Preface	ix
Contributors	xi
1 Measurement of Ligand–G Protein-coupled Receptor Interactions	1
<i>Katie Leach, Celine Valant, Patrick M. Sexton and Arthur Christopoulos</i>	
1.1 Introduction	1
1.2 Methods and approaches	5
References	27
2 Second Messenger Assays for G Protein-coupled Receptors:	
cAMP, Ca²⁺, Inositol Phosphates, ERK1/2	31
<i>Karen J. Gregory, Patrick M. Sexton, Arthur Christopoulos and Caroline A. Hick</i>	
2.1 Introduction	31
2.2 Methods and approaches	33
2.3 Troubleshooting	49
References	50
3 Use of the [³⁵S]GTPγS Binding Assay to Determine Ligand Efficacy at G Protein-coupled Receptors	53
<i>Elodie Kara and Philip G. Strange</i>	
3.1 Introduction	53
3.2 Methods and approaches	54
3.3 Troubleshooting	66
Acknowledgements	67
References	67
4 Quantitative Imaging of Receptor Trafficking	69
<i>Andy R. James, Takeo Awaji, F. Anne Stephenson and Nicholas A. Hartell</i>	
4.1 Introduction	69
4.2 Methods and approaches	70
4.3 Troubleshooting	80
References	82

5 Production of Recombinant G Protein-coupled Receptor in Yeast for Structural and Functional Analysis	85
<i>Richard A.J. Darby, Mohammed Jamshad, Ljuban Grgic, William J. Holmes and Roslyn M. Bill</i>	
5.1 Introduction	85
5.2 Methods and approaches	86
5.3 Troubleshooting	106
References	107
6 Monitoring GPCR-Protein Complexes Using Bioluminescence Resonance Energy Transfer	111
<i>Werner C. Jaeger, Kevin D.G. Pfleger and Karin A. Eidne</i>	
6.1 Introduction	111
6.2 Methods and approaches	114
6.3 Troubleshooting	128
References	128
7 Using Intramolecular Fluorescence Resonance Energy Transfer to Study Receptor Conformation	133
<i>Cornelius Krasel and Carsten Hoffmann</i>	
7.1 Introduction	133
7.2 Methods and approaches	136
7.3 Troubleshooting	143
References	144
8 A Disulfide Cross-linking Strategy Useful for Studying Ligand-induced Structural Changes in GPCRs	147
<i>Jian Hua Li, Stuart D.C. Ward, Sung-Jun Han, Fadi F. Hamdan and Jürgen Wess</i>	
8.1 Introduction	147
8.2 Methods and approaches	149
8.3 General considerations, caveats and troubleshooting	162
Acknowledgements	164
References	164
9 Use of Fluorescence Correlation Spectroscopy to Study the Diffusion of G Protein-coupled Receptors	169
<i>Stephen J. Briddon, Jonathan A. Hern and Stephen J. Hill</i>	
9.1 Introduction	169
9.2 Methods and approaches	170
9.3 Troubleshooting	190
References	191

10 Identification and Analysis of GPCR Phosphorylation	197
<i>Kok Choi Kong, Sharad C. Mistry and Andrew B. Tobin</i>	
10.1 Introduction	197
10.2 Methods	198
Acknowledgements	213
References	213
11 Measurement and Visualization of G Protein-coupled Receptor Trafficking by Enzyme-linked Immunosorbent Assay and Immunofluorescence	215
<i>Stuart J. Mundell, Shaista P. Nisar and Eamonn Kelly</i>	
11.1 Introduction	215
11.2 Methods and approaches	217
11.3 Troubleshooting	226
References	227
12 Substituted Cysteine Accessibility Method (SCAM)	229
<i>George Liapakis and Jonathan A. Javitch</i>	
12.1 Introduction	229
12.2 Methods and approaches	230
12.3 Troubleshooting	247
References	248
13 Homology Modelling of G Protein-coupled Receptors	251
<i>John Simms</i>	
13.1 Introduction	251
13.2 Methods and approaches	252
13.3 Troubleshooting	269
13.4 Automated methods for generating models of GPCRs	269
References	270
Appendix Site-directed Mutagenesis and Chimeras	275
<i>Alex Conner, Mark Wheatley and David R. Poyner</i>	
A.1 Introduction	275
A.2 Why mutagenesis?	275
A.3 Troubleshooting	285
A.4 Conclusion	285
References	286
Index	289
