

CONTENTS

PREFACE	xi
----------------	-----------

CONTRIBUTORS	xv
---------------------	-----------

I INTRODUCTION

1 APTAMERS: LIGANDS FOR ALL REASONS	3
--	----------

Jean-Jacques Toulmé, Jean-Pierre Daguer, and Eric Dausse

- 1.1 Introduction / 3
- 1.2 The Power of Selection and Aptamer Refinement / 5
- 1.3 The Chemistry Drives the Shape / 7
- 1.4 Aptaregulators / 11
- 1.5 Aptasensors / 15
- 1.6 Prospects / 18
- References / 20

2 SELEX AND ITS RECENT OPTIMIZATIONS	31
---	-----------

Beate Strehlitz and Regina Stoltenburg

- 2.1 Introduction / 31
- 2.2 Aptamers and Their Selection by SELEX / 32

- 2.3 Modifications of SELEX Technology / 35
- 2.4 Advantages and Limitations of Aptamers and Their Selection Technology / 41
- 2.5 Applications of Aptamers Being Developed for the Market / 43
- 2.6 Future Perspectives / 45
- References / 50

II BIOSENSORS

3 ELECTROCHEMICAL APTASENSORS

63

Itamar Willner and Maya Zayats

- 3.1 Introduction / 63
- 3.2 Electrochemical Aptasensor Based on Redox-Active Aptamer Monolayers Linked to Electrodes / 66
- 3.3 Enzyme-Based Amplified Electrochemical Aptasensors / 69
- 3.4 Amplified Electrochemical Aptasensors Based on Nanoparticles / 72
- 3.5 Label-Free Electrochemical Aptasensors / 75
- 3.6 Field-Effect Transistor-Based Aptasensors / 78
- 3.7 Conclusions and Perspectives / 81
- References / 81

4 APTAMERS: HYBRIDS BETWEEN NATURE AND TECHNOLOGY

87

Moritz K. Beissenhertz, Eik Leupold, Walter Stöcklein, Ulla Wollenberger, Oliver Pänke, Fred Lisdat, and Frieder W. Scheller

- 4.1 Introduction / 87
- 4.2 Specific Features of Aptamers / 88
- 4.3 Electrochemical Detection of Nucleic Acids / 88
- 4.4 Cytochrome *c* Binding by Aptamers / 90
- 4.5 DNA Machines and Aptamers / 92
- References / 98

5 DETECTION OF PROTEIN-APTAMER INTERACTIONS BY MEANS OF ELECTROCHEMICAL INDICATORS AND TRANSVERSE SHEAR MODE METHOD

101

Tibor Hianik

- 5.1 Introduction / 101
- 5.2 Immobilization of Aptamers on a Solid Support / 102

5.3 Detection of Aptamer–Ligand Interactions / 104

5.3.1 Electrochemical Methods / 105

5.3.2 Acoustic Methods / 117

5.4 Conclusions / 124

References / 125

6 BIOSENSORS USING THE APTAMERIC ENZYME SUBUNIT: THE USE OF APTAMERS IN THE ALLOSTERIC CONTROL OF ENZYMES 129

Kazunori Ikebukuro, Wataru Yoshida, and Koji Sode

6.1 Aptamers as Molecular Recognition Elements of Biosensors / 129

6.1.1 Comparing Aptamers to Antibodies / 129

6.1.2 Signaling Aptamers / 131

6.2 Homogeneous Sensing / 133

6.2.1 Biosensor Systems That Do Not Require Bound–Free Separation / 133

6.2.2 Aptameric Enzyme Subunit / 133

6.3 Evolution-mimicking Algorithm for the Improvement of Aptamers / 136

References / 137

7 NANOMATERIAL-BASED LABEL-FREE APTASENSORS 139

Kagan Kerman and Eiichi Tamiya

7.1 Introduction / 139

7.2 Label-Free Electrochemical Aptasensors / 139

7.3 Field-Effect Transistor–Based Aptasensors / 143

7.4 Label-Free Aptasensors Based on Localized Surface Plasmon Resonance / 147

7.5 Forthcoming Challenges and Concluding Remarks / 151

References / 151

8 APTAMER-BASED BIOANALYTICAL ASSAYS: AMPLIFICATION STRATEGIES 159

Sara Tombelli, Maria Minunni, and Marco Mascini

8.1 Introduction / 159

8.2 Bioanalytical Assays Based on Aptamer-Functionalized Nanoparticles / 160

8.3 Aptamers and Quantum Dot–Based Assays / 164

- 8.4 Aptazymes and Aptamer-Based Machines / 168
- 8.5 Polymerase Chain Reaction as an Amplification Method in Aptamer-Based Assays / 173
- 8.6 Conclusions / 176
- References / 177

