

CONTENTS

<i>Contributors</i>	<i>xi</i>
<i>Preface</i>	<i>xvii</i>
<i>Volumes in Series</i>	<i>xix</i>
1. Phospholipase A₁ Assays Using a Radiolabeled Substrate and Mass Spectrometry	1
Rei Morikawa, Masafumi Tsujimoto, Hiroyuki Arai, and Junken Aoki	
1. Introduction	2
2. Types of PLA ₁	2
3. Conventional PLA ₁ Assay Using Radiolabeled Substrates	3
4. Novel PLA ₁ Assay Using ESI-MS	6
5. Perspective	11
Acknowledgments	11
References	11
2. Real-Time Cell Assays of Phospholipase A₂s Using Fluorogenic Phospholipids	15
Debasis Manna and Wonhwa Cho	
1. Introduction	16
2. Fluorogenic PLA ₂ Substrates	18
3. Measuring Cellular sPLA ₂ Activity Using PED6 and Red-PED6	23
4. Measuring Cellular cPLA _{2α} Activity Using DAPC	24
References	26
3. Analysis and Pharmacological Targeting of Phospholipase C β Interactions with G Proteins	29
David M. Lehmann, Chujun Yuan, and Alan V. Smrcka	
1. Introduction	30
2. Methods	31
3. Concluding Remarks	46
Acknowledgment	47
References	47

4. Biochemical Analysis of Phospholipase D	49
H. Alex Brown, Lee G. Henage, Anita M. Preininger, Yun Xiang, and John H. Exton	
1. Introduction	50
2. Assay of Recombinant PLD <i>In Vitro</i>	52
3. Regulated PLD ₁ Activity	59
4. Preparation of Activators of PLD ₁	60
5. Effects of Activators on PLD ₁ Activity	61
6. Synergy Between PLD ₁ Activators	62
7. Binding of PLD ₁ to Phospholipid Vesicles	63
8. Kinetic Parameters of PLD ₁ Catalytic Activity	65
9. Kinetic Analyses of Synergistic Responses	69
10. Phosphatidylinositol 4,5-Bisphosphate is an Essential PLD ₁ Activator	69
11. <i>In Vivo</i> PLD Assay Using Radioisotopes	74
12. <i>In Vivo</i> PLD Assay Using Deuterated 1-Butanol	74
13. Fluorescent <i>In Vitro</i> PLD Assay	77
14. Real-Time Diacylglycerol Lipase Assay	80
Acknowledgments	85
References	85
5. Measurement of Autotaxin/Lysophospholipase D Activity	89
Andrew J. Morris and Susan S. Smyth	
1. Introduction	90
2. Overview of Methods for Determination of Autotaxin/LysoPLD Activity	93
3. Expression of V5-Tagged Autotaxin/LysoPLD in HEK293 Cells	94
4. Measurement of Autotaxin/LysoPLD Activity Using Radiolabeled Substrates	95
5. Measurement of Autotaxin/LysoPLD Activity Using Fluorogenic Substrates	98
6. Concluding Comments	100
Acknowledgment	102
References	102
6. Platelet-Activating Factor	105
John S. Owen, Michael J. Thomas, and Robert L. Wykle	
1. Introduction	105
2. Procedure	107
Acknowledgments	115
References	115

7. Quantitative Measurement of Phosphatidylinositol 3,4,5-trisphosphate	117
Hervé Guillou, Len R. Stephens, and Phillip T. Hawkins	
1. Introduction	118
2. Measuring Levels of Radioactively Labeled Phosphoinositides in Isolated Cells	120
3. Measuring PtdIns(3,4,5)P ₃ by Protein-Lipid Overlay	122
4. Conclusions	126
Acknowledgments	128
References	128
8. Measuring Phosphorylated Akt and Other Phosphoinositide 3-kinase-Regulated Phosphoproteins in Primary Lymphocytes	131
Amber C. Donahue, Michael G. Kharas, and David A. Fruman	
1. Overview	132
2. Choosing a Downstream Readout: General Considerations	134
3. Protocols for Detection of PI3K-Regulated Phosphoproteins by Immunoblot	137
4. Protocols for Detection of Phosphoproteins by Flow Cytometry	142
5. Discussion	147
Acknowledgments	150
References	150
9. Regulation of Phosphatidylinositol 4-Phosphate 5-kinase Activity by Partner Proteins	155
Yasunori Kanaho, Kazuhisa Nakayama, Michael A. Frohman, and Takeaki Yokozeke	
1. Introduction	156
2. Protocols	158
Acknowledgments	166
References	166
10. Biochemical Analysis of Inositol Phosphate Kinases	171
James C. Otto, Sashidhar Mulugu, Peter C. Fridy, Shean-Tai Chiou, Blaine N. Armbruster, Anthony A. Ribeiro, and John D. York	
1. Introduction	172
2. Experimental Methods	174
3. Conclusions	182
Acknowledgments	183
References	183

