

CONTENTS

<i>Contributors</i>	<i>xi</i>
<i>Preface</i>	<i>xv</i>
<i>Volumes in Series</i>	<i>xvii</i>

Section I. Modified Nucleotides 1

1. Identifying Modifications in RNA by MALDI Mass Spectrometry 3

Stephen Douthwaite and Finn Kirpekar

1. Introduction	4
2. Experimental Strategy	5
3. Experimental Procedures	7
4. Perspectives and Conclusion	15
References	17

2. Identification of Modified Residues in RNAs by Reverse Transcription-Based Methods 21

Yuri Motorin, Sébastien Muller, Isabelle Behm-Ansmant, and
Christiane Branlant

1. Introduction	22
2. Reverse Transcription (RT)-Based Methods for Detection of Modified Residues	24
3. RNA Extraction from Various Cell Types	29
4. RNA Modifications Detectable After Specific Chemical Treatment	32
5. RNA Modifications Leading to RT Pauses Without Preliminary Chemical Treatment	48
6. Conclusion	48
References	49

Section II. tRNA Modifications	55
3. Detection of Enzymatic Activity of Transfer RNA Modification Enzymes Using Radiolabeled tRNA Substrates	57
Henri Grosjean, Louis Droogmans, Martine Roovers, and Gérard Keith	
1. Introduction	59
2. Identification of Modified Nucleotides in tRNA	60
3. Testing the Activity of RNA Modification Enzymes	62
4. Complete Digestion of RNA with Various Nucleases	70
5. Analysis of RNA Digest Products by Thin-Layer Chromatography (TLC)	73
6. Detection of Modified Nucleotides in Uniformly Labeled [^{32}P]-RNA or [^{35}S]-Containing RNA Extracted from Microorganisms	82
7. Base Composition Analysis of RNA by Postlabeling Procedures	84
8. RNA Sequencing of Purified Nonradiolabeled tRNA Species	87
9. Identification of Modified Residues in RNAs by Reverse Transcriptase-Based Methods	90
10. Discussion and Outlook	92
References	94
4. <i>In Vitro</i> Detection of the Enzymatic Activity of Folate-Dependent tRNA (Uracil-54,-C5)-Methyltransferase: Evolutionary Implications	103
Jaunius Urbonavicius, Céline Brochier-Armanet, Stéphane Skouloubris, Hannu Myllykallio, and Henri Grosjean	
1. Introduction	104
2. Overproduction and Purification of <i>B. subtilis</i> tRNA (Uracil-54,-C5)-Methyltransferase	106
3. Enzymatic Activity Assay	107
4. Phylogenetic Analysis	110
5. Discussion	111
References	117
5. Probing the Intermediacy of Covalent RNA Enzyme Complexes in RNA Modification Enzymes	121
Stephanie M. Chervin, Jeffrey D. Kittendorf, and George A. Garcia	
1. Introduction	122
2. A Case Study for Probing Reaction Intermediacy: The Covalent RNA Complex of tRNA-Guanine Transglycosylase (TGT)	124
3. Denaturing Gel Electrophoresis: A Tool to Probe Enzyme-RNA Complexes	125

4. Analysis of the Chemical Competency of Covalent Enzyme-RNA Complexes	132
5. Analysis of the Rate of Formation of Covalent Enzyme-RNA Complexes	133
6. Summary	135
References	136
6. Identification and Characterization of Modification Enzymes by Biochemical Analysis of the Proteome	139
Jane E. Jackman, Lakmal Kotelawala, Elizabeth J. Grayhack, and Eric M. Phizicky	
1. Introduction	140
2. Methodology	141
3. Development of an Appropriate Biochemical Assay	141
4. Parallel Biochemical Analysis of the Yeast Proteome with the MORF Library	144
5. Deconvolution of the Active Pool to Identify the Individual Gene Responsible for Activity	147
6. Confirmation of the Identity of the Gene Responsible for the Modification Activity	147
7. Possible Reasons for Lack of Success with this Approach	149
8. Conclusions	150
References	150
7. Identification of Genes Encoding tRNA Modification Enzymes by Comparative Genomics	153
Valérie de Crécy-Lagard	
1. Introduction	154
2. Methods to Identify Missing tRNA Modification Genes	155
3. Homology-Based Genomic Data Mining Methods	159
4. Non-Homology-Based Genomic Data Mining Methods	160
5. General Conclusion: The Power of Integration	176
References	176
8. Identification and Characterization of Archaeal and Fungal tRNA Methyltransferases	185
David E. Graham and Gisela Kramer	
1. Introduction	186
2. Identification of tRNA Methyltransferases by Use of Genome Sequences	187

