<i>Contributors</i>	<i>xiii</i>
<i>Preface</i>	<i>xxi</i>
<i>Volumes in Series</i>	<i>xxiii</i>

Section I. Hypoxia-Inducible Factor 1

1. Hypoxia-Inducible Factors P^{ER}/ARNT/S^{IM} Domains: Structure and Function 3

Thomas H. Scheuermann, Jinsong Yang, Lei Zhang, Kevin H. Gardner, and Richard K. Bruick

1. Introduction	4
2. Delineation of the HIF PAS Domains	5
3. Expression and Characterization of HIF PAS Domains	7
4. Assessing PAS Domain Protein–Protein Interactions	11
5. Discussion	18
Acknowledgments	20
References	21

2. Hypoxia-Inducible Factor Prolyl-Hydroxylase: Purification and Assays of PHD2 25

Kirsty S. Hewitson, Christopher J. Schofield, and Peter J. Ratcliffe

1. Introduction	26
2. Preparation of Purified PHD2 from a Bacterial Source	28
3. Assaying of PHD2 Activity	29
4. Indirect Measurements of PHD2 Activity	29
5. Direct Measurements of PHD2 Hydroxylation Activity	35
6. Binding Assays	37
7. Comparison of Assay Formats	38
References	39

3. Determination and Modulation of Prolyl-4-Hydroxylase Domain Oxygen Sensor Activity	43
Renato Wirthner, Kuppusamy Balamurugan, Daniel P. Stiehl, Sandra Barth, Patrick Spielmann, Felix Oehme, Ingo Flamme, Dörthe M. Katschinski, Roland H. Wenger, and Gieri Camenisch	
1. Introduction	44
2. Production of Functionally Active PHDs	48
3. Determination of PHD by VHL Binding to Peptides Derived from the HIF-1 α ODD Domain	48
4. Determination of Prolyl-4-Hydroxylation by Oxidative Decarboxylation of 2-Oxoglutarate	51
5. Crude Tissue Extracts are not a Suitable Source of PHD Activity for the 2-Oxoglutarate Conversion Assay	53
6. Thin Layer Chromatography to Assess the Purity of [5- 14 C]2-Oxoglutarate	53
7. Application of the 2-Oxoglutarate Conversion Assay to Protein Targets	55
8. Conclusions	55
Acknowledgments	57
References	57
4. Characterization of Ankyrin Repeat-Containing Proteins as Substrates of the Asparaginyl Hydroxylase Factor Inhibiting Hypoxia-Inducible Transcription Factor	61
Sarah Linke, Rachel J. Hampton-Smith, and Daniel J. Peet	
1. Introduction	62
2. Experimental Techniques	65
3. Discussion/Conclusion	82
Acknowledgments	83
References	83
5. Transgenic Models to Understand Hypoxia-Inducible Factor Function	87
Andrew Doedens and Randall S. Johnson	
1. Introduction	88
2. Hypoxia Response Pathway Genes and Development	90
3. HIF in Physiology	93
4. HIF Function in Tumor Biology	98
5. Summary	100
References	101

6. The Silencing Approach of the Hypoxia-Signaling Pathway	107
Eduarne Berra and Jacques Pouyssegur	
1. A Brief History of RNAi	108
2. The Hypoxia-Signaling Pathway	109
3. HIF- α Stability	110
4. HIF Activity	114
5. HIF-1/HIF-2 Target Gene Specificity	116
6. RNAi as a New Potential Therapeutic Strategy	116
Acknowledgments	118
References	118
7. Cellular and Developmental Adaptations to Hypoxia: A <i>Drosophila</i> Perspective	123
Nuria Magdalena Romero, Andrés Dekanty, and Pablo Wappner	
1. Introduction	124
2. <i>Drosophila melanogaster</i> as a Model System to Study Physiological Responses to Hypoxia	124
3. Experimental Advantages of the Model System	125
4. The <i>Drosophila</i> Respiratory System	126
5. Occurrence of a <i>Drosophila</i> System Homologous to Mammalian HIF	128
6. Regulation of Sima by Oxygen Levels	131
7. Role of Sima and Fatiga in <i>Drosophila</i> Development	132
8. Hypoxia-Inducible Genes and the Adaptation of <i>Drosophila</i> to Oxygen Starvation	134
9. Regulation of Sima by the PI3K and TOR Pathways	134
10. Role of the HIF System in Growth Control and Cell Size Determination	136
11. Concluding Remarks	138
Acknowledgments	139
References	139
Section II. Erythropoietin	145
8. Constitutively Overexpressed Erythropoietin Reduces Infarct Size in a Mouse Model of Permanent Coronary Artery Ligation	147
Giovanni G. Camici, Thomas Stallmach, Matthias Hermann, Rutger Hassink, Peter Doevendans, Beat Grenacher, Alain Hirschy, Johannes Vogel, Thomas F. Lüscher, Frank Ruschitzka, and Max Gassmann	
1. Introduction	148
2. Material and Methods	149
3. Results	151
4. Discussion	153

