 2005) 257
8. Is Abundant Adenosine-to-Inosine RNA Editing Primate Specific? (Eisenberg *et al.*, 2005) 259
9. A Bioinformatics Screen for Novel Adenosine-to-Inosine RNA Editing Sites Reveals Recoding Editing in BC10 (Clutterluck *et al.*, 2005) 260
10. Conclusion 261
- References 262

12. Genetic Approaches to Studying Adenosine-to-Inosine RNA Editing 265

James E. C. Jepson and Robert A. Reenan

1. Introduction 266
2. ADARs: Structure and Function 267
3. The *Drosophila* ADAR is Required for Normal Adult Behavior and Undergoes Transcriptional and Posttranscriptional Regulation 269
4. Identifying the Targets of ADAR 270
5. The Use of Genetic Techniques to Study Adenosine-to-Inosine Editing in *Drosophila* 273
6. Spatial and Temporal Control of Transgenes Using the UAS-GAL4, Gene-Switch, and TARGET Systems 274
7. Quantifying Adenosine-to-Inosine Editing 280
- References 284

13. A Method for Finding Sites of Selective Adenosine Deamination 289

Johan Ohlson and Marie Öhman

1. Introduction 290
2. The Choice of Organism and Tissue to Find Novel Adenosine-to-Inosine Substrates in Mammals 291

3. Proteins Binding to Double-Stranded RNA	291
4. Using Immunoprecipitation to Detect ADAR-RNA Complexes	292
5. Using Microarray to Detect Adenosine-to-Inosine Editing Targets	294
6. Detection of Known Site-Selectively Edited Sites Using Specific Immunoprecipitation	294
7. Identification of Sites of Editing within the Substrate Candidates	295
8. ADAR2 Coimmunoprecipitation Using Mouse Brain	296
References	299
14. Purification and Assay of ADAR Activity	301
Liam P. Keegan, Joshua J. Rosenthal, Loretta M. Roberson, and Mary A. O'Connell	
1. Introduction	302
2. Overexpression of Recombinant Proteins in <i>Pichia pastoris</i>	302
3. Quantification of the Efficiency of RNA Editing	310
References	317
15. Large-Scale Overexpression and Purification of ADARs from <i>Saccharomyces cerevisiae</i> for Biophysical and Biochemical Studies	319
Mark R. Macbeth and Brenda L. Bass	
1. Introduction	320
2. Methods	321
3. Analysis of Purified hADAR2	328
4. Future Perspectives	329
References	329
16. Mouse Models to Elucidate the Functional Roles of Adenosine-to-Inosine Editing	333
Elizabeth Y. Rula and Ronald B. Emeson	
1. Introduction	334
2. Mammalian ADAR Enzymes	336
3. Mammalian ADAR Substrates	338
4. Generation of Genetically Modified Mice by Homologous Recombination in ES Cells	340
5. Classification of Transgenic Approaches	345
6. Genetic Modification of ADAR Substrates	345
7. Enzyme Modified Mice	353
8. Enzyme and Substrate Modified Mice	357
References	360

17. Probing Adenosine-to-Inosine Editing Reactions Using RNA-Containing Nucleoside Analogs	369
Olena Maydanovych, LaHoma M. Easterwood, Tao Cui, Eduardo A. Véliz, Subhash Pokharel, and Peter A. Beal	
1. Introduction	370
2. Synthesis of a Substrate Analog Phosphoramidite	371
3. General Synthetic Procedures	371
4. Synthesis, Deprotection, and Purification of Chemically Modified ADAR Substrate RNAs	374
5. General Biochemical Procedures	375
6. Evaluation of ADAR Substrate Analogs	377
7. Synthesis of a Transition State Analog Phosphoramidite for Mechanism-Based Trapping	379
8. Mechanism-Based Trapping of ADAR-RNA Complexes	382
References	385

Section V. Nuclear C-to-U Editing **387**

18. Measuring Editing Activity and Identifying Cytidine-to-Uridine mRNA Editing Factors in Cells and Biochemical Isolates	389
Harold C. Smith	
1. Introduction to Mammalian Cytidine-to-Uridine mRNA Editing	390
2. Poisoned Primer Extension	392
3. Biochemical Purification of Editing Factors	394
4. Activity Assays	401
5. Summary	410
References	410
19. Mouse Models as Tools to Explore Cytidine-to-Uridine RNA Editing	417
Soo-Jin Cho, Valerie Blanc, and Nicholas O. Davidson	
1. Introduction	418
2. apoB C-to-U RNA Editing	419
3. Developmental Regulation of C-to-U RNA Editing	420
4. Hormonal Regulation of C-to-U apoB RNA Editing	421
5. Nutritional Modulation of C-to-U apoB RNA Editing	424
6. Genetic Manipulations of Genes Involved in apoB RNA Editing	426
7. Analysis of apoB RNA Editing	429
References	431

Section VI. Editing in Plant Organelles	437
20. RNA Editing in Plant Mitochondria: Assays and Biochemical Approaches	439
Mizuki Takenaka and Axel Brennicke	
1. Introduction	440
2. Preparation of Mitochondrial Lysates Active in RNA Editing	441
3. Preparation of Templates for the RNA Editing Assays	445
4. Setting up the <i>In Vitro</i> Test System	448
5. The Detection System	450
6. Crucial Parameters: Troubleshooting	454
7. Adaptations and Assays for Common Applications	455
References	457
21. Assay of Editing of Exogenous RNAs in Chloroplast Extracts of Arabidopsis, Maize, Pea, and Tobacco	459
Michael L. Hayes and Maureen R. Hanson	
1. Introduction	460
2. Growth Conditions for the Isolation of Intact Chloroplasts from Tobacco, Pea, Maize, and Arabidopsis	462
3. Isolation of Chloroplasts and Production of Editing Competent Extracts	464
4. Editing of Exogenous RNA <i>In Vitro</i>	466
5. Quantification of Editing of Exogenous RNAs	474
6. Reduction of Editing Through the Addition of Competitor RNAs	478
7. Quantification of Editing of Endogenous RNAs	480
References	481
22. <i>In Organello</i> Gene Expression and RNA Editing Studies by Electroporation-Mediated Transformation of Isolated Plant Mitochondria	483
Jean-Claude Farré, David Choury, and Alejandro Araya	
1. Introduction	484
2. Purification of Mitochondria	486
3. Plasmid Construction	490
4. Electroporation-Mediated Transformation of Isolated Mitochondria	492
5. Electrotransformation Assay and Posttranscriptional Modifications of the Exogenous <i>cox II</i>	496
References	498

23. Transformation of the Plastid Genome to Study RNA Editing	501
Kerry A. Lutz and Pal Maliga	
1. Introduction	502
2. Identification of Unique <i>cis</i> Sequences for RNA Editing	503
3. Editing <i>trans</i> Factors	503
4. Protocols for Construction of Transplastomic Plants	504
5. Protocols for Testing RNA Editing in Tobacco Chloroplasts	513
6. Conclusions and Future Directions	515
References	516
 Author Index	 519
Subject Index	537
