Preface v

Publisher's Preface vii

Acknowledgments ix

INTRODUCTION: ORGANIC CHEMISTRY REVIEW

1

- I. Brief Review of Organic Chemistry 1
- II. Acids, Bases, and Buffers 1
- III. Carbohydrate Structure 4
- IV. Proteoglycans, Glycoproteins, and Glycolipids 9
- V. Amino Acids 11
- VI. Lipids 14
- VII. Membranes 16
- VIII. Nucleotides 18
- Review Test** 19

1. PROTEIN STRUCTURE AND FUNCTION

23

- I. General Aspects of Protein Structure 23
- II. Examples of Medically Important Proteins 28
- Review Test** 34

2. ENZYMES

38

- I. General Properties of Enzymes 38
- II. Dependence of Velocity on Enzyme and Substrate Concentrations, Temperature, and pH 39
- III. The Michaelis-Menten Equation 40
- IV. The Lineweaver-Burk Plot 41
- V. Inhibitors 41
- VI. Allosteric Enzymes 43

VII. Regulation of Enzyme Activity by Post-Translational (Covalent) Modification 44

VIII. Regulation by Protein-Protein Interactions 44

IX. Isoenzymes 45

Review Test 46

3. BIOCHEMISTRY OF DIGESTION 50

I. Digestion of Carbohydrates 50

II. Digestion of Dietary Triacylglycerol 51

III. Protein Digestion and Amino Acid Absorption 54

Review Test 57

4. GLYCOLYSIS 63

I. General Overview 63

II. Transport of Glucose into Cells 63

III. Reactions of Glycolysis 64

IV. Special Reactions in Red Blood Cells 66

V. Regulatory Enzymes of Glycolysis 66

VI. The Fate of Pyruvate 68

VII. Generation of Adenosine Triphosphate by Glycolysis 69

Review Test 72

5. THE TRICARBOXYLIC ACID CYCLE, ELECTRON TRANSPORT CHAIN, AND OXIDATIVE METABOLISM 77

I. The Tricarboxylic Acid Cycle 77

II. Electron Transport Chain and Oxidative Phosphorylation 85

III. Reactive Oxygen Species 90

Review Test 93

6. GLYCOGEN METABOLISM 97

I. Overview of Glycogen Structure and Metabolism 97

II. Glycogen Structure 97

III. Glycogen Synthesis 97

IV. Glycogen Degradation 100

V. Lysosomal Degradation of Glycogen 101

VI. Regulation of Glycogen Degradation 102

VII. Regulation of Glycogen Synthesis 104

Review Test 105

7.	GLUCONEOGENESIS AND THE MAINTENANCE OF BLOOD GLUCOSE LEVELS	109
	I. Overview 109	
	II. Reactions of Gluconeogenesis 109	
	III. Maintenance of Blood Glucose Levels 114	
	Review Test 119	
8.	MISCELLANEOUS CARBOHYDRATE METABOLISM	123
	I. Fructose and Galactose Metabolism 123	
	II. Pentose Phosphate Pathway 126	
	III. Proteoglycans, Glycoproteins, and Glycolipids 129	
	Review Test 133	
9.	FATTY ACID METABOLISM	137
	I. Fatty Acid and Triacylglycerol Synthesis 137	
	II. Formation of Triacylglycerol Stores in Adipose Tissue 141	
	III. Fatty Acid Oxidation 142	
	IV. High Yield Comparison from Fatty Acid Synthesis and Oxidation 146	
	Review Test 147	
10.	CHOLESTEROL METABOLISM AND BLOOD LIPOPROTEINS	151
	I. Cholesterol and Bile Salt Metabolism 151	
	II. Blood Lipoproteins 155	
	Review Test 159	
11.	KETONES AND OTHER LIPID DERIVATIVES	163
	I. Ketone Body Synthesis and Utilization 163	
	II. Phospholipid and Sphingolipid Metabolism 165	
	III. Metabolism of the Eicosanoids 166	
	IV. Synthesis of the Steroid Hormones 169	
	Review Test 172	
12.	AMINO ACID METABOLISM	176
	I. Addition and Removal of Amino Acid Nitrogen 176	
	II. Urea Cycle 177	

III. Synthesis and Degradation of Amino Acids 180**Review Test 187****13. PRODUCTS DERIVED FROM AMINO ACIDS 191****I. Special Products Derived from Amino Acids 191****II. Tetrahydrofolate and S-Adenosylmethionine: The One-Carbon Carriers 198****Review Test 201****14. NUCLEOTIDE AND PORPHYRIN METABOLISM 203****I. Purine and Pyrimidine Metabolism 203****II. Heme Metabolism 208****Review Test 211****15. INTEGRATIVE METABOLISM AND NUTRITION 215****I. Metabolic Fuels and Dietary Requirements 215****II. Metabolism During the Fed or Absorptive State 219****III. Fasting 221****IV. Prolonged Fasting (Starvation) 224****V. Biochemical Functions of Tissues 225****Review Test 229****16. MOLECULAR ENDOCRINOLOGY 233****I. General Mechanisms of Hormone Action 233****II. Regulation of Hormone Levels 236****III. Actions of Specific Hormones 237****Review Test 247****17. DNA REPLICATION AND TRANSCRIPTION 251****I. Nucleic Acid Structure 251****II. Synthesis of DNA (Replication) 256****III. Synthesis of RNA (Transcription) 262****Review Test 267****18. RNA TRANSLATION AND PROTEIN SYNTHESIS 271****I. Protein Synthesis (Translation of Messenger RNA) 271****II. Regulation of Protein Synthesis 276****Review Test 282**

19. GENETICS	286
I. Chromosomes	286
II. Cell Cycle	286
III. Control of the Cell Cycle	288
IV. Meiosis	289
V. Gene Dosage	292
VI. Fundamentals of Mendelian Genetics	293
VII. The Punnett Square	294
VIII. Modes of Inheritance	294
IX. Moderators of Inheritance	296
X. Hardy-Weinberg Principle	296
XI. Genetic Testing	297
Review Test	300
20. BIOCHEMISTRY OF CANCER	305
I. Oncogenes	305
II. Tumor-Suppressor Genes	307
III. Apoptosis	308
IV. Mechanism of Oncogenesis	309
V. Molecular Carcinogenesis	311
VI. DNA Repair and Carcinogenesis	313
VII. Molecular Progression of Cancer	314
VIII. Molecular Markers in Cancer Biology	315
Review Test	316
21. TECHNIQUES IN BIOCHEMISTRY, MOLECULAR BIOLOGY, AND GENETICS	319
I. Biotechnology Involving Recombinant DNA	319
II. Technology Involving Proteins	329
Review Test	332
Comprehensive Examination	336
Index	361
