
CONTENTS

Contributors	ix
Preface	xi
 1. Cryo-Electron Microscope Tomography to Study Axonemal Organization	
<i>Daniela Nicastro</i>	
I. Introduction and Rationale	2
II. Methods and Materials	12
III. Discussion	30
References	32
 2. Electron Microscopic Imaging and Analysis of Isolated Dynein Particles	
<i>Anthony J. Roberts and Stan A. Burgess</i>	
I. Introduction	42
II. Rationale	45
III. Methods	46
VI. Summary	59
References	60
 3. Immunogold Labeling of Flagellar Components <i>In Situ</i>	
<i>Stefan Geimer</i>	
I. Introduction	64
II. Methods for Immunogold Labeling of Flagellar Components	67
III. Materials	74
IV. Summary and Discussion	77
References	78
 4. Scanning Electron Microscopy to Examine Cells and Organs	
<i>Jovenal T. SanAgustin, John A. Follit, Gregory Hendricks, and Gregory J. Pazour</i>	
I. Introduction	82
II. Materials	82
III. Metal-Impregnation Method for Scanning EM Analysis of Mouse Kidneys (modified from McManus <i>et al.</i> , 1993)	84

IV. Method for Scanning EM Visualization of Mouse Nodal Cilia	86
V. Summary	87
References	87
 5. X-ray Fiber Diffraction Studies on Flagellar Axonemes	
<i>Kazuhiro Oiwa, Shinji Kamimura, and Hiroyuki Iwamoto</i>	
I. Introduction	90
II. Rationale	91
III. Methods	97
IV. Results and Discussion	105
V. Summary	107
References	108
 6. Markers for Neuronal Cilia	
<i>Jacqueline S. Domire and Kirk Mykytyn</i>	
I. Introduction	112
II. Immunoenzymatic Labeling of Neuronal Cilia in Brain Sections	113
III. Immunofluorescent Labeling of Neuronal Cilia in Brain Sections	115
IV. Visualization of Neuronal Cilia <i>In Vitro</i>	117
V. Summary	120
References	121
 7. Immunofluorescence Staining of Ciliated Respiratory Epithelial Cells	
<i>Heymut Omran and Niki T. Loges</i>	
I. Introduction	124
II. Antibodies	126
III. Materials and Methods	129
IV. Methods	129
V. Discussion	131
References	133
 8. Immunoprecipitation to Examine Protein Complexes	
<i>Gregory J. Pazour</i>	
I. Introduction	135
II. General Procedure	137
III. Controls for Immunoprecipitation Assays	139
IV. Summary	141
References	142

9. Tandem Affinity Purification of Ciliopathy-Associated Protein Complexes

Karsten Boldt, Jeroen van Reeuwijk, Christian Johannes Gloeckner, Marius Ueffing, and Ronald Roepman

I. Introduction	144
II. Methods	150
III. Data Evaluation	155
IV. Outlook	157
References	158

10. Crosslinking Methods: Purification and Analysis of Crosslinked Dynein Products

Miho Sakato

I. Chemical Crosslinking	162
II. Identification of Interaction Partners	164
III. Summary	170
References	170

11. Analysis of the Ciliary/Flagellar Beating of *Chlamydomonas*

Kenneth W. Foster

I. Introduction	174
II. Rationale	182
III. Techniques	182
IV. Future Directions	231
References	232

12. Assays of Cell and Axonemal Motility in *Chlamydomonas reinhardtii*

Ritsu Kamiya

I. Introduction	242
II. Motility Assessments in Live <i>Chlamydomonas</i> Cells	242
III. <i>In Vitro</i> Reactivation of Axonemal Beating	246
IV. Microtubule Sliding by Axonemal Dynein	248
References	251

13. High-Speed Digital Imaging of Ependymal Cilia in the Murine Brain

Karl-Ferdinand Lehtreck, Michael J. Sanderson, and George B. Witman

I. Introduction	256
II. Materials and Equipment	257
III. Methods	259
IV. Discussion	262
V. Summary	262
References	263

14. Observation of Nodal Cilia Movement and Measurement of Nodal Flow

Yasushi Okada and Nobutaka Hirokawa

I. Introduction and Historical Background	266
II. Observation of Nodal Cilia Motility in Mouse Embryo	269
III. Observation of Nodal Flow in Mouse Embryo	276
IV. Observation of Nodal Cilia Motility and Nodal Flow in Rabbit Embryo	278
V. Discussion	281
References	284

15. Modification of Mouse Nodal Flow by Applying Artificial Flow

Shigenori Nonaka

I. Introduction	288
II. Solutions	289
III. Experimental Setup	289
IV. Methods	291
V. Discussion	295
References	296

16. Measuring Cilium-Induced Ca^{2+} Increases in Cultured Renal Epithelia*Helle A. Praetorius*

I. Introduction	300
II. Methods	300
III. Materials	310
IV. Summary/Conclusion	311
References	311
