

Brief Contents

1	An Introduction to Cell Biology	1
2	The Structure and Functions of Biological Molecules	31
3	Bioenergetics, Enzymes, and Metabolism	84
4	Genes, Chromosomes, and Genomes	117
5	The Path to Gene Expression	157
6	Controlling Gene Expression	213
7	Replicating and Repairing DNA	271
8	Cellular Membranes	298
9	Mitochondrial Structure and Function	354
10	Chloroplast Structure and Function	387
11	The Extracellular Matrix and Cell Interactions	411
12	Cellular Organelles and Membrane Trafficking	445
13	The Cytoskeleton	499
14	Cell Division	560
15	Cell Signaling Pathways	605
16	Cancer	650
17	Immunity	682
18	Methods in Cell Biology	715
Glossary		G-1
Additional Readings		A-1
