

CONTENTS

Preface

vii

1. The Coevolution of Plants and Viruses: Resistance and Pathogenicity 1

Aurora Fraile and Fernando García-Arenal

I. Introduction	3
II. Virus Infection and Host Defenses Reciprocally Affect the Fitness of Host and Virus	4
III. The Outcome of Plant–Virus Interactions Depends on the Plant and Virus Genotypes Involved	6
IV. Genetic Variation of Resistance and Pathogenicity	13
V. Costs of Pathogenicity and Resistance Durability	20
VI. Concluding Remarks	23
Acknowledgments	24
References	24

2. Assessment of the Benefits and Risks for Engineered Virus Resistance 33

Jeremy R. Thompson and Mark Tepfer

I. Introduction	34
II. The Cost of Plant–Virus Infection	35
III. Antiviral Strategies Not Based on Genetic Engineering	36
IV. Transgene-Mediated Resistance	38
V. Refinements to Engineering Resistance	39
VI. Concepts of Risk Assessment	42
VII. Potential Risks Associated with Virus-Resistant Transgenic Plants	43
VIII. Weighing the Benefits and Risks. Taking into Account Efficacy, Durability, and Safety	46
IX. Conclusions	48
References	49

3. Signaling in Induced Resistance 57

John P. Carr, Mathew G. Lewsey, and Peter Palukaitis

I. What is Induced Resistance?	59
II. Signaling in Genetically Determined Resistance	60
III. Low Molecular Weight Chemical Signals in Induced Resistance	64
IV. RNA Silencing and Induced Resistance	72

V. Protein Factors in Signaling or Resistance Responses	84
VI. Concluding Thoughts	102
Acknowledgments	103
References	103
4. Global Genomics and Proteomics Approaches to Identify Host Factors as Targets to Induce Resistance Against Tomato Bushy Stunt Virus	123
Peter D. Nagy and Judit Pogany	
I. Introduction	125
II. Genome-Wide Screens for Systematic Identification of Host Factors Affecting TBSV Replication	130
III. Proteomics-Based Screens for Systematic Identification of Host Factors Affecting TBSV Replication	133
IV. Grouping of Host Factors and Identification of Networks Involved in TBSV Replication	137
V. Validation of Host Factors in a Plant Host and Induction of Resistance Against TBSV	167
VI. Summary and Outlook	168
Acknowledgments	169
References	169
5. Resistance to Aphid Vectors of Virus Disease	179
Jack H. Westwood and Mark Stevens	
I. Resistance to Aphids	180
II. Natural Resistance	181
III. Engineered Resistance	195
IV. Concluding Remarks	198
Acknowledgments	201
References	201
6. Cross-Protection: A Century of Mystery	211
Heiko Ziebell and John Peter Carr	
I. Introduction	212
II. General Remarks	213
III. History of Cross-Protection	215
IV. Applications	218
V. Mechanism(s) of Cross-Protection	227
VI. Protection Phenomena Involving Subviral Agents	238
VII. Concluding Thoughts	242
Acknowledgments	244
References	244
