

CONTENTS

<i>Contributors</i>	<i>xiii</i>
<i>Preface</i>	<i>xix</i>
<i>Volumes in Series</i>	<i>xxi</i>
1. Transient Kinetics, Fluorescence, and FRET in Studies of Initiation of Translation in Bacteria	1
Pohl Milon, Andrey L. Konevega, Frank Peske, Attilio Fabbretti, Claudio O. Gualerzi, and Marina V. Rodnina	
1. Introduction	2
2. Experimental Outline	5
3. Materials	9
4. Experimental Procedures	10
5. Rapid Kinetic Measurements	20
6. Quench-Flow Measurements	21
7. GTPase Activity	22
8. Dipeptide Formation	22
9. Applications of the Method	23
10. Binding of fMet-tRNA to the 30S Subunit	23
11. FRET to IF ₃	23
12. Nucleotide Binding to IF ₂	25
13. Subunit Joining	25
Acknowledgments	26
References	26
2. Binding of mRNA to the Bacterial Translation Initiation Complex	31
Sean M. Studer and Simpson Joseph	
1. Introduction	32
2. Experimental Procedures	33
Acknowledgments	43
References	43

3. Real-Time Dynamics of Ribosome-Ligand Interaction by Time-Resolved Chemical Probing Methods	45
Attilio Fabbretti, Pohl Milon, Anna Maria Giuliadori, Claudio O. Gualerzi, and Cynthia L. Pon	
1. Introduction	46
2. General Strategy	46
3. Time-Resolved Chemical Probing with DMS	48
4. Time-Resolved Probing with ONOOK	51
5. Time-Resolved Chemical Probing with Fe(II)-EDTA	54
Acknowledgments	58
References	58
4. Overexpression and Purification of Mammalian Mitochondrial Translational Initiation Factor 2 and Initiation Factor 3	59
Domenick G. Grasso, Brooke E. Christian, Angela Spencer, and Linda L. Spremulli	
1. Introduction	60
2. Materials	61
3. Assays for IF ₂ _{MT} and IF ₃ _{MT}	63
4. Purification of His-Tagged IF ₂ _{MT}	65
5. Purification of His-Tagged IF ₃ _{MT}	72
References	77
5. In Vitro Studies of Archaeal Translational Initiation	79
Dario Benelli and Paola Londei	
1. Introduction	80
2. Preparation of <i>S. solfataricus</i> Cellular Extracts, Ribosomes, and Other Cellular Fractions	82
3. In Vitro Translation of Archaeal mRNAs at High Temperature	86
4. Ribosome/mRNA Interaction	90
5. Initiation Factors	93
6. Functional Analyses of Recombinant <i>S. solfataricus</i> IFS	96
7. Interaction of Initiation Factors with Ribosomal Subunits	99
8. IF/tRNA ^{Met} Interaction	103
9. Interaction of [³⁵ S]Met-tRNA ^{Met} with Ribosomes	105
10. Translational G-Proteins	106
Acknowledgments	107
References	107

6. Reconstitution of Yeast Translation Initiation	111
Michael G. Acker, Sarah E. Kolitz, Sarah F. Mitchell, Jagpreet S. Nanda, and Jon Lorsch	
1. Introduction	112
2. Large-Scale Lysis of <i>S. cerevisiae</i> Cells	114
3. Purification of 40S and 60S Ribosomal Subunits from <i>S. cerevisiae</i>	115
4. Ribosome Quality Analysis (Identity Gel)	118
5. Purification of His-Tagged eIF2 from <i>S. cerevisiae</i>	120
6. Purification of His-Tagged eIF3 from <i>S. cerevisiae</i>	122
7. Overexpression and Purification of Yeast eIF1, eIF1A, and eIF5 from <i>E. coli</i>	124
8. Overexpression and Purification of Yeast eIF1A in <i>E. coli</i>	125
9. Overexpression and Purification of Yeast eIF5B in <i>E. coli</i>	127
10. Purification of Yeast Methionyl-tRNA Synthetase (YMETRS) from <i>S. cerevisiae</i>	128
11. RNA Synthesis and Purification	129
12. Charging tRNA _{Met} with Methionine	131
13. Filter Binding Assay to Monitor Ternary Complex Formation	134
14. Benchtop eIF2 GTPase Assay	135
15. 43S/80S Complex Gel Shift Assay	137
16. Solutions	142
Acknowledgments	143
References	144
7. Assembly and Analysis of Eukaryotic Translation Initiation Complexes	147
Andrey V. Pisarev, Anett Unbehaun, Christopher U. T. Hellen, and Tatyana V. Pestova	
1. Introduction	148
2. Chemicals, Enzymes, and Biological Materials	149
3. Purification of 40S and 60S Ribosomal Subunits	151
4. Purification of Native eIF3 and eIF4F	152
5. Purification of Native eIF2, eIF5, and eIF5B	156
6. Expression in <i>E. coli</i> and Purification of Recombinant eIF1, eIF1A, eIF4A, eIF4B, eIF4G, eIF5, and eIF5B	157
7. Preparation and Aminoacylation of Initiator tRNA	159
8. Assembly of 48S and 80S Initiation Complexes on β -Globin mRNA	162
9. Resolution of Translation Initiation Complexes by Sucrose Density Gradient Centrifugation	163
10. Toe Printing Analysis of Ribosomal Complexes	164
11. Site-Directed UV Cross-Linking of mRNA in Initiation Complexes	166

