<i>List of contributors</i>	ix
The role of growth hormone in growth regulation D.J. FLINT, K. AKINSANYA, P.J. CRILLY, P. JOHNSTON and D. WYNICK	1
Insulin-like growth factor-I and its binding proteins: role in post-natal growth J.M. PELL and J. GLASSFORD	13
Growth factor interactions in epiphyseal chondrogenesis D.J. HILL	35
Developmental changes in the CNS response to injury: growth factor and matrix interactions A. LOGAN	49
The role of transforming growth factor β during cardiovascular development M.C. DICKSON, J.S. MARTIN and R.J. AKHURST	69
Tenascin: an extracellular matrix protein associated with bone growth E.J. MACKIE and S. RAMSEY	87
Compartmentation of protein synthesis, mRNA targeting and c-myc expression during muscle hypertrophy and growth J. HESKETH	99
The role of mechanical tension in regulating muscle growth and phenotype P.T. LOUGHNA and C. BROWNSON	119

The pre-natal influence on post-natal muscle growth N.C. STICKLAND and C.M. DWYER	135
Genomic imprinting and intrauterine growth retardation G.E. MOORE, P.R. BENNETT, Z. ALI, R. U. KHAN and J. I. VAUGHAN	151
