

CONTENTS

<i>Contributors</i>	xiii
<i>Preface</i>	xxi
<i>Volumes in Series</i>	xxiii

1. Analyzing Morphological and Ultrastructural Features in Cell Death 1

Antonella Tinari, Anna Maria Giammarioli, Valeria Manganelli,
Laura Ciarlo, and Walter Malorni

1. Introduction	2
2. The Contribution of Morphological Analyses	5
3. Light Microscopy	5
4. Sample Processing for Light Microscopy	6
5. Electron Microscopy	13
6. Scanning Electron Microscopy (SEM)	24
References	25

2. Evaluation of Some Cell Death Features by Real Time Real Space Microscopy 27

Soraya S. Smaili, Tatiana R. Rosenstock, and Yi-Te Hsu

1. Mitochondria and Cell Death	28
2. Bax, Mitochondria, and Calcium Signaling	31
3. Calcium Signaling and Neurodegenerative Processes	40
Acknowledgments	46
References	46

3. Analysis of Apoptotic Pathways by Multiparametric Flow Cytometry: Application to HIV Infection 51

Hervé Lecoœur, Marie-Thérèse Melki, Hêla Saïdi, and Marie-Lise Gougeon

1. Introduction	52
2. Intracellular Expression of Bcl-2 Family Members and Relationship with Apoptosis	54
3. Analysis of Mitochondrial Transmembrane Potential by DiOC ₆ (3) Staining	58

4. Analysis of DNA Fragmentation by ISNT and TUNEL Assays	62
5. Analysis of the Loss of Plasma Membrane Asymmetry with the Annexin-V Assay	68
6. Analysis of the Loss of Plasma Membrane Integrity with the 7-Amino Actinomycin D Assay	71
7. A Flow Cytometry Assay to Quantify Cell-Mediated Cytotoxicity	74
8. Conclusions	79
Acknowledgments	79
References	80
 4. Methods to Analyze the Palmitoylated CD95 High Molecular Weight Death-Inducing Signaling Complex	 83
Christine Feig and Marcus E. Peter	
1. Introduction	84
2. Use of Sucrose Density Gradients for Analysis of hiDISC	85
3. Association of CD95 ^{hi} with Active Caspase-8 (Reverse DISC-IP)	91
4. Role of Palmitoylation for CD95 Signaling	94
5. Conclusions	97
Acknowledgment	98
References	99
 5. Immunomagnetic Isolation of Tumor Necrosis Factor Receptosomes	 101
Vladimir Tchikov and Stefan Schütze	
1. Introduction	102
2. Compartmentalization of TNF-R1 Apoptosis Signaling	103
3. Methods for Magnetic Labeling and Isolation of Subcellular Signaling Structures	104
4. Experimental Procedures	108
5. Conclusions	121
Acknowledgments	122
References	122
 6. Analyzing Lipid Raft Dynamics during Cell Apoptosis	 125
Walter Malorni, Tina Garofalo, Antonella Tinari, Valeria Manganelli, Roberta Misasi, and Maurizio Sorice	
1. Introduction	126
2. The Contribution of Biochemical Approaches	128
3. The Contribution of Morphological Analyses	134
References	139

