List of contributors vii

Preface ix

- 1 Introduction 1
T. H. NASH III
- 2 Photobionts 9
T. FRIEDL AND B. BÜDEL
- 3 Mycobionts 27
R. HONEGGER
- 4 Thallus morphology and anatomy 40
B. BÜDEL AND C. SCHEIDEGGER
- 5 Morphogenesis 69
R. HONEGGER
- 6 Sexual reproduction in lichen-forming ascomycetes 94
R. HONEGGER AND S. SCHERRER
- 7 Biochemistry and secondary metabolites 104
J. A. ELIX AND E. STÖCKER-WÖRGÖTTER
- 8 Stress physiology and the symbiosis 134
R. P. BECKETT, I. KRANNER, AND F. V. MINIBAYEVA
- 9 Physiological ecology of carbon dioxide exchange 152
T. G. A. GREEN, T. H. NASH III, AND O. L. LANGE

10	The carbon economy of lichens	182
	K. PALMQVIST, L. DAHLMAN, A. JONSSON, AND T. H. NASH III	
11	Nitrogen, its metabolism and potential contribution to ecosystems	216
	T. H. NASH III	
12	Nutrients, elemental accumulation, and mineral cycling	234
	T. H. NASH III	
13	Individuals and populations of lichens	252
	D. FAHSELT	
14	Environmental role of lichens	274
	M. R. D. SEAWARD	
15	Lichen sensitivity to air pollution	299
	T. H. NASH III	
16	Lichen biogeography	315
	D. J. GALLOWAY	
17	Systematics of lichenized fungi	336
	A. TEHLER AND M. WEDIN	
	Appendix: Culture methods for lichens and lichen symbionts	353
	E. STOCKER-WÖRGÖTTER AND A. HAGER	
	References	364
	Taxon index	462
	Subject index	477
