1. Rab1b Silencing Using Small Interfering RNA for Analysis of Disease-Specific Function

1

Darren M. Hutt and William E. Balch

- | | |
|---|---|
| 1. Introduction | 2 |
| 2. Materials for siRNA Silencing of Rab1b | 4 |
| 3. Procedure for Transfection of siRNA | 4 |
| 4. Titration of Optimal siRNA Concentration | 5 |
| 5. SDS-PAGE Analysis of Rab1 Knockdown | 6 |
| 6. SDS-PAGE Analysis of CFTR | 6 |
| 7. Discussion | 8 |
| References | 9 |

2. Rab8-Optineurin-Myosin VI: Analysis of Interactions and Functions in the Secretory Pathway

11

Margarita V. Chibalina, Rhys C. Roberts, Susan D. Arden,
John Kendrick-Jones, and Folma Buss

- | | |
|---|----|
| 1. Introduction | 12 |
| 2. Identification of Myosin VI-Binding Partners | 13 |
| 3. Verification of Yeast Two-Hybrid Screen Results | 13 |
| 4. Mammalian Two-Hybrid Assay | 14 |
| 5. Protocol for Mammalian Two-Hybrid Assay | 17 |
| 6. SEAP Secretion Assay | 18 |
| 7. Measurement of SEAP Secretion in Fibroblasts from Myosin VI Knockout Mouse | 19 |
| 8. Measurement of SEAP Secretion in siRNA Knockdown Cells | 20 |
| 9. Protocol for SEAP Assay | 21 |
| Acknowledgments | 22 |
| References | 22 |

3. Characterization of Rab27a and JFC1 as Constituents of the Secretory Machinery of Prostate-Specific Antigen in Prostate Carcinoma Cells	25
Sergio D. Catz	
1. Introduction	26
2. Methods	27
3. Concluding Remarks	38
Acknowledgments	39
References	39
4. <i>In Vitro</i> Assays to Characterize Inhibitors of the Activation of Small G Proteins by Their Guanine Nucleotide Exchange Factors	41
Jean-Christophe Zeeh, Bruno Antonny, Jacqueline Cherfils, and Mahel Zeghouf	
1. GEFs and Diseases: Inhibiting the Exchange Reaction by Small Molecules	42
2. Initial Screen of Inhibitors of SMG Activation	44
3. Determination of Inhibition Profile by Using Michaelis-Menten Formalism	49
4. Complementary Assays to Refine Noncompetitive and Uncompetitive Mechanisms	50
5. Conclusion	53
Acknowledgments	54
References	54
5. Analysis of Small GTPase Function in Trypanosomes	57
Mark C. Field, David Horn, and Mark Carrington	
1. Overview	57
2. Culturing	59
3. Transfection and Cloning of <i>T. brucei</i>	60
4. Vector Systems for Overexpression and RNA Interference	64
5. Cloning and Manipulation of Trypanosome Small GTPase Sequences	69
6. Trafficking Assays to Monitor Exocytosis and Endocytosis	71
Acknowledgments	73
References	73
6. Use of Dynasore, the Small Molecule Inhibitor of Dynamin, in the Regulation of Endocytosis	77
Tom Kirchhausen, Eric Macia, and Henry E. Pelish	
1. Introduction	78
2. Dynamin	78

3. Dynamin and the Actin Cytoskeleton	80
4. The "Chemical Genetics" Discovery Approach	81
5. Why Do We Need Interfering Small Molecules?	82
6. Synthesis of Dynasore	83
7. Storage Conditions for Dynasore	85
8. Expression, Purification, and Storage of Dynamin	85
9. Buffers and Reagents	87
Acknowledgments	90
References	91
7. Identification and Verification of Sro7p as an Effector of the Sec4p Rab GTPase	95
Bianka L. Grosshans and Peter Novick	
1. Introduction	96
2. Experimental Approach to the Identification of Sec4p Effectors	97
3. Purification of GST-Sec4, GST-Ypt1, and GST, and Nucleotide Exchange	98
4. Preparation of the Yeast Extract for Sec4p Affinity Chromatography	99
5. Sec4p Affinity Chromatography	100
6. Confirmation of Sro7p as a Sec4p Effector	102
7. Co-Immunoprecipitation of Sro7p with Sec4p	105
References	107
8. Characterization of Rab18, a Lipid Droplet-Associated Small GTPase	109
Sally Martin and Robert G. Parton	
1. Introduction	110
2. Cell Systems	111
3. Generation of Rab18 Constructs and Point Mutations	114
4. Expression of Heterologous Proteins in 3T3-L1 Adipocytes	116
5. Biochemical Isolation of LDs	118
6. Fluorescence Microscopy	119
7. Electron Microscopy	122
8. Summary	126
Acknowledgments	127
References	127
9. Analysis on the Emerging Role of Rab3 GTPase-Activating Protein in Warburg Micro and Martsolf Syndrome	131
Ayuko Sakane, Jun Miyoshi, Yoshimi Takai, and Takuya Sasaki	
1. Introduction	132
2. Materials	133

