1. Protein 3-Nitrotyrosine in Complex Biological Samples: Quantification by High-Pressure Liquid Chromatography/ Electrochemical Detection and Emergence of Proteomic Approaches for Unbiased Identification of Modification Sites	1
Tal Nuriel, Ruba S. Deeb, David P. Hajjar, and Steven S. Gross	
1. Introduction	2
2. Quantification of 3-NT in Proteins Using HPLC Separation and Electrochemical (EC) Detection	3
3. Protocol for Quantification of 3-NT in Hydrolyzed Proteins Using HPLC-EC	3
4. Beyond Quantification: Specification of 3-NT Sites in Proteins	7
Acknowledgment	16
References	16
2. Selective Fluorogenic Derivatization of 3-Nitrotyrosine and 3,4-Dihydroxyphenylalanine in Peptides: A Method Designed for Quantitative Proteomic Analysis	19
Victor S. Sharov, Elena S. Dremina, Justin Pennington, Jacque Killmer, Christopher Asmus, Maria Thorson, Sung Jung Hong, Xiaobao Li, John F. Stobaugh, and Christian Schöneich	
1. Introduction	20
2. Design of a Fluorogenic Derivatization Method	21
3. Model Studies with 4-Methylcatechol and 2-Aminocresol	22
4. Derivatization of a 3-Nitrotyrosine-Containing Model Peptide with Benzylamine and 4-Aminomethylbenzene Sulfonic Acid	23
5. Conclusions	31
Acknowledgment	31
References	31

3. Nitroalkenes: Synthesis, Characterization, and Effects on Macrophage Activation	33
Ana Maria Ferreira, Andrés Trostchansky, Mariana Ferrari, José M. Souza, and Homero Rubbo	
1. Introduction	34
2. Synthesis and Characterization of Cholesteryl-Nitrolinoleate	36
3. Synthesis and Identification of Nitroalkenes Isomers: Mass Spectrometry Analysis of Nitroarachidonate	37
4. Determination of Lipid Nitration during Macrophage Activation	39
5. Effects of Nitroalkenes on NOS2 Induction by Activated Macrophages	42
6. Analysis of HO-1 Induction and NF- κ B Activation	47
Acknowledgments	48
References	49
 4. In-Gel Detection of S-Nitrosated Proteins Using Fluorescence Methods	 53
Nicholas J. Kettenhofen, Xunde Wang, Mark T. Gladwin, and Neil Hogg	
1. Introduction	54
2. Role of Trace Metal Ions in Ascorbate-Mediated Reduction of S-Nitrosothiols	55
3. Detection of Protein S-Nitrosation Using Fluorescent Labeling Methods	56
4. Current Protocol for CyDye-Switch Method	59
5. Difference Gel Electrophoresis Analysis of a Model Protein Mixture	61
6. Sensitivity of Detection of the CyDye Label	62
7. Fluorescence Detection of S-Nitrosated Proteins in Plasma	64
8. Two-Dimensional Difference Gel Electrophoresis Detection of S-Nitrosated Proteins	64
9. Modifications of the Original Biotin-Switch Method	67
10. Current Procedure for the Biotin-Switch Assay	68
11. Conclusion	70
Acknowledgment	70
References	70
 5. The Arachidonate-Dependent Survival Signaling Preventing Toxicity in Monocytes/Macrophages Exposed to Peroxynitrite	 73
Orazio Cantoni, Ilaria Tommasini, and Liana Cerioni	
1. Introduction	74
2. Materials and Methods	75
3. Results and Discussion	77
Acknowledgments	81
References	81

6. Practical Approaches to Investigate Redox Regulation of Heat Shock Protein Expression and Intracellular Glutathione Redox State	83
Vittorio Calabrese, Anna Signorile, Carolin Cornelius, Cesare Mancuso, Giovanni Scapagnini, Bernardo Ventimiglia, Nicolo' Ragusa, and Alben Dinkova-Kostova	
1. Introduction	84
2. Nitric Oxide and Cellular Stress Response: Role of Vitagenes	87
3. Material and Methods	93
4. Results	98
5. Discussion	99
Acknowledgment	103
References	104
7. Monitoring Oxidative Stress in Vascular Endothelial Cells in Response to Fluid Shear Stress: From Biochemical Analyses to Micro- and Nanotechnologies	111
Mahsa Rouhanizadeh, Wakako Takabe, Lisong Ai, Hongyu Yu, and Tzung Hsiai	
1. Introduction	112
2. <i>In Vitro</i> Monitoring of Reactive Species	116
3. Measurement of Endothelial ROS Generation in Response to Shear Stress	120
4. Protein Oxidation and Nitration in Response to Shear Stress	125
5. Emerging Technology: Micro- and Nanotechnology	133
6. Summary	145
References	145
8. Determination of S-Nitrosothiols in Biological and Clinical Samples Using Electron Paramagnetic Resonance Spectrometry with Spin Trapping	151
Paul G. Winyard, Iona A. Knight, Frances L. Shaw, Sophie A. Rocks, Claire A. Davies, Paul Eggleton, Richard Haigh, Matthew Whiteman, and Nigel Benjamin	
1. Introduction	152
2. Materials and Methods	153
3. Relative Yield of Spin-Trapped NO [•] from S-Nitrosoalbumin in Comparison with S-Nitrosoglutathione	156
4. S-Nitrosoalbumin Recovery	157
5. Potential Signal Contribution from N-Nitrosamines and Other Possible Sources of NO [•]	157

