

TABLE OF CONTENTS

Contributors	xi
Preface	xvii
 SECTION I: NEURAL INDUCTION, PATTERN FORMATION, AND CELL SPECIFICATION	
Neurulation <i>A Lawson and G C Schoenwolf</i>	3
Neural Induction in Chicks <i>C Linker and C D Stern</i>	10
Morphogens: History <i>L Wolpert</i>	16
Sonic Hedgehog and Neural Patterning <i>H Roelink</i>	21
Floor Plate Patterning of Ventral Cell Types: Ventral Patterning <i>E Dessaud, J Briscoe, and K Hill</i>	29
Wnt Pathway and Neural Patterning <i>R M Twyman</i>	39
Bone Morphogenetic Protein (BMP) Signaling in the Neuroectoderm <i>C M Mizutani and E Bier</i>	45
Retinoic Acid Signaling and Neural Patterning <i>G Duester</i>	55
Hox Genes Expression <i>M Parrish, C Nolte, and R Krumlauf</i>	61
Anterior–Posterior Spinal Cord Patterning of the Motor Pool <i>J S Dasen</i>	72
Neural Patterning: Midbrain–Hindbrain Boundary <i>S Scholpp and M Brand</i>	80
Midbrain Patterning <i>S Agarwala and C W Ragsdale</i>	87

Forebrain Development: Prosomere Model <i>L Puelles</i>	95
Forebrain: Early Development <i>F Cavodeassi, M Kapsimali, S W Wilson, and R M Young</i>	100
Forebrain Development: Holoprosencephaly (HPE) <i>E S Monuki</i>	105
Neural Patterning: Arealization of the Cortex <i>D D M O'Leary and T T Kroll</i>	116
Neural Patterning: Eye Fields <i>M Noda, H Takahashi, and H Sakuta</i>	125
Notch Pathway: Lateral Inhibition <i>A Chitnis</i>	131
Notch Signal Transduction: Molecular and Cellular Mechanisms <i>A Miyamoto and G Weinmaster</i>	140
Helix–Loop–Helix (bHLH) Proteins: Proneural <i>J E Johnson and S M Glasgow</i>	150
Helix–Loop–Helix (bHLH) Proteins: Hes Family <i>R Kageyama, T Ohtsuka, R Ohsawa, and J Hatakeyama</i>	156
Sox Gene Expression <i>S R Hutton and L H Pevny</i>	165
Transcriptional Networks and the Spinal Cord <i>S L Pfaff and T Macfarlan</i>	172
Transcriptional Silencing <i>R M Twyman</i>	178
Motor Neuron Specification in Vertebrates <i>M-R Song and S L Pfaff</i>	184
Lissencephaly <i>T Pramparo and T Wynshaw-Boris</i>	192
Molecular Anatomy of the Mammalian Brain <i>M A Zapala, C Barlow, and I Hovatta</i>	199
Terminal Differentiation: REST <i>S Aigner and G W Yeo</i>	206
<i>Drosophila</i> Apterous Neurons: From Stem Cell to Unique Neuron <i>S Thor</i>	213
Macroglial Lineages <i>A M Butt</i>	218
Dopaminergic Differentiation <i>A Rosenthal and J C Lin</i>	221
Olfactory Neuron Patterning and Specification <i>C L Beites, S Kawachi, and A L Calof</i>	226
Oligodendrocyte Specification <i>W D Richardson</i>	238
Hair Cell Differentiation <i>C Puligilla and M W Kelley</i>	245

Retinal Development: An Overview <i>H R L Napier and B A Link</i>	251
Retinal Development: Cell Type Specification <i>F L A F Gomes and M Cayouette</i>	259
Neural Stem Cells: Ocular <i>T A Reh</i>	266
Neural Crest <i>H M Young, R B Anderson, and D F Newgreen</i>	271
Schwann Cell Development <i>R Mirsky and K R Jessen</i>	282
Schwann Cells and Axon Relationship <i>R D Fields</i>	293
Neural Crest Cell Diversification and Specification: ErbB Role <i>K-A Nave and M H Schwab</i>	298
Neural Crest Diversification and Specification: Transcriptional Control of Schwann Cell Differentiation <i>M Wegner</i>	306
Neural Crest Cell Diversification and Specification: Melanocytes <i>K Bismuth and H Arnheiter</i>	312
Autonomic Nervous System Development <i>D F Newgreen, M J Howard, and R Nishi</i>	321
Autonomic Neuroplasticity: Development <i>P G Smith</i>	333
Enteric Nervous System Development <i>M D Gershon</i>	341
Sexual Differentiation of the Brain <i>D G Zuloaga, C L Jordan, and S M Breedlove</i>	348
Sexual Differentiation of the Central Nervous System <i>R B Simerly</i>	354
SECTION II: AXON GUIDANCE AND SYNAPTOGENESIS	
Chemoaffinity Hypothesis: Development of Topographic Axonal Projections <i>T McLaughlin and D D M O'Leary</i>	365
Topographic Maps: Molecular Mechanisms <i>A C Lin and C E Holt</i>	372
Axonal Pathfinding: Theoretical and Computational Models <i>D Mortimer and G J Goodhill</i>	381
Axon Guidance: Guidance Cues and Guidepost Cells <i>L Ma and K Shen</i>	387
Axon Guidance by Glia <i>A Faissner</i>	393
Corticospinal Development <i>J H Martin, K M Friel, I Salimi, and S Chakrabarty</i>	403