3. Methods	134
4. Comments	138
References	138
10. Identification and Characterization of JRAB/MICAL-L2, a Junctional Rab13-Binding Protein	141
Noriyuki Nishimura and Takuya Sasaki	
1. Introduction	142
2. Materials	143
3. Methods	146
4. Comments	151
References	151
11. A SMAP Gene Family Encoding ARF GTPase-Activating Proteins and Its Implication in Membrane Trafficking	155
Kenji Tanabe, Shunsuke Kon, Nobuyuki Ichijo, Tomo Funaki, Waka Natsume, Toshio Watanabe, and Masanobu Satake	
1. Introduction	156
2. Experimental Procedures and Results	160
References	169
12. <i>In Vitro</i> and <i>In Vivo</i> Analysis of Neurotrophin-3 Activation of Arf6 and Rac-1	171
Pedro F. Esteban, Paola Caprari, Hye-Young Yoon, Paul A. Randazzo, and Lino Tessarollo	
1. Introduction	171
2. Methods	177
3. Cell Culture and Transfection	178
4. Determination of Actin-Rich Protrusion Formation	178
Acknowledgment	181
References	181
13. Methods for Analysis of rab27a/munc13-4 in Secretory Lysosome Release in Hematopoietic Cells	185
Peter van der Sluijs, Maaïke Neeft, Thijs van Vlijmen, Edo Elstak, and Marnix Wierff	
1. Introduction	186
2. Affinity Purification of rab27a Effector Proteins	187
3. Direct Binding Assay with Recombinant Proteins	191

4. Generation of an Antibody Against Munc13-4	193
5. Degranulation Assay in RBL-2H3 Cells	196
6. Limited Proteolysis of ³⁵ S-Labeled munc13-4	198
Acknowledgments	199
References	200
14. Analysis and Expression of Rab38 in Oculocutaneous Lung Disease	203
Kazuhiro Osanai and Dennis R. Voelker	
1. Introduction	204
2. Morphological Examination of Mouse Lungs	205
3. Characterization of Recombinant Rab38 ^{cht} -Protein	209
4. Discussion	213
5. Conclusion	214
Acknowledgments	214
References	215
15. Analysis of Rab1 Function in Cardiomyocyte Growth	217
Catalin M. Filipeanu, Fuguo Zhou, and Guangyu Wu	
1. Introduction	218
2. Generation of Adenoviruses Expressing Rab1 GTPase	219
3. Analysis of Adenovirus-Driven Rab1 Expression in Cardiomyocytes	220
4. Effect of Rab1 Infection on the Total Protein Synthesis in Neonatal Cardiomyocytes	223
5. Effect of Rab1 Infection on the Cell Size and Sarcomeric Organization of Cardiomyocytes	223
6. Cardiac Phenotypes of Transgenic Mice Overexpressing Rab1a in the Myocardium	224
Acknowledgment	225
References	225
16. Regulation of the Trafficking and Function of G Protein-Coupled Receptors by Rab1 GTPase in Cardiomyocytes	227
Guangyu Wu	
1. Introduction	228
2. Materials	229
3. Effects	232
4. Experimental Results and Concluding Remarks	234
Acknowledgments	236
References	237

17. Regulation of Endosome Dynamics by Rab5 and Huntingtin-HAP40 Effector Complex in Physiological versus Pathological Conditions	239
Arun Pal, Fedor Severin, Sebastian Höpfner, and Marino Zerial	
1. Introduction	240
2. Assays for Functional Characterization of Rab5, Htt, and HAP40	243
3. Spin-Down Binding Assays	244
4. <i>In Vitro</i> Motility assays	251
Acknowledgments	255
References	255
18. Biochemical and Biophysical Analyses of Ras Modification by Ubiquitin	259
Sonia Terrillon and Dafna Bar-Sagi	
1. Introduction	260
2. RAS Ubiquitination Monitored by Immunoprecipitation	261
3. RAS Ubiquitination Monitored by Ni-NTA Affinity Chromatography	267
4. RAS Ubiquitination Monitored by BRET in Living Cells	268
5. Concluding Remarks	274
Acknowledgments	275
References	275
19. Biochemical Characterization of Novel Germline BRAF and MEK Mutations in Cardio-Facio-Cutaneous Syndrome	277
Pablo Rodriguez-Viciana and Katherine A. Rauen	
1. Introduction	278
2. Methods	279
3. Results and Discussion	282
Acknowledgments	287
References	287
20. Biochemical and Biological Characterization of Tumor-Associated Mutations of p110α	291
Adam Denley, Marco Gymnopoulos, Jonathan R. Hart Hao Jiang, Li Zhao, and Peter K. Vogt	
1. Canonical Pathway	292
2. Cancer Link	293
3. Cancer-Specific Hot-Spot and Rare Mutations in p110 α	293
4. Oncogenicity of Nonalpha Isoforms	297

