

CONTENTS

Contributors	xiii
Preface	xxi
Volumes in Series	xxiii

1. Analysis of Autophagic and Necrotic Cell Death in *Dictyostelium* 1

Corinne Giusti, Artemis Kosta, David Lam, Emilie Tresse,
Marie-Françoise Luciani, and Pierre Golstein

1. Introduction	2
2. Growing <i>Dictyostelium</i> Cells in Monolayer Cultures	3
3. Inducing Autophagic Vacuolar Cell Death	4
4. Further Exploration of Autophagic Cell Death	6
5. Inducing Necrotic Cell Death	10
6. Further Exploration of Necrotic Cell Death	10
References	13

2. Methods and Protocols for Studying Cell Death in *Drosophila* 17

Donna Denton, Kathryn Mills, and Sharad Kumar

1. Introduction	18
2. Cell Death Analysis During Development	22
3. Biochemical Analysis	27
4. Genetic Analysis	31
References	35

3. *In Vivo* and *In Vitro* Methods for Studying Apoptotic Cell Engulfment in *Drosophila* 39

Elizabeth A. Silva, Jemima Burden, and Nathalie C. Franc

1. Introduction	40
2. Culture Conditions	41
3. Labeling of Apoptotic Cells	43
4. Visualizing the Macrophages	46
5. Quantification and Statistics	50

6. Engulfment in Cell Culture	52
Acknowledgments	57
References	57
4. A Mouse Mammary Epithelial Cell Model to Identify Molecular Mechanisms Regulating Breast Cancer Progression	61
Vassiliki Karantza-Wadsworth and Eileen White	
1. Introduction	62
2. A Novel Mouse Mammary Epithelial Cell Model	63
3. Protocols	65
4. Concluding Remarks	74
References	74
5. Immortalized Mouse Epithelial Cell Models to Study the Role of Apoptosis in Cancer	77
Robin Mathew, Kurt Degenhardt, Liti Haramaty, Cristina M. Karp, and Eileen White	
1. Introduction	78
2. Immortalization of Baby Mouse Kidney, Mammary, Prostate, and Ovarian Surface Epithelial Cells	81
3. Development of iBMK Cell Lines for Identifying the Role of Apoptosis in Cancer	94
4. Aposcreen: An iBMK Cell-Based Screen for the Identification of Apoptosis-Inducing Compounds as Potential Anti-Cancer Agents	95
5. Adaptation of the iBMK Cell Model System for the Evaluation of Tissue-Specific Tumor-Promoting Functions	97
6. Tumorigenicity Assay	100
7. Noninvasive <i>In Vivo</i> Monitoring of Tumor Growth by Expression of Fluorescence and Chemiluminescence Markers	102
8. Tumor-Derived Cell Lines (TDCLs) as a Model System for Epithelial Tumor-Promoting Functions	103
9. Concluding Remarks and Future Perspectives	104
Acknowledgments	105
References	105
6. DNA Damage Response and Apoptosis	107
Dragos Plesca, Suparna Mazumder, and Alexandru Almasan	
1. Introduction	108
2. Methods	110
Acknowledgments	120
References	120

7. Phorbol Ester-Induced Apoptosis and Senescence in Cancer Cell Models	123
Liqing Xiao, M. Cecilia Caino, Vivian A. von Burstin, Jose L. Oliva, and Marcelo G. Kazanietz	
1. Introduction	124
2. PKC δ as a Pro-Apoptotic Kinase	124
3. PKC δ as a Mediator of Apoptotic Responses in Prostate Cancer Cells: The Emergence of an Autocrine Paradigm	125
4. Roles of PKC α and PKC ϵ in LNCaP Cell Death and Survival	127
5. Regulation of Cell Cycle and Senescence by PKC	128
6. Determination of Phorbol Ester-Induced Apoptosis in Prostate Cancer Cells	129
7. Adenoviral Expression of PKC Isozymes	131
8. RNA Interference of PKC Isozymes	132
9. Collection and Storage of CM from LNCaP Cells	133
10. Determination of Senescence in Respose to Phorbol Esters	134
References	136
8. Manipulation of PKC Isozymes by RNA Interference and Inducible Expression of PKC Constructs	141
Alakananda Basu, Shalini D. Persaud, and Usha Sivaprasad	
1. Introduction	141
2. Methods	143
Acknowledgments	155
References	155
9. Studying p53-Dependent Cell Death <i>In Vitro</i> and <i>In Vivo</i>	159
Kageaki Kuribayashi, Niklas Finnberg, and Wafik S. El-Deiry	
1. Introduction	159
2. Studying p53-Dependent Cell Death <i>In Vitro</i>	160
3. Overexpression of p53 by Adenovirus (Ad)	160
4. Silencing the p53 Gene by Retroviral Vector	164
5. Studying the Apoptotic Response	165
6. Studying p53-Dependent Apoptosis <i>In Vivo</i>	165
References	172
10. NF-κB as a Determinant of Distinct Cell Death Pathways	175
Irene L. Ch'en, Stephen M. Hedrick, and Alexander Hoffmann	
1. Introduction	176
2. Methods	178

