

CONTENTS

<i>Contributors</i>	<i>xi</i>
<i>Preface</i>	<i>xvii</i>
<i>Volumes in Series</i>	<i>xix</i>
1. Purification of FLAG-Tagged Eukaryotic Initiation Factor 2B Complexes, Subcomplexes, and Fragments from <i>Saccharomyces cerevisiae</i>	1
Sarah S. Mohammad-Qureshi, Raphaël Haddad, Karren S. Palmer, Jonathan P. Richardson, Edith Gomez, and Graham D. Pavitt	
1. Introduction	2
2. Plasmid Vectors and Yeast Strains Used	4
3. Expression and Purification of eIF2B	6
4. Functional Analysis of Purified Proteins	10
5. Conclusions	10
Acknowledgments	10
References	11
2. <i>In Vivo</i> Deletion Analysis of the Architecture of a Multiprotein Complex of Translation Initiation Factors	15
Klaus H. Nielsen and Leoš Valášek	
1. Introduction	16
2. Ni ²⁺ Affinity Purification of eIF3 Using a Polyhistidine Tag	21
3. Deletion/Mutational Analysis of eIF3 Subunits and Ni ²⁺ Affinity Purification of Their Subcomplexes	24
4. eIF3 Purification Using Other Epitope Tags	27
5. CAM (Clustered-10-Alanine Mutagenesis)	29
Acknowledgments	30
References	31
3. An Approach to Studying the Localization and Dynamics of Eukaryotic Translation Factors in Live Yeast Cells	33
Susan G. Campbell and Mark P. Ashe	
1. Introduction	34
2. Yeast Strains and Growth Conditions	37
3. Application of Live Cell Imaging	39
4. Additional <i>In Vivo</i> Techniques	43

5. Conclusions	44
Acknowledgments	44
References	44
4. <i>In Vitro</i> and Tissue Culture Methods for Analysis of Translation Initiation on the Endoplasmic Reticulum	47
Samuel B. Stephens and Christopher V. Nicchitta	
1. Background	48
2. Methods	49
3. Analysis of Protein Synthesis Initiation on ER Membrane-Bound Ribosomes of Tissue Culture Cells	53
4. Velocity Sedimentation	57
Acknowledgments	59
References	59
5. Mammalian Stress Granules and Processing Bodies	61
Nancy Kedersha and Paul Anderson	
1. Introduction	62
2. Detection and Identification of SGs and PBs	63
3. Immunostaining Protocol	70
4. Stimuli for the Induction of SGs and PBs	76
5. Transfection-Induced SGs	77
6. Induction of PBs	78
7. Conclusions	79
References	79
6. Methods to Analyze MicroRNA-Mediated Control of mRNA Translation	83
Jennifer L. Clancy, Marco Nusch, David T. Humphreys, Belinda J. Westman, Traude H. Beilharz, and Thomas Preiss	
1. Introduction	84
2. Systems to Measure miR-Mediated Repression	85
3. Detection of miR-Mediated Changes in mRNA Stability	93
4. Measurement of miR Target mRNA Deadenylation	97
5. Measuring the Distribution of miRNP Components in Polysome Profiles	99
6. Localization of miRNP Components to P-Bodies	105
7. Concluding Remarks	108
Acknowledgments	108
References	108

7. Methods for Studying Signal-Dependent Regulation of Translation Factor Activity	113
Xuemin Wang and Christopher G. Proud	
1. Introduction to Signaling Pathways and the Control of Translation Factors	114
2. Experimental Protocols	126
3. Analysis of the Phosphorylation States of Translation Factors and Signaling Components—Overview	128
4. Assays for Specific Protein Kinases	132
5. Assays for Initiation Factor Function	135
References	138
8. Analysis of mRNA Translation in Cultured Hippocampal Neurons	143
Yi-Shuan Huang and Joel D. Richter	
1. Materials and Reagents for Primary Neuron Culture	144
2. RNA Transfection and Reporter Assays	149
3. shRNA Design and Lenti-shRNA Virus Production	153
4. shRNA Knockdown of CPEB3 in Cultured Neurons	157
5. Synaptoneurosome Isolation and ³⁵ S-met/cys Labeling	158
6. UV-Crosslinking, Immunoprecipitation of an RNA-Binding Protein, CPEB3	159
References	161
9. Detecting Ribosomal Association with the 5' Leader of mRNAs by Ribosome Density Mapping (RDM)	163
Naama Eldad and Yoav Arava	
1. Introduction	164
2. General Concept	164
3. Methods	168
Acknowledgments	174
References	174
10. Genome-Wide Analysis of mRNA Polysomal Profiles with Spotted DNA Microarrays	177
Daniel Melamed and Yoav Arava	
1. Introduction	178
2. Experimental Designs	179
3. Methods	189
4. Data Acquisition and Analysis	199
Acknowledgments	200
References	201

11. Synthesis of Anti-Reverse Cap Analogs (ARCAs) and their Applications in mRNA Translation and Stability	203
Ewa Grudzien-Nogalska, Janusz Stepinski, Jacek Jemielity, Joanna Zuberek, Ryszard Stolarski, Robert E. Rhoads, and Edward Darzynkiewicz	
1. Introduction	204
2. Chemical Synthesis	207
3. <i>In Vitro</i> and <i>In Vivo</i> Assays	213
4. Binding Affinity of ARCAs for eIF4E	214
5. Incorporation of ARCAs into RNA by <i>In Vitro</i> Transcription	214
6. Properties of ARCAs and ARCA-Capped mRNAs in Cell-Free Translation Systems	219
7. Properties of ARCA-Capped mRNAs in Mammalian Cells	221
Acknowledgments	225
References	225
12. Methods for Identifying Compounds that Specifically Target Translation	229
Letizia Brandi, Attilio Fabbretti, Pohl Milon, Marcello Carotti, Cynthia L. Pon, and Claudio O. Gualerzi	
1. Introduction	230
2. Materials Required	231
3. Methods and Tests	240
Acknowledgments	264
References	264
13. Identifying Small Molecule Inhibitors of Eukaryotic Translation Initiation	269
Regina Cencic, Francis Robert, and Jerry Pelletier	
1. Introduction	270
2. A Reverse Chemical Genetic Assay Probing eIF4E:eIF4G and eIF4A:eIF4G Interactions	275
3. A Forward Chemical Genetic Screen to Identify Inhibitors of Eukaryotic Translation	285
4. Characterization of Inhibitors of Translation Identified in Chemical Genetic Screens	291
5. Discussion and Concluding Remarks	296
Acknowledgments	297
References	297

14. Isolation and Identification of Eukaryotic Initiation Factor 4A as a Molecular Target for the Marine Natural Product Pateamine A	303
Woon-Kai Low, Yongjun Dang, Tilman Schneider-Poetsch, Zonggao Shi, Nam Song Choi, Robert M. Rzasa, Helene A. Shea, Shukun Li, Kaapjoo Park, Gil Ma, Daniel Romo, and Jun O. Liu	
1. Introduction	304
2. Total Synthesis of Pateamine A	307
3. Synthesis of Derivatives of Pateamine A and Structure Activity Relationship Studies	309
4. Structural Analysis of PatA Leading to DMDA-PatA and Viable Positions for Derivatization	313
5. Synthesis of a Bioactive Biotin-Pateamine A (B-PatA) Conjugate	313
6. Affinity Pull-Down of PatA-Binding Proteins	315
7. Identification of PatA-Binding Proteins	319
8. Concluding Remarks	321
Acknowledgments	321
References	322
<i>Author Index</i>	325
<i>Subject Index</i>	343
