My first writings on Bronn appeared in the *Journal of the History of Biology* (1987), under the title "H. G. Bronn and the History of Nature." Material from that article is reworded here with kind permission of Springer-Verlag and Business Media.

At Indiana University, my ideas about Haeckel, Bronn, and Darwin coalesced in this book. Thanks are due to my 70 colleagues Jim Capretta, E. Newman, and Jutta Schickel, as well as to participants in our Biology and History Reading Group, MPS Reading Group, and our graduate seminar on Darwin, who read various excerpts from the manuscript, including Jim Allen, Nick Arnoldson, Men, Jordi Gasc, Fred Churchill, Lisa David, Susan Dyson, Matt Dunn, Meredith Fagan, Stephen Finsen, Joel Klein, Jonas Manninen, Evan Ragland, Sean Valle, and others. Special thanks to Anne Nykott, for reading and commenting on an earlier draft. My work also benefited from a Faculty Summer Fellowship from
