

Contributors	vii	
Introduction <i>Bruce M. Carlson</i>	xi	
Foreword <i>Robert Lanza, M.D.</i>	xiii	
"Stemness": Definitions, Criteria, and Standards <i>Douglas A. Melton, Ph.D and Chad Cowen, Ph.D</i>	xv	
Part I		
An Introduction to Stem Cell Biology	1	
1. Pluripotential Stem Cells from Vertebrate Embryos: Present Perspective and Future Challenges <i>Richard L. Gardner</i>	3	
2. Postnatal Stem Cells <i>Pamela Gehron Robey and Paolo Bianco</i>	13	
3. Adult Epithelial Tissue Stem Cells <i>Christopher S. Potten and James W. Wilson</i>	23	
4. Mesenchymal Stem Cells <i>Arnold I. Caplan</i>	37	
5. Stem Cells, Plasticity, and Regeneration <i>Bruce M. Carlson</i>	43	
Part II		
Methods for Preparing Embryonic or Pluripotent Stem Cells	57	
6. Setting up a Facility for Human Embryonic Stem Cell Research <i>Ian Lyons, David Tan, Philip H. Schwartz, and Mahendra Rao</i>	59	
7. Approaches for Derivation and Maintenance of Human Embryonic Stem Cells: Detailed Procedures and Alternatives <i>Irina Klimanskaya and Jill McMahon</i>	75	
8. Derivation and Differentiation of Human Embryonic Germ Cells <i>Michael J. Shamblott, Candace L. Kerr, Joyce Axelman, John W. Littlefield, Gregory O. Clark, Ethan S. Patterson, Russell C. Addis, Jennifer N. Kraszewski, Kathleen C. Kent, and John D. Gearhart</i>	91	
9. Genetic Manipulation of Human Embryonic Stem Cells <i>Yoav Mayshar and Nissim Benvenisty</i>	101	
10. Induced Pluripotent Stem Cell Derivation <i>Junying Yu and James A. Thomson</i>	109	
Part III		
Types and Properties of Stem Cells	117	
11. Molecular Bases of Pluripotency <i>Fatima Cavaleri and Hans Schöler</i>	119	
12. Characteristics and Characterization of Human Pluripotent Stem Cells <i>Anne G. Bang and Melissa K. Carpenter</i>	141	
13. Multipotent Adult Progenitor Cells <i>Catherine M. Verfaillie and Annelies Crabbe</i>	147	
14. Bone Marrow Stem Cells: Properties and Pluripotency <i>Munira Xaymardan, Massimo Cimini, Richard D. Weisel, and Ren-Ke Li</i>	157	

15. Hematopoietic Stem Cell Properties, Markers, and Therapeutics <i>S.M. Chambers, William J. Lindblad, and M.A. Goodell</i>	169	24. Use of Embryonic Stem Cells to Treat Heart Disease <i>Michael Rubart and Loren J. Field</i>	291
16. Stem Cells in the Gastrointestinal Tract <i>Stuart A. C. McDonald, Trevor A. Graham, Adam Humphries, Nicholas A. Wright, Sean L. Preston, Mairi Brittan, and Natalie C. Direkze</i>	181	25. Regeneration of Epidermis from Adult Keratinocyte Stem Cells <i>Ariane Rochat and Yann Barrandon</i>	297
17. Stem Cells Derived from Amniotic Fluid and Placenta <i>Paolo De Coppi, Shay Soker, and Anthony Atala</i>	203	26. Implantation of Myogenic Cells in Skeletal Muscles <i>Daniel Skuk and Jacques P. Tremblay</i>	307
18. Nuclear Transfer for Stem Cells <i>Alan Trounson</i>	213	27. Cell-Based Therapies for Musculoskeletal Repair <i>Wan-Ju Li, Kiran Gollapudi, David P. Patterson, George T.-J. Huang, and Rocky S. Tuan</i>	317
Part IV Application of Stem Cell Biology to Regenerative Medicine	219	28. Retinal Pigment Epithelium Derived from Embryonic Stem Cells <i>Irina Klimanskaya</i>	335
19. Cancer Stem Cells <i>Michael Rothenberg and Michael F. Clarke</i>	221	Part V Ethical and Regulatory Considerations	347
20. Neural Stem Cells for Central Nervous System Repair <i>Rodolfo Gonzalez, Jean Pyo Lee, and Evan Y. Snyder</i>	237	29. Ethical Considerations <i>Ronald M. Green</i>	349
21. Burns and Skin Ulcers <i>Edward Upjohn, George Varigos, and Pritinder Kaur</i>	249	30. Stem Cell Research: Religious Considerations <i>Margaret A. Farley</i>	357
22. Cell-Based Repair for Cardiovascular Regeneration and Neovascularization: What, Why, How, and Where Are We Going in the Next 5–10 Years? <i>Doris A. Taylor and Andrey G. Zenovich</i>	255	31. Current Issues in US Patent Law <i>Patrea L. Pabst</i>	367
23. Pancreatic Stem Cells <i>Yuval Dor and Douglas A. Melton</i>	283	32. Stem Cell-Based Therapies: Food and Drug Administration Product and Pre-Clinical Regulatory Considerations <i>Donald W. Fink and Steven R. Bauer</i>	379
