<i>Volumes in Series</i>	<i>xvii</i>

1. Liquid Chromatography Mass Spectrometry for Quantifying Plasma Lysophospholipids: Potential Biomarkers for Cancer Diagnosis 1

Mandi Murph, Tamotsu Tanaka, Jihai Pang, Edward Felix, Shuying Liu, Rosanne Trost, Andrew K. Godwin, Robert Newman, and Gordon Mills

1. Introduction	2
2. Procedure	6
3. Liquid Chromatography/Mass Spectrometry/Mass Spectrometry	7
4. Discussion	9
5. Challenges to the Development of a Clinically Applicable Screening Assay	19
Acknowledgments	21
References	21

2. Measurement of Eicosanoids in Cancer Tissues 27

Dingzhi Wang and Raymond N. DuBois

1. Introduction	28
2. Quantitative Measurement of Eicosanoids	32
3. Preparation of Samples	33
4. Eicosanoids Extraction	35
5. Chromatographic Separation of Eicosanoids	36
6. Quantitative Analysis of Eicosanoids	39
Acknowledgments	45
References	45

3. Noninvasive Assessment of the Role of Cyclooxygenases in Cardiovascular Health: A Detailed HPLC/MS/MS Method 51

Wen-Liang Song, John A. Lawson, Miao Wang, Helen Zou, and Garret A. FitzGerald

1. Introduction	52
2. Background and History	53

3. Principles of Eicosanoid Analysis by Mass Spectrometry	54
4. Urinary Markers of Systemic Eicosanoid Synthesis	63
5. Data Analysis and Interpretation	69
6. Concluding Remarks	69
References	71
4. Lipidomics in Diabetes and the Metabolic Syndrome	73
Richard W. Gross and Xianlin Han	
1. Introduction	74
2. Brief Introduction of Multi-Dimensional MS-Based Shotgun Lipidomics	74
3. Profiling Human Plasma Triacylglycerol Molecular Species	77
4. Analysis of Human Heart Lipidome	82
5. High Mass Resolution-Based Shotgun Lipidomics for the Analysis of Cardiolipin Molecular Species	86
Acknowledgment	88
References	89
5. LC-MS-MS Analysis of Neutral Eicosanoids	91
Philip J. Kingsley and Lawrence J. Marnett	
1. Introduction	92
2. Purification of Analytes from Cell Culture Medium and Tissue	95
3. Quantitation	103
4. Linearity and Sensitivity	108
5. Postmortem Changes in Analytes	109
6. Summary	109
Acknowledgments	110
References	110
6. Quantification of F₂-Isoprostanes in Biological Fluids and Tissues as a Measure of Oxidant Stress	113
Ginger L. Milne, Huiyong Yin, Joshua D. Brooks, Stephanie Sanchez, L. Jackson Roberts, II, and Jason D. Morrow	
1. Introduction	114
2. Handling and Storage of Biological Fluids and Tissues for Quantification of F ₂ -IsoPs	115
3. Extraction and Hydrolysis of F ₂ -IsoP-Containing Phospholipids in Tissues and Biological Fluids	116
4. Purification, Derivatization, and Quantification of Free F ₂ -IsoPs	117
5. Application of the Assay to Quantify F ₂ -IsoPs in Biological Tissues and Fluids	119

6. Alternative Methods for Measuring F_2 -IsoPs	121
7. F_2 -Isoprostanes as an Index of Oxidant Stress <i>In Vivo</i>	122
8. Summary	123
Acknowledgments	124
References	124
7. Measurement of Products of Docosaehaenoic Acid Peroxidation, Neuroprostanes, and Neurofurans	127
Kyle O. Arneson and L. Jackson Roberts, II	
1. Introduction	128
2. Handling and Storage of Biological Fluids and Tissues for Quantification of F_4 -Neuroprostanes	132
3. Extraction and Hydrolysis of F_4 -Neuroprostane-Containing Phospholipids in Tissues and Biological Fluids	132
4. Purification, Derivatization, and Quantification of F_4 -Neuroprostanes	135
5. Summary	141
Acknowledgments	141
References	141
8. Enantiomeric Separation of Hydroxy and Hydroperoxy Eicosanoids by Chiral Column Chromatography	145
Claus Schneider, Zheyong Yu, William E. Boeglin, Yuxiang Zheng, and Alan R. Brash	
1. Introduction	146
2. Chiral Columns, Solvents, and Standards	147
3. Chiral Analyses	151
4. Application of Chiral Columns for Separation of Diastereomers	155
Acknowledgments	156
References	156
9. Targeted Chiral Lipidomics Analysis by Liquid Chromatography Electron Capture Atmospheric Pressure Chemical Ionization Mass Spectrometry (LC-ECAPCI/MS)	159
Seon Hwa Lee and Ian A. Blair	
1. Introduction	160
2. Electron-Capture Atmospheric-Pressure Chemical Ionization	161
3. Dissociative Electron Capture	162
4. Derivatization for LC-ECAPCI/MS	163
5. Procedure	164
6. Summary	171
Acknowledgments	172
References	172

10. Shotgun Lipidomics by Tandem Mass Spectrometry under Data-Dependent Acquisition Control	175
Dominik Schwudke, Gerhard Liebisch, Ronny Herzog, Gerd Schmitz, and Andrej Shevchenko	
1. Introduction	176
2. Procedure	177
3. Automated Interpretation of MS/MS Spectra Acquired in DDA Experiments	181
4. Boolean Scans: A Novel Scan Type Enabled by Postacquisition Data Processing	183
5. Comprehensive Characterization of Total Lipid Extracts by DDA-Driven Profiling	185
6. Selected Reaction Monitoring in Quantification of Cholesterol and Cholesteryl Esters	188
Acknowledgments	189
References	190
 11. Identification of Intact Lipid Peroxides by Ag⁺ Coordination Ion-Spray Mass Spectrometry (CIS-MS)	 193
Huiyong Yin and Ned A. Porter	
1. Introduction	194
2. Analysis of Lipid Oxidation Products	196
3. Ag ⁺ Coordination Ion-Spray MS	196
4. Identification of Lipid Oxidation Products of Cholesterol Esters by LC-Ag ⁺ CIS-MS	198
5. Identification of Intact Lipid Peroxides from Phospholipids by Ag ⁺ CIS-MS	204
6. Precautions of Applying Ag ⁺ CIS-MS to Study Lipids	207
7. Conclusions	208
Acknowledgments	209
References	209
 12. Quantification of Cardiolipin by Liquid Chromatography-Electrospray Ionization Mass Spectrometry	 213
Teresa A. Garrett, Reza Kordestani, and Christian R. H. Raetz	
1. Introduction	214
2. Complexity of Cardiolipin Structure	217
3. Analysis of Synthetic Cardiolipin Standards Using Liquid Chromatography-Mass Spectrometry	218

4. Liquid Chromatography-Mass Spectrometry of Cardiolipins in Total Lipid Extracts	221
5. Quantification of Cardiolipin	226
Acknowledgments	228
References	228