11. Analysis of Phosphoinositides and Their Aqueous Metabolites	187
Christopher P. Berrie, Cristiano Iurisci, Enza Piccolo, Renzo Bagnati, and Daniela Corda	
1. Introduction	188
2. Cell Sample Extraction	191
3. Lipid Phase: TLC, HPLC Separation, and Desalting	197
4. Aqueous Phase: HPLC Separation, Desalting, and Ascintillant Extraction	203
5. Chemical Identification	212
6. ESI-MS/MS Identification	214
7. Standards	219
8. Final Considerations	226
Acknowledgments	227
References	227
12. Combination of C₁₇ Sphingoid Base Homologues and Mass Spectrometry Analysis as a New Approach to Study Sphingolipid Metabolism	233
Stefka Spassieva, Jacek Bielawski, Viviana Anelli, and Lina M. Obeid	
1. Introduction	234
2. Mass Spectrometry Analysis	235
3. Ceramide Synthase	236
4. <i>In Vitro</i> Ceramide Synthase Method	236
5. Sphingosine Kinase	237
6. <i>In Vitro</i> Sphingosine Kinase Method	238
7. In Cells Labeling with C ₁₇ Sphingoid Base	239
Acknowledgments	240
References	240
13. Measurement of Mammalian Sphingosine-1-Phosphate Phosphohydrolase Activity <i>In Vitro</i> and <i>In Vivo</i>	243
Michael Maceyka, Sheldon Milstien, and Sarah Spiegel	
1. Introduction	244
2. Principle	249
3. Measurement of SPP Activity in Cell Lysates	249
4. Measurement of SPP Activity in Live Cells	252
Acknowledgments	253
References	253
14. A Rapid and Sensitive Method to Measure Secretion of Sphingosine-1-Phosphate	257
Poulami Mitra, Shawn G. Payne, Sheldon Milstien, and Sarah Spiegel	
1. Introduction	258
2. Measurement of S1P	259

3. Conclusions and Perspectives	262
Acknowledgments	263
References	263
15. Ceramide Kinase and Ceramide-1-Phosphate	265
Dayanjan S. Wijesinghe, Nadia F. Lamour, Antonio Gomez-Munoz, and Charles E. Chalfant	
1. Introduction	266
2. Recombinant Expression and Kinetic Analysis of CERK	269
3. <i>In Vitro</i> Kinetic Analysis of CERK Activity Using Mixed Micellar Assays	272
4. Effective Delivery of C1P to Cells in Tissue Culture to Study Biological Effects	278
5. Analysis of Levels of Kinase-Derived C1P in Cells	281
6. Analysis of CERK Localization in Cells	284
7. Analysis of CERK Function by siRNA-Mediated Manipulation of CERK Expression	286
8. Analysis of CERK mRNA Levels by Q-PCR	288
Acknowledgments	289
References	290
16. Measurement of Mammalian Diacylglycerol Kinase Activity <i>In Vitro</i> and in Cells	293
Richard M. Epand and Matthew K. Topham	
1. Introduction	294
2. <i>In Vitro</i> Assay of DGK	295
3. Measuring DGK Activity in Subcellular Compartments	300
4. Measuring DGK Activity in Cultured Cells	301
5. Summary	303
References	303
17. Lipid Phosphate Phosphatases from <i>Saccharomyces cerevisiae</i>	305
George M. Carman and Wen-I Wu	
1. Introduction	306
2. Preparation of Radiolabeled Substrates	307
3. Assay Methods	307
4. Growth of Yeast	308
5. Purification Procedure	308
6. Properties of <i>DPP1</i> - and <i>LPP1</i> -Encoded Lipid Phosphate Phosphatases	311
Acknowledgment	313
References	313
<i>Author Index</i>	317
<i>Subject Index</i>	335