5. Functional Importance of PIP ₃	298
6. Involvement of Ras in PI3K Signaling	299
7. Oncogenicity of Rheb	300
8. Conclusion	301
Acknowledgments	301
References	302
21. Characterization of the Rheb-mTOR Signaling Pathway in Mammalian Cells: Constitutive Active Mutants of Rheb and mTOR	307
Tatsuhiro Sato, Akiko Umetsu, and Fuyuhiko Tamanoi	
1. Introduction	308
2. Methods	310
3. Conclusion	317
References	318
22. Characterization of RalB-Sec5-TBK1 Function in Human Oncogenesis	321
Yuchen Chien and Michael A. White	
1. Introduction	322
2. Methods	323
3. Conclusions	328
Acknowledgments	328
References	329
23. High-Throughput Lung Cancer Cell Line Screening for Genotype-Correlated Sensitivity to an EGFR Kinase Inhibitor	331
Ultan McDermott, Sreenath V. Sharma, and Jeffrey Settleman	
1. Introduction	332
2. Methods	333
3. Conclusions	340
References	340
24. <i>In Vitro</i> Signaling by MAPK and NFκB Pathways Inhibited by <i>Yersinia</i> YopJ	343
Sohini Mukherjee and Kim Orth	
1. Introduction	343
2. The <i>In Vitro</i> Signaling Assay	345
3. Materials and Methods	346
4. Conclusion	352
Acknowledgments	353
References	353

25. Biological and Biochemical Characterization of Anthrax Lethal Factor, a Proteolytic Inhibitor of MEK Signaling Pathways	355
Jennifer L. Bromberg-White and Nicholas S. Duesbery	
1. Introduction	356
2. Materials and Methods	357
3. Concluding Remarks	363
Acknowledgments	363
References	364
26. Genetic Analyses of the Role of RCE1 in RAS Membrane Association and Transformation	367
Martin O. Bergo, Annika M. Wahlstrom, Loren G. Fong, and Stephen G. Young	
1. Introduction	368
2. Establishing that Human <i>Rce1</i> Is a CAAX Endoprotease	370
3. <i>Rce1</i> Knockout Mice	371
4. Analyzing RAS Function in <i>Rce1</i> ^{-/-} MEFs	371
5. Absence of CAAX Endoprotease Activity in <i>Rce1</i> -Deficient Cells	371
6. Documenting an Accumulation of Uncleaved <i>Rce1</i> Substrates in <i>Rce1</i> -Deficient Cells	372
7. Altered Electrophoretic Migration of RAS Proteins in <i>Rce1</i> ^{-/-} Fibroblasts	374
8. Methylation of RAS Proteins in <i>Rce1</i> ^{-/-} Fibroblasts	374
9. Subcellular Fractionation and Localization of RAS Proteins in <i>Rce1</i> ^{-/-} MEFs	376
10. Defining the Impact of <i>Rce1</i> Deficiency on MAP Kinase Activation in <i>Rce1</i> ^{-/-} Fibroblasts	377
11. Impact of Endoproteolysis on the Binding of K-RAS to Microtubules	378
12. Defining the Impact of <i>Rce1</i> Deficiency on Cell Growth and on Transformation by Activated Forms of RAS	378
13. Effects of an <i>Rce1</i> Excision on the Growth of RAS-Transfected Cells in Soft Agar and in Nude Mice	379
14. Analyzing the Functional Importance of <i>Rce1</i> in the Liver and Heart	381
15. Minimal Effects of <i>Rce1</i> Deficiency on the Hematopoietic System in Mice	384
16. <i>Rce1</i> Deficiency Accelerates the Development of a K-RAS-Induced Myeloproliferative Disease	385
References	387

27. Characterization of Kras-Mediated Pancreatic Tumorigenesis in Zebrafish	391
Jon M. Davison, Seung Woo Park, Jerry M. Rhee, and Steven D. Leach	
1. Introduction	392
2. Targeted Expression of eGFP and eGFP-Kras ^{G12V} in the Developing and Adult Zebrafish Exocrine Pancreas	394
3. Generation of Transgenic Zebrafish with Recombinant BAC DNA Constructs	396
4. Analysis of the Effects of eGFP-Kras ^{G12V} on Cellular Differentiation in the Zebrafish Embryonic Pancreas	397
5. Identification of Tumors Expressing eGFP-Kras ^{G12V}	406
6. Histologic Evaluation of Solid Tumors	408
7. Brief Remarks on the Diagnosis of Malignant Pancreatic Tumors in Zebrafish	410
8. Characterization of Protein Expression and RNA Expression in Zebrafish Tumors by Immunolabeling and <i>In Situ</i> Hybridization	411
References	414
28. Genetic Modeling of Ras-Induced Human Rhabdomyosarcoma	419
Corinne M. Linardic and Christopher M. Counter	
1. Introduction	420
2. Materials and <i>Methods</i>	421
3. Concluding Remarks	425
References	426
<i>Author Index</i>	429
<i>Subject Index</i>	455