7. Apoptosome Assembly	141
Yigong Shi	
1. Introduction	142
2. Apoptosome for Caspase-9 Activation	144
3. Dark Apoptosome for Dronc Activation	149
4. CED-4 Apoptosome for CED-3 Activation	150
5. Conclusion	152
Acknowledgments	152
References	152
8. Caspases: Determination of Their Activities in Apoptotic Cells	157
Alena Vaculova and Boris Zhivotovsky	
1. Introduction	158
2. Methods for Analysis of Caspase Processing, Activation, and Substrate Cleavage	162
3. Conclusion	178
Acknowledgments	179
References	179
9. Lysosomes in Apoptosis	183
Saška Ivanova, Urška Repnik, Lea Bojič, Ana Petelin, Vito Turk, and Boris Turk	
1. Introduction	184
2. Lysosomal Membrane Permeabilization Induction	184
3. Methods Used for the Detection of Lysosome Integrity	186
4. Staining for Acid Compartments/Vesicles	186
5. Validation of Lysosomal Membrane Permeabilization	188
6. Preparation of Cytosolic Extract	189
7. Lysosomal Cathepsins	190
8. Synthetic Cathepsin Substrates	191
9. Cleavage of Protein Substrates	195
References	196
10. More Than Two Sides of a Coin?	201
How to Detect the Multiple Activities of Type 2 Transglutaminase	
Carlo Rodolfo, Laura Falasca, Giuseppina Di Giacomo, Pier Giorgio Mastroberardino, and Mauro Piacentini	
1. Introduction	202
2. TG2 Activity Assays	203

3. GTPase Assay	205
4. TG2 Knockout Mice as Model System	205
5. Immunocytochemistry and Immunofluorescence Detection of TG2	207
6. <i>In Vitro</i> Phagocytosis Assays	208
7. TG2 Acts as a Protein Disulfide Isomerase (PDI)	210
8. Conclusions	210
Acknowledgments	211
References	211
11. Granzymes and Cell Death	213
Denis Martinvalet, Jerome Thiery, and Dipanjan Chowdhury	
1. Introduction	214
2. Purification of Rat Perforin from RNK-16 NK-like Leukemia Cells	215
3. Expression and Purification of Recombinant Granzyme B in a Baculovirus System	221
4. Expression and Purification of Recombinant human Granzyme A in <i>Escherichia coli</i>	223
5. Granzyme-Mediated Apoptosis Assay	227
6. Conclusion	229
Acknowledgment	229
References	229
12. Investigation of the Proapoptotic Bcl-2 Family Member Bid on the Crossroad of the DNA Damage Response and Apoptosis	231
Sandra S. Zinkel	
1. Introduction	232
2. Isolation of Myeloid Precursor Cells from Mouse Bone Marrow Cells	235
3. Isolation of Myeloid Precursor Cells	237
4. Purification of Lin ⁻ Cells	237
5. Sca-1 Positive Selection	237
6. Magnetic Separation	238
7. Culture of Lineage-Depleted, Sca1 ⁺ Bone Marrow Cells	238
8. WEHI-Conditioned Medium (Source of IL-3) (Warner <i>et al.</i> , 1969)	239
9. Chromosomal Breakage Assays	239
10. Radioresistant DNA synthesis	240
11. Data Analysis	241
12. Subcellular Fractionation	242

13. Immunofluorescence Staining on Adherent Cells	244
14. Annexin V Staining	247
15. Conclusion	249
Acknowledgments	249
References	249
13. Assembly, Purification, and Assay of the Activity of the ASC Pyroptosome	251
Teresa Fernandes-Alnemri and Emad S. Alnemri	
1. Introduction	252
2. Methods	254
3. Generation of Stable THP-1 Cells Expressing an ASC-Green Fluorescent Protein (GFP) Fusion Protein to Visualize ASC Oligomerization	254
4. Biochemical Assay of ASC Pyroptosome Formation in Stimulated THP-1 or Primary Macrophages	258
5. <i>In Vitro</i> Assembly and Purification of ASC Pyroptosomes from THP-1 Cell Lysates	261
6. <i>In Vitro</i> Assembly and Purification of Recombinant ASC Pyroptosomes	264
Acknowledgments	268
References	268
14. Nucleases in Programmed Cell Death	271
Kohki Kawane and Shigekazu Nagata	
1. Introduction	272
2. Assays for CAD	273
3. Assay for DNase II	278
4. Assays for Cell-Autonomous Apoptotic DNA Degradation	279
5. Assay for Noncell-Autonomous DNA Degradation in Macrophages	282
References	285
15. Detection of Autophagy in Cell Death	289
Zahra Zakeri, Alicia Melendez, and Richard A. Lockshin	
1. Introduction	290
2. Structural: Electron Microscopic Recognition of Lysosomes, Autophagic Vesicles, and Autophagosomes	292
3. Identification of Lysosomal Enzyme Activity	294
4. Specific Uptake of Molecules into Lysosomes and Detection of These Molecules by Fluorescence	