Axon Guidance: Building Pathways with Molecular Cues in Vertebrate Sensory Systems <i>F Wang</i>	415
Growth Cones <i>J A Raper</i>	422
Optic Nerve, Optic Chiasm, and Optic Tracts <i>R A Rachel and B E Reese</i>	427
Activity in Visual Development <i>M B Feller and E S Ruthazer</i>	433
NMDA Receptors and Development <i>M A Phillips and M Constantine-Paton</i>	438
Optic Tectum: Development and Plasticity <i>S C Sharma and K A Patil</i>	449
Dendrite Development, Synapse Formation and Elimination <i>H Cline</i>	456
Axon Guidance: Morphogens as Chemoattractants and Chemorepellants <i>J B Thomas and S Yoshikawa</i>	460
Axonal Pathfinding: Guidance Activities of Sonic Hedgehog (Shh) <i>F Charron and M Tessier-Lavigne</i>	465
Axonal Pathfinding: Netrins <i>S W Moore, T E Kennedy, and M Tessier-Lavigne</i>	472
Axonal Pathfinding: Extracellular Matrix Role <i>P Letourneau</i>	480
Postsynaptic Development: Neuronal Molecular Scaffolds <i>E Kim</i>	487
Postsynaptic Specialization Assembly <i>C Sala and A El-Husseini</i>	495
Presynaptic Development and Active Zones <i>N E Ziv and C C Garner</i>	502
Presynaptic Development: Functional and Morphological Organization <i>D Atasoy and E T Kavalali</i>	512
Development of Drosophila Neuromuscular Junctions <i>B Berke and H Keshishian</i>	520
Neuromuscular Junction (NMJ): Mammalian Development <i>C R Slater</i>	529
Neuromuscular Junction (NMJ): Postsynaptic Basal Lamina <i>M J Werle</i>	538
Neuromuscular Junction: Neuronal Regulation of Gene Transcription at the Vertebrate <i>H R Brenner and D L Falls</i>	544
Neuromuscular Junction: Synapse Elimination <i>R R Ribchester</i>	553
Schwann Cells and Plasticity of the Neuromuscular Junction <i>Z Feng and C-P Ko</i>	561
Glia and Synapse Formation: An Overview <i>N J Allen and B A Barres</i>	567

GABA _A Receptors: Developmental Roles <i>Y Ben-Ari</i>	573
SECTION III: NEUROGENESIS, NEUROTROPHISM, AND REGENERATION	
Cerebral Cortex: Symmetric vs. Asymmetric Cell Division <i>G Fishell and C Hanashima</i>	585
Differentiation: The Cell Cycle Instead <i>A Philpott</i>	592
Programmed Cell Death <i>R Oppenheim and C Milligan</i>	599
Autonomic and Enteric Nervous System: Apoptosis and Trophic Support During Development <i>R O Heuckeroth</i>	607
Autophagy and Neuronal Death <i>P G H Clarke</i>	615
Neurotrophins: Physiology and Pharmacology <i>J M Conner and M H Tuszynski</i>	622
Enteric Nervous System: Neurotrophic Factors <i>M J Saffrey</i>	628
Glial Growth Factors <i>B M Reuss</i>	634
Neural Stem Cells: Adult Neurogenesis <i>C Zhao and F H Gage</i>	641
Neurogenesis in the Intact Adult Brain <i>G Kempermann</i>	648
Stem Cells and CNS Repair <i>R Jandial, A Persson, A Ho, M L Levy, and E Y Snyder</i>	653
Synaptic Plasticity: Neuronogenesis and Stem Cells in Normal Brain Aging <i>G M Bernal and D A Peterson</i>	662
Synaptic Plasticity: Neuronal Sprouting <i>J Nilsen</i>	666
Axonal Regeneration: Role of Growth and Guidance Cues <i>M Bähr and P Lingor</i>	671
Spinal Cord Regeneration and Functional Recovery: Strategies <i>J W Fawcett</i>	681
Peripheral Nerve Regeneration: An Overview <i>P M Richardson</i>	687
Index	691
