

CONTENTS.

I.—*On the Law which has regulated the introduction of New Species.*

Geographical distribution dependent on Geologic Changes — A Law deduced from well-known Geographical and Geological facts—The form of a true system of Classification determined by this Law—Geographical Distribution of Organisms—Geological Distribution of the forms of Life—High Organization of very ancient Animals consistent with this Law—Objections to Forbes' Theory of Polarity—Rudimentary Organs—Conclusion Pp. 1–25

II.—*On the Tendency of Varieties to depart indefinitely from the Original Type.*

Instability of Varieties supposed to prove the permanent distinctness of Species—The Struggle for Existence—The Law of Population of Species—The Abundance or Rarity of a Species dependent upon its more or less perfect Adaptation to the Conditions of Existence—Useful Variations will tend to Increase, useless or hurtful Variations to Diminish—Superior Varieties will ultimately extirpate the Original Species—The Partial Reversion of Domesticated Varieties explained — Lamarck's Hypothesis very different from that now advanced—Conclusion Pp. 26–44

III.—*Mimicry, and other Protective Resemblances among Animals.*

Test of true and false Theories—Importance of the Principle of Utility — Popular Theories of Colour in Animals—Importance of Concealment as influencing Colour—Special modifications of Colour—Theory of Protective Colouring—Objection that Colour as being dangerous should not exist in Nature—Mimicry—Mimicry among Lepidoptera — Lepidoptera mimicking other Insects—Mimicry among Beetles—Beetles mimicking other Insects—Insects mimicking Species of other Orders—Cases of Mimicry among the Vertebrata—Mimicry among Snakes—Mimicry among Birds—Mimicry among Mammals—Objec-

tions to Mr. Bates' Theory of Mimicry—Mimicry by Female Insects only—Cause of the dull Colours of Female Birds—Use of the gaudy Colours of many Caterpillars—Summary—General deductions as to Colour in Nature—Conclusion Pp. 45—129

IV.—*The Malayan Papilionidæ, or Swallow-tailed Butterflies, as illustrative of the Theory of Natural Selection.*

Special value of the Diurnal Lepidoptera for inquiries of this Nature—Question of the rank of the Papilionidæ—Distribution of the Papilionidæ—Definition of the word Species—Laws and Modes of Variation—Simple Variability—Polymorphism or Dimorphism—Local form or variety—Co-existing Variety—Race or Subspecies—Species—Variation as specially influenced by Locality—Local Variation of Size—Local Variation of Form—Local Variations of Colour—Remarks on the facts of Local Variation—Mimicry—Concluding Remarks on Variation in Lepidoptera—Arrangement—Geographical Distribution—Remarkable peculiarities of the island of Celebes—Concluding Remarks Pp. 130—200

V.—*On Instinct in Man and Animals.*

How Instinct may be best Studied—Definition of Instinct—Does Man possess Instincts?—How Indians travel through unknown and trackless Forests Pp. 201—210

VI.—*The Philosophy of Birds' Nests.*

Instinct or Reason in the Construction of Birds' Nests—Do Men build by Reason or by Imitation?—Why does each Bird build a peculiar kind of Nest?—How do young Birds learn to build their first Nest? Do Birds sing by Instinct or by Imitation?—Man's Works mainly Imitative—Birds do Alter and Improve their Nests when altered conditions require it—Conclusion Pp. 211—230

VII.—*A Theory of Birds' Nests; showing the relation of certain differences of colour in female birds to their mode of nidification.*

Changed Conditions and persistent Habits as influencing Nidification—Classification of Nests—Sexual differences of Colour in Birds—The Law which connects the Colours of Female Birds with the mode of Nidification—What the Facts Teach us—Colour more variable than

Structure or Habits, and therefore the Character which has generally been modified—Exceptional cases confirmatory of the above Explanation—Real or apparent exceptions to the Law stated at p. 240—Various modes of Protection of Animals—Females of some groups require and obtain more Protection than the Males—Conclusion
Pp. 231–263

VIII.—*Creation by Law.*

Laws from which the Origin of Species may be deduced—Mr. Darwin's Metaphors liable to Misconception—A case of Orchis-structure explained by Natural Selection—Adaptation brought about by General Laws—Beauty in Nature—How new Forms are produced by Variation and Selection—The Objection that there are Limits to Variation—Objection to the argument from Classification—The *Times* on Natural Selection—Intermediate or generalized forms of Extinct Animals an indication of Transmutation or Development—Conclusion—A Demonstration of the Origin of Species . Pp. 264–301

IX.—*The Development of Human Races under the Law of Natural Selection.*

Wide difference of Opinion as to Man's Origin—Outline of the Theory of Natural Selection—Different effects of Natural Selection on Animals and on Man—Influence of External Nature in the development of the Human Mind—Extinction of Lower Races—The Origin of the Races of Man—The Bearing of these views on the Antiquity of Man—Their Bearing on the Dignity and Supremacy of Man—Their Bearing on the future Development of Man—Summary—Conclusion Pp. 302–331

X.—*The Limits of Natural Selection as applied to Man.*

What Natural Selection can Not do—The Brain of the Savage shown to be Larger than he Needs it to be—Size of Brain an important Element of Mental Power—Comparison of the Brains of Man and of Anthropoid Apes—Range of intellectual power in Man—Intellect of Savages and of Animals compared—The use of the Hairy Covering of Mammalia—The Constant absence of Hair from certain parts of Man's body a remarkable Phenomenon—Savage Man feels the want of this Hairy Covering—Man's Naked Skin could not have been produced by Natural Selection—Feet and Hands of Man considered as

Difficulties on the Theory of Natural Selection—The Origin of Some of Man's Mental Faculties, by the preservation of Useful Variations, not possible—Difficulty as to the Origin of the Moral Sense—Summary of the Argument as to the Insufficiency of Natural Selection to account for the Development of Man—The Origin of Consciousness—The Nature of Matter—Matter is Force—All Force is probably Will-force—Conclusion Pp. 332—371