Microscopy or Confocal Microscopy to Evaluate Number, Size, and Location of Lysosomes	296
5. Localization or Differential Modification of Autophagy-Related Genes	300
6. Evaluation of Effects of Inhibition of One or More Lysosomal Enzymes, Inhibition of Fusion of Organelles, or Inhibition of Intercompartmental Transfer of Materials by Putatively Specific Inhibitors	304
References	304
16. Methods for Distinguishing Apoptotic from Necrotic Cells and Measuring Their Clearance	307
Dmitri V. Krysko, Tom Vanden Berghe, Eef Parthoens, Katharina D'Herde, and Peter Vandenabeele	
1. Introduction	308
2. Analysis of Cell Death Parameters in Intact Cells	310
3. Analysis of Biochemical Cell Death Parameters	318
4. Analysis of Cell-Cell Interactions	330
Acknowledgments	337
References	337
17. Two-Dimensional Gel-Based Analysis of the Demolition Phase of Apoptosis	343
Alexander U. Lüthi, Sean P. Cullen, and Seamus J. Martin	
1. Introduction	344
2. Cell-Free Extract	345
3. Two-Dimensional SDS-PAGE	348
4. Protein Identification by Matrix-Assisted Laser Desorption/Ionization Time of Flight Mass Spectrometry	349
5. Conclusion	351
Acknowledgments	353
References	353
18. Methods to Dissect Mitochondrial Membrane Permeabilization in the Course of Apoptosis	355
Lorenzo Galluzzi, Illo Vitale, Oliver Kepp, Claire Séror, Emilie Hangen, Jean-Luc Perfettini, Nazanine Modjtahedi, and Guido Kroemer	
1. Introduction	356
2. Mitochondrial Outer Membrane Permeabilization	357
3. Mitochondrial Inner Membrane Permeabilization	360
4. Guidelines for a Precise Determination of Mitochondrial Membrane Permeabilization	365
5. Notes	366

Acknowledgments	373
References	373
19. Oxidative Lipidomics of Programmed Cell Death	375
Vladimir A. Tyurin, Yulia Y. Tyurina, Patrick M. Kochanek, Ronald Hamilton, Steven T. DeKosky, Joel S. Greenberger, Hülya Bayir, and Valerian E. Kagan	
1. Introduction	376
2. Materials and Methods	377
3. Results and Discussion	379
Acknowledgments	390
References	390
20. Identification and Characterization of Endoplasmic Reticulum Stress-Induced Apoptosis <i>In Vivo</i>	395
Kezhong Zhang and Randal J. Kaufman	
1. The Endoplasmic Reticulum (ER) and the Unfolded Protein Response	396
2. Endoplasmic Reticulum Stress-Induced Apoptosis	398
3. Methods Used to Identify and Characterize ER Stress-Induced Apoptosis <i>In Vivo</i>	402
Acknowledgments	415
References	415
21. Organelle Intermixing and Membrane Scrambling in Cell Death	421
Mauro Degli Esposti	
1. Introduction	422
2. Methods Used to Evaluate Intermixing of Mitochondria with Other Organelles	423
3. Methods Used to Evaluate Caspase-Dependent Changes in Intracellular Traffic	432
4. Outlook	436
Acknowledgments	436
References	436
22. Mechanisms and Methods in Glucose Metabolism and Cell Death	439
Yuxing Zhao, Heather L. Wieman, Sarah R. Jacobs, and Jeffrey C. Rathmell	
1. Introduction	439
2. Methods	443
3. Conclusion	454

Acknowledgments	454
References	454
<i>Author Index</i>	459
<i>Subject Index</i>	485