6. Use of the EPR Assay for S-Nitrosothiols in Combination with Isotopic Labeling	158
Acknowledgments	159
References	159
9. Novel Method for Measuring S-Nitrosothiols Using Hydrogen Sulfide	161
Xinjun Teng, T. Scott Isbell, Jack H. Crawford, Charles A. Bosworth, Gregory I. Giles, Jeffrey R. Koenitzer, Jack R. Lancaster, Jeannette E. Doeller, David W. Kraus, and Rakesh P. Patel	
1. Introduction	162
2. Experimental Manipulation of H ₂ S	163
3. Specificity for H ₂ S-Dependent Detection of RSNO	164
4. Comparison of H ₂ S vs Tri-iodide and Copper/Cysteine Based Methods for RSNO Detection	166
5. Effects of pH on H ₂ S-Dependent RSNO Detection	167
6. Effect of Antifoam	169
7. Summary and Conclusions	170
Acknowledgments	170
References	170
10. Kinetic Studies on Peroxynitrite Reduction by Peroxiredoxins	173
Madia Trujillo, Gerardo Ferrer-Sueta, and Rafael Radi	
1. Introduction	174
2. General Considerations for Reagents Used	176
3. Kinetics Studies of the Oxidative Part of the Catalytic Cycle	177
4. Reductive Part of the Catalytic Cycle	190
5. Conclusions	191
Acknowledgments	193
References	194
11. Nitrocytochrome c: Synthesis, Purification, and Functional Studies	197
José M. Souza, Laura Castro, Adriana María Cassina, Carlos Batthyány, and Rafael Radi	
1. Introduction	198
2. Synthesis of Tyrosine-Nitrated Cytochrome c	200
3. Purification of the Mononitrated Cytochrome c Species	202
4. Mapping the Sites of Tyrosine Nitration and Spectral Characterization of the Nitrated Cytochrome c	205
5. Functional Consequences of Nitrated Cytochrome c	208

6. Concluding Remarks	213
Acknowledgments	213
References	214
12. Tyrosine Nitration, Dimerization, and Hydroxylation by Peroxynitrite in Membranes as Studied by the Hydrophobic Probe <i>N</i>-<i>t</i>-BOC-L-tyrosine <i>tert</i>-Butyl Ester	217
Silvina Bartesaghi, Gonzalo Peluffo, Hao Zhang, Joy Joseph, Balaraman Kalyanaraman, and Rafael Radi	
1. Introduction	218
2. Methods	220
3. Results	223
4. Discussion	232
Acknowledgments	234
References	234
13. Assessment of Superoxide Production and NADPH Oxidase Activity by HPLC Analysis of Dihydroethidium Oxidation Products	237
Francisco R. M. Laurindo, Denise C. Fernandes, and Célio X. C. Santos	
1. Introduction	238
2. Probes for Assessment of Superoxide	239
3. Dihydroethidium as a Superoxide Probe	240
4. HPLC Analysis of Dihydroethidium Oxidation in Cells and Tissues: General Considerations	243
5. Extraction of Fluorescent DHE-Derived Products in Biological Samples	248
6. Quantification of Fluorescent DHE-Derived Products	251
7. Assessment of NADPH Oxidase Activity in Cell Membrane Fraction by DHE Oxidation	254
8. Summary and Conclusions	257
References	257
14. Methods to Measure the Reactivity of Peroxynitrite-Derived Oxidants Toward Reduced Fluoresceins and Rhodamines	261
Peter Wardman	
1. Introduction	262
2. Reactants	262
3. Methods	266
4. Sources of Error and Scope for Improvements in Methodology	278

