

CONTENTS

1. Regulation of HIV-1 Alternative RNA Splicing and Its Role in Virus Replication	1
C. Martin Stoltzfus	
I. Introduction	2
II. HIV-1 Splicing Regulatory Elements	3
III. Evidence for the Functional Importance of HIV-1 Splicing Regulatory Elements in Virus Replication	21
IV. Strategies to Target HIV-1 Splicing with Antiviral Drugs	30
V. Conclusions and Perspectives	32
Acknowledgments	33
References	33
2. New Insights into Flavivirus Nonstructural Protein 5	41
Andrew D. Davidson	
I. Introduction	42
II. The Methyltransferase Domain	44
III. The RNA-Dependent RNA Polymerase Domain	61
IV. NS5 Interactions	75
V. NS5 Phosphorylation	79
VI. NS5 Localization	81
VII. Emerging Roles for NS5 in Viral Pathogenesis	85
VIII. Conclusions and Future Perspectives	89
Acknowledgments	92
References	92
3. Replication of the Hepatitis Delta Virus RNA Genome	103
John M. Taylor	
I. Background	104
II. Polymerase(s)	106
III. Promoters and Priming	108
IV. Pausing and Switching	110
V. Replication in the Nucleus	112
VI. Role(s) of the Delta Antigen	113
VII. Host Factors	115

VIII. Viroid Analogy	116
IX. Conclusions and Outlook	116
Acknowledgments	117
References	117

4. Recent Epidemiology of Tick-Borne Encephalitis: An Effect of Climate Change? 123

E. I. Korenberg

I. Introduction	124
II. Major Debatable Issues	127
III. The Ranges of Main Tick Vectors: Are They Really Expanding?	128
IV. Tick Abundance and TBE Virus Prevalence: Have They Changed?	129
V. Tick Expansion to the Cities: Is It Related to Climate Change?	131
VI. What Is Known About Newly Formed TBE foci?	133
VII. Anthropurgic TBE foci: What Are the Principles of Their Formation?	134
VIII. Since When Has TBE Morbidity Increased in the Cities?	135
IX. What Are the Main Causes of Changes in Parameters of TBE Morbidity?	136
X. Conclusions	137
Acknowledgment	138
References	138