3. Substrates for Methyltransferase Assays	192
4. Methyltransferase Activity Assays	198
5. Identifying Modification Products	200
6. Identifying Modification Sites	201
7. tRNA Methyltransferases from <i>M. jannaschii</i>	205
References	205
9. Mass Spectrometric Identification and Characterization of RNA-Modifying Enzymes	211
Tsutomu Suzuki, Yoshiho Ikeuchi, Akiko Noma, Takeo Suzuki, and Yuriko Sakaguchi	
1. Introduction	212
2. Ribonucleome Analysis: Quest for RNA-Modifying Genes	212
3. Strains Used for the Ribonucleome Analysis	214
4. Parallel Preparation of Total RNAs from <i>E. coli</i> or Yeast Strains	214
5. Isolation and Purification of Individual tRNAs from Yeast	216
6. Nucleoside Preparation	217
7. Mass Spectrometric Analysis of Total Nucleosides	217
8. LC/MS Profiling of Modified Nucleosides	219
9. RNase Digestion for RNA Fragment Analysis by LC/MS	221
10. Capillary LC NANO ESI/Mass Spectrometry	221
11. RNA Fragment Analysis by Capillary LC/MS	223
12. Discussion	224
References	227
10. Chaplet Column Chromatography: Isolation of a Large Set of Individual RNAs in a Single Step	231
Takeo Suzuki and Tsutomu Suzuki	
1. Introduction	231
2. Outline of Chaplet Column Chromatography	232
3. Materials and Reagents	234
4. Preparation of Crude RNA Solution	235
5. Immobilization of DNA Probes	235
6. RNA Isolation by the CCC Method	237
7. Discussion	238
References	238

Section III. Sno-Mediated Modifications	241
11. Biochemical Purification of Box H/ACA RNPs Involved in Pseudouridylation	243
John Karijolich, David Stephenson, and Yi-Tao Yu	
1. Introduction	244
2. Biotin-Streptavidin Affinity Purification Using Biotinylated 5FU-Containing RNA	246
3. TAP Tag Purification of Box H/ACA RNPs	251
4. Immunoprecipitation of Box H/ACA RNPs	258
References	260
12. <i>In Vitro</i> Reconstitution and Affinity Purification of Catalytically Active Archaeal Box C/D sRNP Complexes	263
Keith Gagnon, Xinxin Zhang, and E. Stuart Maxwell	
1. Introduction	264
2. Cloning, Expression, and Preparation of <i>M. jannaschii</i> Box C/D sRNP Core Proteins	265
3. Cloning and <i>In Vitro</i> Transcription of Archaeal Box C/D sRNAs	270
4. <i>In Vitro</i> Assembly of the <i>M. jannaschii</i> sR8 Box C/D sRNP Complex	270
5. Assessment of <i>In Vitro</i> Assembled <i>M. jannaschii</i> Box C/D sRNP Methylation Activity	271
6. Sequential Affinity Chromatographic Purification of <i>In Vitro</i> Assembled Box C/D sRNPs	272
7. Concluding Remarks	280
References	281
13. Identifying Effects of snoRNA-Guided Modifications on the Synthesis and Function of the Yeast Ribosome	283
Wayne A. Decatur, Xue-hai Liang, Dorota Piekna-Przybylska, and Maurille J. Fournier	
1. Introduction	284
2. Experimental Strategies	285
3. Analyzing snoRNA-Guided Modifications in Selected Regions of the Ribosome	287
4. Determining Effects on rRNA and Ribosome Biogenesis	297
5. Investigating Ribosomal Complexes	302
6. Characterizing Ribosome Function	304
7. Chemical Probing of rRNA Structure	306
References	308

14. The U1 snRNA Hairpin II as a RNA Affinity Tag for Selecting snoRNP Complexes	317
Dorota Piekna-Przybylska, Ben Liu, and Maurille J. Fournier	
1. Introduction	318
2. Methodology	326
3. Materials and Experimental Procedures	342
References	348
15. A Dedicated Computational Approach for the Identification of Archaeal H/ACA sRNAs	355
Sébastien Muller, Bruno Charpentier, Christiane Branlant, and Fabrice Leclerc	
1. Introduction	356
2. Method	358
3. Conclusions	383
References	384
16. Reconstitution of Archaeal H/ACA sRNPs and Test of their Activity	389
Bruno Charpentier, Jean-Baptiste Fourmann, and Christiane Branlant	
1. Introduction	390
2. Overview of the Issues that can be Addressed by the Method	393
3. The Basic Principles of the Experiments	393
4. Materials and Reagents	394
5. Methods	396
6. General Comments	403
References	404