5. Conclusions	279
Acknowledgments	279
References	279
15. Detection and Characterization of Peroxynitrite-Induced Modifications of Tyrosine, Tryptophan, and Methionine Residues by Tandem Mass Spectrometry	283
Igor Rebrin, Catherine Bregere, Timothy K. Gallaher, and Rajindar S. Sohal	
1. Introduction	284
2. Experimental Procedures	285
3. Anticipated Results	287
4. Conclusion	292
Acknowledgment	292
References	293
16. Reductive Gas-Phase Chemiluminescence and Flow Injection Analysis for Measurement of the Nitric Oxide Pool in Biological Matrices	295
Ulrike Hendgen-Cotta, Marijke Grau, Tienush Rassaf, Putrika Gharini, Malte Kelm, and Petra Kleinbongard	
1. Circulating and Resident Pool of Nitric Oxide	296
2. Applied Methods for Determination of Nitrite, Nitrate, and Nitroso Species in Biological Matrices and Iron-Nitrosyls in Tissue	301
3. Sample Processing	304
4. Conclusions	309
Acknowledgments	309
References	309
17. Detection and Measurement for the Modification and Inactivation of Caspase by Nitrosative Stress <i>In Vitro</i> and <i>In Vivo</i>	317
Hee-Jun Na, Hun-Taeg Chung, Kwon-Soo Ha, Hansoo Lee, Young-Guen Kwon, Timothy R. Billiar, and Young-Myeong Kim	
1. Nitrosative Stress	318
2. Biological Reactivity of Nitric Oxide	319
3. S-Nitrosylating Chemistry	319
4. S-Nitrosylating Specificity	320
5. S-Nitrosylation of Caspases	321
6. Experimental Procedures	322
7. Summary	325

Acknowledgment	325
References	325
18. Interactive Relations between Nitric Oxide (NO) and Carbon Monoxide (CO): Heme Oxygenase-1/CO Pathway Is a Key Modulator in NO-Mediated Antiapoptosis and Anti-inflammation	329
Hun-Taeg Chung, Byung-Min Choi, Young-Guen Kwon, and Young-Myeong Kim	
1. Introduction	330
2. Induction of HO-1 by the NOS/NO Pathway	331
3. Antiapoptotic Roles of the NOS/HO-1 Pathway	332
4. Anti-inflammatory Roles of the NOS/HO-1 Pathway	334
5. Interactive Relations between NO and CO	335
6. Conclusion	335
Acknowledgment	336
References	337
19. Detection and Characterization of <i>In Vivo</i> Nitration and Oxidation of Tryptophan Residues in Proteins	339
Catherine Bregere, Igor Rebrin, and Rajindar S. Sohal	
1. Introduction	340
2. Methods	341
3. Conclusions	346
Acknowledgment	348
References	348
20. <i>In Vivo</i> Real-Time Measurement of Nitric Oxide in Anesthetized Rat Brain	351
Rui M. Barbosa, Cátia F. Lourenço, Ricardo M. Santos, Francois Pomerleau, Peter Huettl, Greg A. Gerhardt, and João Laranjinha	
1. Introduction	352
2. Experimental Considerations	353
3. <i>In Vivo</i> Experiments: Results and Discussion	359
4. Concluding Remarks	365
Acknowledgments	365
References	365
21. Nitric Oxide and Cardiobiology-Methods for Intact Hearts and Isolated Myocytes	369
Joshua M. Hare, Farideh Beigi, and Konstantinos Tziomalos	
1. Introduction	370
2. Nitroso-Redox Signal Mediators	371

3. Nitric Oxide and Signaling Through Cysteine Thiols	372
4. Nitroso-Redox Balance or Imbalance	373
5. Nitric Oxide Synthases, NADPH Oxidase, and Xanthine Oxidoreductase (XOR)	375
6. Nitric Oxide-Redox Balance in Excitation-Contraction Coupling	377
7. Techniques for Assessing Oxidative and Nitrosative Stress	377
8. Techniques Used for Measuring S-Nitrosylation	382
9. Activity Measurements	385
10. Conclusions	386
Acknowledgments	387
References	387
22. Microscopic Technique for the Detection of Nitric Oxide-Dependent Angiogenesis in an Animal Model	393
Seung Namkoong, Byoung-Hee Chung, Kwon-Soo Ha, Hansoo Lee, Young-Guen Kwon, and Young-Myeong Kim	
1. Introduction	394
2. Experimental Procedures	395
3. Results	397
4. Summary and Conclusion	400
Acknowledgment	401
References	401