Acknowledgments	154
References	154
9. Use of Gene-Manipulated Mice in the Study of Erythropoietin Gene Expression	157
Norio Suzuki, Naoshi Obara, and Masayuki Yamamoto	
1. Introduction	158
2. Materials	161
3. Methods and Results	163
4. Conclusion	173
Acknowledgments	173
References	174
10. Control of Erythropoietin Gene Expression and its Use in Medicine	179
Wolfgang Jelkmann	
1. Introduction	180
2. Native EPO Gene Expression and its Pharmacologic Stimulation	180
3. EPO Gene Transfer	184
4. Recombinant EPOS	187
5. Conclusions	190
References	191
11. Role of Hypoxia-Inducible Factor-2α in Endothelial Development and Hematopoiesis	199
Osamu Ohneda, Masumi Nagano, and Yoshiaki Fujii-Kuriyama	
1. Introduction	200
2. Vasculogenesis/Angiogenesis and HIFs	200
3. HIF-1 β /ARNT Null Mice	204
4. Neovascularization and HIFs	205
5. Hematopoiesis and HIFs	211
6. Conclusion	214
References	214
Section III. Hypoxia and Adaptation	219
12. Organ Protection by Hypoxia and Hypoxia-Inducible Factors	221
Wanja M. Bernhardt, Christina Warnecke, Carsten Willam, Tetsuhiro Tanaka, Michael S. Wiesener, and Kai-Uwe Eckardt	
1. Introduction	222
2. From Ischemic to Hypoxic Preconditioning	222

3. Hypoxia-Inducible Transcription Factors	223
4. Strategies to Activate HIF and HIF Target Genes	227
5. Hypoxic Preconditioning and HIF	231
6. HIF in Chronic Hypoxic/Ischemic Diseases	236
7. Conclusions and Perspectives	237
References	238
13. Hypoxia and Regulation of Messenger RNA Translation	247
Marianne Koritzinsky and Bradly G. Wouters	
1. Introduction	248
2. Changes in Global mRNA Translation During Hypoxia	249
3. Molecular Mechanisms that Regulate mRNA Translation During Hypoxia	251
4. Methods Employed to Study mRNA Translation During Hypoxia	256
5. Protocols	268
References	271
14. Hypoxia and the Unfolded Protein Response	275
Constantinos Koumenis, Meixia Bi, Jiangbin Ye, Douglas Feldman, and Albert C. Koong	
1. Introduction	276
2. Methods Employed in Detecting Hypoxic Induction of ER Stress	282
Acknowledgments	289
References	290
Section IV. Hypoxia and Tumor Biology	295
15. Tumor Hypoxia in Cancer Therapy	297
J. Martin Brown	
1. Hypoxia in Human Tumors	298
2. The Dynamic Nature of Hypoxia in Tumors	300
3. Consequences of Tumor Hypoxia for Cancer Treatment	300
4. Size of the Oxygen Effect with Radiation	302
5. The Influence of Tumor Hypoxia on Cancer Treatment by Radiotherapy	303
6. Influence of Tumor Hypoxia on Response to Chemotherapy	307
7. Exploiting Hypoxia in Cancer Treatment	308
References	315
16. HIF Gene Expression in Cancer Therapy	323
Denise A. Chan, Adam J. Krieg, Sandra Turcotte, and Amato J. Giaccia	
1. Introduction	324
2. Experimental Procedures	326

