

CONTENTS

<i>Contributors</i>	<i>ix</i>
<i>Preface</i>	<i>xi</i>
1. Ontogeny of Erythropoiesis in the Mammalian Embryo	1
Kathleen McGrath and James Palis	
1. Introduction	2
2. Primitive Erythropoiesis	4
3. "Definitive" Erythropoiesis in the Fetus	9
4. Developmental Origins of Erythropoiesis	11
5. Conclusions	14
Acknowledgments	15
References	15
2. The Erythroblastic Island	23
Deepa Manwani and James J. Bieker	
1. Introduction	24
2. Composition and Sites of Formation of Erythroblastic Islands	26
3. Cell-Cell Adhesive Interactions Within Erythroblastic Islands	35
4. Erythroblastic Island Functions	39
5. Conclusion	46
Acknowledgments	46
References	46
3. Epigenetic Control of Complex Loci During Erythropoiesis	55
Ryan J. Wozniak and Emery H. Bresnick	
1. Introduction	56
2. Utility of Analyzing Erythropoiesis to Dissect Epigenetic Mechanisms	57
3. Epigenetic Control of the β -like Globin Genes During Erythropoiesis	58
4. Epigenetic Control of the <i>Gata2</i> Locus During Erythropoiesis	69
5. Principles of Epigenetic Control Emerging from Studies of Erythropoiesis	71
Acknowledgments	73
References	73

4. The Role of the Epigenetic Signal, DNA Methylation, in Gene Regulation During Erythroid Development	85
Gordon D. Ginder, Merlin N. Gnanapragasam, and Omar Y. Mian	
1. Introduction	86
2. DNA Methylation in Erythroid Cell Differentiation	93
3. The β -Globin Locus: A Model for the Role of DNA Methylation in Developmental Gene Regulation	95
4. DNA Methylation of the Human α -Globin Locus	104
5. DNA Methylation of Other Erythroid-Specific Genes	106
6. Conclusions and Future Directions	107
Acknowledgments	108
References	108
5. Three-Dimensional Organization of Gene Expression in Erythroid Cells	117
Wouter de Laat, Petra Klous, Jurgen Kooren, Daan Noordermeer, Robert-Jan Palstra, Marieke Simonis, Erik Splinter, and Frank Grosveld	
1. Introduction: Three-Dimensional Studies in a Historical Context	118
2. Long-Range Gene Activation and Gene Competition: DNA-Folding Matters?	119
3. Novel Biochemical Approaches to Study DNA Topology: Insight into the Spatial Organization of the β -Globin Locus	123
4. The Functional Significance of Long-Range Interactions Between Regulatory Sequences	125
5. Long-Range Contacts in Other Gene Loci	127
6. Gene Positioning in the Nucleus: Spatial Coordination of Functionally Related Genes?	129
7. Future Directions for Studies on Nuclear Architecture: 4C Technology	132
References	134
6. Iron Homeostasis and Erythropoiesis	141
Diedra M. Wrighting and Nancy C. Andrews	
1. Introduction	142
2. Iron Metabolism and Homeostasis	142
3. Hepcidin	147
4. Hepcidin and Erythropoiesis	154
5. Conclusions	158
References	159

7. Effects of Nitric Oxide on Red Blood Cell Development and Phenotype	169
Vladan P. Ćokić and Alan N. Schechter	
1. Nitric Oxide	170
2. NO Influence on Cell Differentiation	180
3. NO Interaction with RBCs	187
4. Effects of NO on Hemoglobin Expression	192
5. Role of NO During Malaria Pathogenesis	194
6. Effects of Fetal Hemoglobin Inducers on NO-cGMP Pathway	195
7. Summary: NO and Erythropoiesis	199
References	200
8. Diamond Blackfan Anemia: A Disorder of Red Blood Cell Development	217
Steven R. Ellis and Jeffrey M. Lipton	
1. Introduction	218
2. Pathophysiology and Genetics: DBA, a Disorder of Ribosome Biosynthesis	220
3. Other Diseases Linked to Defects in Ribosome Synthesis	223
4. Ribosome Dysfunction and Red Blood Cell Development	226
5. DBA Is a Cancer Predisposition Syndrome	230
6. Treatment and Outcomes	232
7. Summary	235
References	235