III APPLICATIONS

9 KINETIC CAPILLARY ELECTROPHORESIS FOR SELECTION, CHARACTERIZATION, AND ANALYTICAL UTILIZATION OF APTAMERS

183

Sergey N. Krylov

- 9.1 Introduction / 183
 - 9.1.1 Kinetic Capillary Electrophoresis / 183
 - 9.1.2 The Concept of NECEEM and ECEEM / 185
- 9.2 Selection of Aptamers Using KCE Methods for Partitioning and Affinity Control / 188
 - 9.2.1 NECEEM-Based Selection of Aptamers / 188
 - 9.2.2 ECEEM-Based Selection of Aptamers / 197
 - 9.2.3 Optimization of PCR / 198
 - 9.2.4 Future of KCE Methods for Aptamer Selection / 200
- 9.3 Measurements of Binding Parameters of Target–Aptamer Interaction by KCE Methods / 200
 - 9.3.1 Foundation / 200
 - 9.3.2 Temperature Control Inside the Capillary / 202
 - 9.3.3 Examples / 203
- 9.4 Quantitative Affinity Analysis of a Target Using Aptamer as an Affinity Probe / 205
 - 9.4.1 Foundation / 205
 - 9.4.2 Example / 208
- 9.5 Conclusions / 209
- References / 210

10 APTAMERS FOR SEPARATION OF ENANTIOMERS

213

Corinne Ravelet and Eric Peyrin

- 10.1 Introduction / 213
- 10.2 Generation and Properties of Enantioselective Aptamers / 214

- 10.3 Immobilized Aptamers for Enantiomeric Separation by Liquid Chromatography / 215
 - 10.3.1 Stationary-Phase Preparation and Column Packing / 216
 - 10.3.2 DNA Aptamer-Based CSPs / 216
 - 10.3.3 RNA Aptamer-Based CSPs and the Mirror-Image Strategy / 217
 - 10.3.4 Class-Specific Aptamer-Based CSPs / 219
- 10.4 Aptamers for Analysis of Enantiomers by Capillary Electrophoresis / 221
 - 10.4.1 Aptamers as Chiral Additives in the Background Electrolyte for CE Enantiomeric Separation / 221
 - 10.4.2 Aptamers for the Design of an Affinity CE-Based Enantioselective Competitive Assay / 223
- 10.5 Conclusions / 226
- References / 226

11 APTAMER-MODIFIED SURFACES FOR AFFINITY CAPTURE AND DETECTION OF PROTEINS IN CAPILLARY ELECTROPHORESIS AND MALDI-MASS SPECTROMETRY

229

Linda B. McGown

- 11.1 Introduction / 229
- 11.2 Aptamer-Modified Capillaries in Affinity Capillary Electrophoresis / 230
- 11.3 Aptamer-Modified Surfaces for Affinity MALDI-MS / 232
 - 11.3.1 Overview / 232
 - 11.3.2 Affinity MALDI-MS of Thrombin / 233
 - 11.3.3 Affinity MALDI-MS of IgE / 235
 - 11.3.4 Summary / 242
- 11.4 Beyond Aptamers: Genome-Inspired DNA Binding Ligands / 242

References / 248

12 STRATEGY FOR USE OF SMART ROUTES TO PREPARE LABEL-FREE APTASENSORS FOR BIOASSAY USING DIFFERENT TECHNIQUES

251

Bingling Li, Hui Wei, and Shaojun Dong

- 12.1 Introduction / 251
- 12.2 Electrochemical Aptasensors / 254

12.2.1	POSOALF Mode / 254
12.2.2	PFSOALF Mode / 257
12.2.3	Electrochemical Impedimetric Aptasensors / 257
12.2.4	Electrochemical Aptasensors with Nonlabeled Redox Probes / 263
12.3	Fluorescent Molecular Switches / 265
12.3.1	POSFALF Mode / 266
12.3.2	PFSFALF Mode / 268
12.4	Colorimetry / 272
12.4.1	POSFALF Mode / 273
12.4.2	PFSFALF Mode / 274
12.5	Hemin-Aptamer DNAzyme-Based Aptasensor / 281
12.6	Liquid Chromatography, Electrochromatography, and Capillary Electrophoresis Applications / 284
12.7	Other Aptasensors / 290
12.8	Conclusions / 290
	References / 290
