

CONTENTS

Preface

ix

1. Mechanisms of Recognition in Dominant R Gene Mediated Resistance

1

P. Moffett

I. Dominant Genetic Resistance to Pathogens	2
II. NB-LRR Protein Structure	6
III. Models of NB-LRR Recognition	9
IV. Perspectives	21
Acknowledgments	22
References	23

2. RNA Silencing: An Antiviral Mechanism

35

T. Csorba, V. Pantaleo and J. Burgyán

I. Introduction	36
II. RNA-based Antiviral Immunity	37
III. Silencing Suppression Strategies	45
IV. Silencing Suppressors and Viral Symptoms	58
V. Concluding Remarks	58
Acknowledgments	59
References	59

3. Local Lesions and Induced Resistance

73

G. Loebeinstein

I. Local Lesions	74
II. Induced Resistance	92
III. Concluding Thoughts	100
References	102

4. Recessive Resistance to Plant Viruses	119
V. Truniger and M.A. Aranda	
I. Introduction	120
II. Loss-of-Susceptibility in Collections of Mutagenized Hosts Reflects the Modification of Translation Initiation Factors and Other Plant Proteins	121
III. All Known Recessive Resistance Genes in Crop Species Encode Translation Initiation Factors	127
IV. Potyvirus Resistance Mediated by eIF4E/eIF(iso)4E	134
V. Resistance Mediated by eIF4E/eIF(iso)4E Against Non-potyriviruses	144
VI. Resistance Genes Coding for eIF4G or eIF(iso)4G	146
VII. Conclusions and Prospects	147
References	149
 5. Toward a Quarter Century of Pathogen-Derived Resistance and Practical Approaches to Plant Virus Disease Control	 161
J. Gottula and M. Fuchs	
I. Introduction	162
II. The Concept of PDR	163
III. Historical Perspectives	164
IV. Creation of Virus-resistant Transgenic Crops by Applying the Concept of PDR	168
V. Commercialization of Virus-resistant Transgenic Crops and Practical Control of Virus Diseases	170
VI. Discussion	174
Acknowledgments	176
References	176
 6. Genetically Engineered Virus-Resistant Plants in Developing Countries: Current Status and Future Prospects	 185
D.V.R. Reddy, M.R. Sudarshana, M. Fuchs, N.C. Rao and G. Thottappilly	
I. Introduction	187
II. Options for Developing Genetically Engineered Resistance to Viruses and Their Vectors	192
III. Examples of Successful Production of Genetically Engineered Crops with Virus Resistance in Developing Countries	198
IV. Factors Limiting the Introduction and Cultivation of Genetically Engineered Virus-resistant Crop Plants in Developing Countries with Emphasis on Socio-Economic Issues	204

V. Future Prospects for Deregulating Genetically Engineered Virus-resistant Crops in Developing Countries	207
Acknowledgments	209
References	209