3. DNA	180
4. Proteins	183
5. Metabolic Health	184
6. Senescence Detection	185
References	186
11. Purification and Bioassay of Hedgehog Ligands for the Study of Cell Death and Survival	189
Pilar Martinez-Chinchilla and Natalia A. Riobo	
1. Introduction	190
2. Hedgehog and the Regulation of Cell Death	193
3. Generation of Recombinant Hedgehog Ligands	195
References	201
12. Experimental Approaches to Investigate the Proteasomal Degradation Pathways Involved in Regulation of Apoptosis	205
Alan Tseng, Hiroyuki Inuzuka, Daming Gao, Amrik Singh, and Wenyi Wei	
1. Introduction	206
2. General Instructions	207
3. Protocols	207
References	222
13. Ubiquitination Mediated by Inhibitor of Apoptosis Proteins	225
Sun-Mi Park, Shimin Hu, Tae H. Lee, and Xiaolu Yang	
1. Introduction	225
2. <i>In Vitro</i> Ubiquitination Assay	226
3. <i>In Vivo</i> Ubiquitination Assay	232
Acknowledgments	234
References	234
14. Phosphatases and Regulation of Cell Death	237
Chi-Wu Chiang, Ling Yan, and Elizabeth Yang	
1. Introduction	238
2. Identification of the Putative Phosphatase in Cells	240
3. <i>In Vitro</i> Phosphatase Assays	248
4. Interaction of the Phosphatase and Apoptotic Protein	249
5. Linking Phosphatase Activity to Cell Death Protein Function	253
6. Conclusion	255
Acknowledgment	255
References	255

15. Analysis of Neuronal Cell Death in Mammals	259
Marcello D'Amelio, Virve Cavallucci, Adamo Diamantini, and Francesco Cecconi	
1. Introduction	260
2. Apoptosis Detection <i>In Vitro</i>	260
3. Assessment of Cell Death	262
4. Apoptosis Detection in Brain Development	269
5. Detection of Synaptic Apoptosis (Synaptosis)	272
6. Conclusions	275
Acknowledgments	275
References	275
16. Dissecting Apoptosis and Intrinsic Death Pathways in the Heart	277
Danielle Weidman, James Shaw, Joseph Bednarczyk, Kelly M. Regula, Natalia Yurkova, Tong Zhang, Floribeth Aguilar, and Lorrie A. Kirshenbaum	
1. Introduction	278
2. Protocols	279
Acknowledgments	283
References	284
17. Quantification of Vascular Endothelial Cell Apoptosis <i>In Vivo</i>	287
Xuefeng Zhang and Sareh Parangi	
1. Introduction	287
2. Protocols	288
References	292
18. Recombinant TRAIL and TRAIL Receptor Analysis	293
Nicholas Harper and Marion MacFarlane	
1. Introduction	294
2. Generation of Recombinant TRAIL	295
3. Analysis of TRAIL Receptors	302
4. Concluding Remarks	311
Acknowledgments	311
References	312

19. Analysis of Tnf-Related Apoptosis-Inducing Ligand <i>In Vivo</i> Through Bone Marrow Transduction and Transplantation	315
Keli Song, Raj Mariappan, and Roya Khosravi-Far	
1. Introduction	316
2. Generation of Retroviral Infection Medium	317
3. Bone Marrow Cell Preparation	318
4. Retroviral Transduction of Bone Marrow Cells	319
5. Bone Marrow Transplantation	321
6. Assessment of Bone Marrow Transplantation	322
7. Pathologic Evaluation of TRAIL-Transduced Mice	323
8. Methods for Immunohistochemical Staining for TRAIL Expression	326
9. Applications that Use the Bone Marrow Transplantation Approach	328
Acknowledgments	329
References	329
20. Overcoming Resistance to TRAIL-Induced Apoptosis in Prostate Cancer by Regulation of c-FLIP	333
Xiaoping Zhang, Wenhua Li, Aria F. Olumi	
1. Introduction	334
2. Structure and Molecular Mechanisms of c-FLIP in Apoptosis	334
3. Expression of c-FLIP	335
4. Regulation of c-FLIP Expression	337
5. Targeting c-FLIP to Enhance Apoptosis in Cancer Cells	341
6. Methods and Materials	342
Acknowledgments	346
References	346
21. Caspase Assays: Identifying Caspase Activity and Substrates <i>In Vitro</i> and <i>In Vivo</i>	351
Cristina Pop, Guy S. Salvesen, and Fiona L. Scott	
1. Introduction	352
2. Caspase Methods	353
3. Conclusion	365
References	366
22. Synthesis and Biophysical Characterization of Stabilized α-Helices of BCL-2 Domains	369
Gregory H. Bird, Federico Bernal, Kenneth Pitter, and Loren D. Walensky	
1. Introduction	370
2. Synthesis of Non-Natural Amino Acids for Peptide Stapling	372

3. Design and Synthesis of Stabilized α -Helices of BCL-2 Domains (SAHBs)	373
4. Structural Assessment of SAHBs by Circular Dichroism (CD)	376
5. Protease Resistance Testing of SAHBs	378
6. Cell Permeability Screening of SAHBs	381
7. Summary	383
Acknowledgments	384
References	384
23. Dissection of the BCL-2 Family Signaling Network with Stabilized α-Helices of BCL-2 Domains	387
Kenneth Pitter, Federico Bernal, James LaBelle, and Loren D. Walensky	
1. Introduction	388
2. BCL-2 Family Binding Measurements by Fluorescence Polarization Assay	388
3. <i>In Vitro</i> Release Assays as a Measure of Pro-Apoptotic Activity	392
4. Measurement of Cellular Apoptosis Induction	400
5. Identification of <i>In Situ</i> Mechanistic Targets of SAHBs	403
6. Summary	405
Acknowledgments	405
References	405
24. ERM-Mediated Genetic Screens in Mammalian Cells	409
Dan Liu and Zhou Songyang	
1. Introduction	409
2. Methods and Design	411
3. ERM-Mediated Genetic Screens and Re-PCA	415
4. Conclusions	417
Acknowledgment	418
References	418
<i>Author Index</i>	421
<i>Subject Index</i>	445