3. Conclusions	337
Acknowledgments	337
References	338
17. Analysis of Hypoxia-Inducible Factor-1α Expression and its Effects on Invasion and Metastasis	347
Balaji Krishnamachary and Gregg L. Semenza	
1. Introduction	347
2. Protocol 1: HIF-1 α Immunohistochemistry	349
3. Protocol 2: Invasion Assay	350
4. Protocol 3: Transepithelial Resistance Measurement of Cell-Cell Adhesion	351
5. Protocol 4: Analysis of mRNA Expression by qRT-PCR	351
References	352
18. Macrophage Migration Inhibitory Factor Manipulation and Evaluation in Tumoral Hypoxic Adaptation	355
Millicent Winner, Lin Leng, Wayne Zundel, and Robert A. Mitchell	
1. Introduction	356
2. Modulation of MIF Levels by Targeted shRNAs and Assessment of Knockdown Efficiency	357
3. Analysis of MIF-Dependent CSN5 and COP9 Signalosome Function	362
4. Determination of Tumor-Associated MIF Expression and MIF Polymorphic Disparity	364
5. Conclusions	367
References	367
19. The Von Hippel-Lindau Tumor Suppressor Protein: An Update	371
William G. Kaelin, Jr.	
1. Introduction	372
2. Regulation of Epithelial Differentiation by pVHL	373
3. Crosstalk Between c-Met and VHL	374
4. Regulation of Neuronal Apoptosis by pVHL	375
5. Possible Links Between p53 and pVHL	376
6. Regulation of pVHL by Phosphorylation	376
7. Polyubiquitylation of pVHL	377
8. Mouse Models for Studying pVHL Function	377
References	378

20. Hypoxia-Inducible Factor 1 Inhibitors	385
Giovanni Melillo	
1. Introduction	386
2. Cell-Based High Throughput Screens	387
3. Cell-Free Assays	393
4. Bioassay-Directed Isolation of Natural Product HIF-1 Inhibitors	398
5. Conclusions	399
Acknowledgments	399
References	400
 Section V. Hypoxia and Inflammatory Mediators	 403
21. Regulation of Hypoxia-Inducible Factors During Inflammation	405
Stilla Frede, Uta Berchner-Pfannschmidt, and Joachim Fandrey	
1. Introduction	406
2. Regulation of HIF at the Transcriptional Level	408
3. Regulation of HIF at the Translational Level	410
4. Regulation of HIF-1 α at the Posttranslational Level	411
5. Regulation of HIF-1 Activity	413
6. Perspectives	414
7. Conclusions	414
Acknowledgments	415
References	415
 22. Superoxide and Derived Reactive Oxygen Species in the Regulation of Hypoxia-Inducible Factors	 421
Agnes Görlach and Thomas Kietzmann	
1. Introduction	422
2. Reactive Oxygen Species Act as Signaling Molecules	423
3. HIFs are Sensitive to Oxygen	424
4. Reactive Oxygen Species Modulate HIF	425
5. How are HIFs Regulated by Reactive Oxygen Species?	427
6. Summary	431
7. Methods	431
8. The Cytochrome C Reduction Assay for Detection of Extracellular Reactive Oxygen Species	431
9. Chemiluminescence Assay for Detection of Extracellular Reactive Oxygen Species	432
10. Measuring Intracellular Production of Reactive Oxygen Species using Fluorescent Dyes	433

11. Detection of Reactive Oxygen Species by Electron Paramagnetic Resonance	436
Acknowledgments	438
References	438
23. Genetics of Mitochondrial Electron Transport Chain in Regulating Oxygen Sensing	447
Eric L. Bell and Navdeep S. Chandel	
1. Introduction	448
2. Detecting HIF-1 α Protein Levels	449
3. Detecting Intracellular ROS Levels	452
4. Method 1: Examining Hypoxic Stabilization of HIF-1 α Protein in Cells Containing RNAi against the Rieske Fe-S Protein	454
5. Method 2: Examining the Role of ROS Generated from Mitochondrial Electron Transport in Hypoxic Stabilization of HIF-1 α Protein	458
6. Concluding Remarks	459
Acknowledgments	459
References	460
24. Hypoxia-Inducible Factor-1α Under the Control of Nitric Oxide	463
Bernhard Brüne and Jie Zhou	
1. HIF-1 and Oxygen Sensing	464
2. Nitric Oxide: A Multifunctional Messenger	465
3. Accumulation of HIF-1 α and Activation of HIF-1 by NO	467
4. Superoxide Stabilizes HIF-1 α but Antagonizes NO Actions	470
5. Hypoxic Signal Transmission is Antagonized by NO	472
6. Summary and Conclusions	473
Acknowledgments	475
References	475
25. Hypoxic Regulation of NF-κB Signaling	479
Eoin P. Cummins, Katrina M. Comerford, Carsten Scholz, Ulrike Bruning, and Cormac T. Taylor	
1. Background	480
2. Treatment Protocols for Cellular Hypoxia Studies	481
3. Measurement of NF- κ B Activity in Cultured Cells	484
4. Summary/Conclusions	491
References	491
<i>Author Index</i>	493
<i>Subject Index</i>	535