12. Directed Hydroxyl Radical Probing to Localize Initiation Factors on the 40S Subunit	171
Acknowledgments	174
References	175
8. Reconstitution of Mammalian 48S Ribosomal Translation Initiation Complex	179
Romit Majumdar, Jayanta Chaudhuri, and Umadas Maitra	
1. Introduction	180
2. Reagents	182
3. Buffers	182
4. General Methods	184
5. Reconstitution of the 48S Ribosomal Complex	203
6. Remarks	206
Acknowledgments	207
References	207
9. Biophysical Approach to Studies of Cap-eIF4E Interaction by Synthetic Cap Analogs	209
Anna Niedzwiecka, Janusz Stepinski, Jan M. Antosiewicz, Edward Darzynkiewicz, and Ryszard Stolarski	
1. Introduction	210
2. Syntheses and Purification of Cap Analogs	212
3. Binding of the Cap Analogs to eIF4E by Fluorescence Titration Experiments	218
4. Application of Microcalorimetry to Studying eIF4E-Cap Interaction	232
5. Stopped-Flow Fluorescence Studies of Binding Cap Analogs to eIF4E	235
Acknowledgments	242
References	242
10. Biophysical Studies of the Translation Initiation Pathway with Immobilized mRNA Analogs	247
John E. G. McCarthy, Steven Marsden, and Tobias von der Haar	
1. Introduction	248
2. Generation of RNAs	248
3. Protocol 1: 3'-End Biotinylation of a Transcript by Use of Poly(A) Polymerase	260
4. Protocol 2: Introduction of Aldehyde Groups by Oxidation of the mRNA 3'-End	261

5. Protocol 3: Thiolation at the mRNA 5'-End by Use of Polynucleotide Kinase	262
Acknowledgments	263
References	263
11. Protection-Based Assays to Measure Aminoacyl-tRNA Binding to Translation Initiation Factors	265
Yves Mechulam, Laurent Guillon, Laure Yatime, Sylvain Blanquet, and Emmanuelle Schmitt	
1. Introduction	266
2. Purification of Overproduced Initiator tRNA	267
3. Preparation of Methionylated tRNA	270
4. Protection Assay	273
5. Conclusion	279
Acknowledgments	279
References	279
12. NMR Methods for Studying Protein-Protein Interactions Involved in Translation Initiation	283
Assen Marintchev, Dominique Frueh, and Gerhard Wagner	
1. Introduction	284
2. Types of Interactions in Translation from the Perspective of K_D and Lifetime of the Complex	285
3. NMR Methods for Studying Protein Interactions in Translation	289
4. Descriptions of NMR Methods	310
5. Special Cases	319
6. Summary	321
Acknowledgments	325
References	325
13. Structural Methods for Studying IRES Function	333
Jeffrey S. Kieft, David A. Costantino, Megan E. Filbin, John Hammond, and Jennifer S. Pfingsten	
1. Introduction	334
2. Methods	337
3. Conclusions	367
References	368

14. Biophysical and Biochemical Investigations of dsRNA-Activated Kinase PKR	373
Sean A. McKenna, Darrin A. Lindhout, Takashi Shimoike, and Joseph D. Puglisi	
1. Introduction	374
2. Expression and Purification of PKR	376
3. RNA Synthesis	379
4. Phosphorylation Assays	380
5. Measuring RNA-Protein Stabilities	383
6. Monitoring the Association State of PKR	386
7. NMR Spectroscopy	388
8. <i>In Vitro</i> Translation Assays	392
9. Conclusions	393
References	394
15. Expression and Purification of Recombinant Wheat Translation Initiation Factors eIF1, eIF1A, eIF4A, eIF4B, eIF4F, eIF(ISO)4F, and eIF5	397
Laura K. Mayberry, Michael D. Dennis, M. Leah Allen, Kelley Ruud Nitka, Patricia A. Murphy, Lara Campbell, and Karen S. Browning	
1. Introduction	398
2. Materials	399
3. Procedures	399
4. Results	406
5. Conclusions	407
Acknowledgments	408
References	408
16. <i>In Vitro</i> Reconstitution and Biochemical Characterization of Translation Initiation by Internal Ribosomal Entry	409
Victoria G. Kolupaeva, Sylvain de Breyne, Tatyana V. Pestova, and Christopher U. T. Hellen	
1. Introduction	410
2. Chemicals, Enzymes, and Biological Materials	411
3. Plasmids	413
4. Purification of Factors and Ribosomes	414
5. Preparation of IRES-Containing mRNA and Aminoacylated Initiator tRNA	415
6. Strategies for Identification of Viral IRESs	416
7. Assays for 48S Complex Formation in Cell-Free Extracts: Sucrose Density Gradient Centrifugation	417

8. Assays for 48S Complex Formation in Cell-Free Extracts: Toe Printing	418
9. Identification of the Minimum Set of Factors Required for 48S Complex Formation	421
10. Reconstitution of 48S Complex Formation on Type 2 Picornavirus IRESs	423
11. Toe Printing to Map Stable Interactions of the IRES with Components of the Translation Apparatus	424
12. Mapping Interactions of the IRES with Components of the Translation Apparatus by Chemical and Enzymatic Footprinting	427
13. Directed Hydroxyl Radical Cleavage	432
Acknowledgments	436
References	436
