Foreword	ix
1 Introduction	1
Andrés Illanes	
1.1 Catalysis and Biocatalysis	1
1.2 Enzymes as Catalysts. Structure-Functionality Relationships	4
1.3 The Concept and Determination of Enzyme Activity	8
1.4 Enzyme Classes. Properties and Technological Significance	16
1.5 Applications of Enzymes. Enzyme as Process Catalysts	19
1.6 Enzyme Processes: the Evolution from Degradation to Synthesis. Biocatalysis in Aqueous and Non-conventional Media	31
References	39
2 Enzyme Production	57
Andrés Illanes	
2.1 Enzyme Sources	57
2.2 Production of Enzymes	60
2.2.1 Enzyme Synthesis	61
2.2.2 Enzyme Recovery	65
2.2.3 Enzyme Purification	74
2.2.4 Enzyme Formulation	84
References	89
3 Homogeneous Enzyme Kinetics	107
Andrés Illanes, Claudia Altamirano, and Lorena Wilson	
3.1 General Aspects	107
3.2 Hypothesis of Enzyme Kinetics. Determination of Kinetic Parameters	108
3.2.1 Rapid Equilibrium and Steady-State Hypothesis	108

3.2.2	Determination of Kinetic Parameters for Irreversible and Reversible One-Substrate Reactions	112
3.3	Kinetics of Enzyme Inhibition	116
3.3.1	Types of Inhibition	116
3.3.2	Development of a Generalized Kinetic Model for One-Substrate Reactions Under Inhibition	117
3.3.3	Determination of Kinetic Parameters for One-Substrate Reactions Under Inhibition	120
3.4	Reactions with More than One Substrate	124
3.4.1	Mechanisms of Reaction	124
3.4.2	Development of Kinetic Models	125
3.4.3	Determination of Kinetic Parameters	131
3.5	Environmental Variables in Enzyme Kinetics	133
3.5.1	Effect of pH: Hypothesis of Michaelis and Davidsohn. Effect on Enzyme Affinity and Reactivity	134
3.5.2	Effect of Temperature: Effect on Enzyme Affinity, Reactivity and Stability	140
3.5.3	Effect of Ionic Strength	148
	References	151
4	Heterogeneous Enzyme Kinetics	155
	Andrés Illanes, Roberto Fernández-Lafuente, José M. Guisán, and Lorena Wilson	
4.1	Enzyme Immobilization	155
4.1.1	Methods of Immobilization	156
4.1.2	Evaluation of Immobilization	166
4.2	Heterogeneous Kinetics: Apparent, Inherent and Intrinsic Kinetics; Mass Transfer Effects in Heterogeneous Biocatalysis	169
4.3	Partition Effects	171
4.4	Diffusional Restrictions	172
4.4.1	External Diffusional Restrictions	173
4.4.2	Internal Diffusional Restrictions	181
4.4.3	Combined Effect of External and Internal Diffusional Restrictions	192
	References	197
5	Enzyme Reactors	205
	Andrés Illanes and Claudia Altamirano	
5.1	Types of Reactors, Modes of Operation	205
5.2	Basic Design of Enzyme Reactors	207
5.2.1	Design Fundamentals	207
5.2.2	Basic Design of Enzyme Reactors Under Ideal Conditions. Batch Reactor; Continuous Stirred Tank Reactor Under Complete Mixing; Continuous Packed-Bed Reactor Under Plug Flow Regime	209

5.3	Effect of Diffusional Restrictions on Enzyme Reactor Design and Performance in Heterogeneous Systems. Determination of Effectiveness Factors. Batch Reactor; Continuous Stirred Tank Reactor Under Complete Mixing; Continuous Packed-Bed Reactor Under Plug Flow Regime	223
5.4	Effect of Thermal Inactivation on Enzyme Reactor Design and Performance	224
5.4.1	Complex Mechanisms of Enzyme Inactivation	225
5.4.2	Effects of Modulation on Thermal Inactivation	231
5.4.3	Enzyme Reactor Design and Performance Under Non-Modulated and Modulated Enzyme Thermal Inactivation	234
5.4.4	Operation of Enzyme Reactors Under Inactivation and Thermal Optimization	240
5.4.5	Enzyme Reactor Design and Performance Under Thermal Inactivation and Mass Transfer Limitations	245
	References	248
6	Study Cases of Enzymatic Processes	253
6.1	Proteases as Catalysts for Peptide Synthesis	253
	Sonia Barberis, Fanny Guzmán, Andrés Illanes, and Joseph López-Santín	
6.1.1	Chemical Synthesis of Peptides	254
6.1.2	Proteases as Catalysts for Peptide Synthesis	257
6.1.3	Enzymatic Synthesis of Peptides	258
6.1.4	Process Considerations for the Synthesis of Peptides	263
6.1.5	Concluding Remarks	267
	References	268
6.2	Synthesis of β -Lactam Antibiotics with Penicillin Acylases	273
	Andrés Illanes and Lorena Wilson	
6.2.1	Introduction	274
6.2.2	Chemical Versus Enzymatic Synthesis of Semi-Synthetic β -Lactam Antibiotics	274
6.2.3	Strategies of Enzymatic Synthesis	276
6.2.4	Penicillin Acylase Biocatalysts	277
6.2.5	Synthesis of β -Lactam Antibiotics in Homogeneous and Heterogeneous Aqueous and Organic Media	279
6.2.6	Model of Reactor Performance for the Production of Semi-Synthetic β -Lactam Antibiotics	282
	References	285
6.3	Chimioselective Esterification of Wood Sterols with Lipases	292
	Gregorio Álvaro and Andrés Illanes	
6.3.1	Sources and Production of Lipases	293
6.3.2	Structure and Functionality of Lipases	296

6.3.3	Improvement of Lipases by Medium and Biocatalyst Engineering	299
6.3.4	Applications of Lipases	304
6.3.5	Development of a Process for the Selective Transesterification of the Stanol Fraction of Wood Sterols with Immobilized Lipases	308
References		315
6.4	Oxidoreductases as Powerful Biocatalysts for Green Chemistry	323
	José M. Guisán, Roberto Fernández-Lafuente, Lorena Wilson, and César Mateo	
6.4.1	Mild and Selective Oxidations Catalyzed by Oxidases	324
6.4.2	Redox Biotransformations Catalyzed by Dehydrogenases ...	326
6.4.3	Immobilization-Stabilization of Dehydrogenases	329
6.4.4	Reactor Engineering	330
6.4.5	Production of Long-Chain Fatty Acids with Dehydrogenases	331
References		332
6.5	Use of Aldolases for Asymmetric Synthesis	333
	Josep López-Santín, Gregorio Álvaro, and Pere Clapés	
6.5.1	Aldolases: Definitions and Classification	334
6.5.2	Preparation of Aldolase Biocatalysts	335
6.5.3	Reaction Performance: Medium Engineering and Kinetics ..	339
6.5.4	Synthetic Applications	346
6.5.5	Conclusions	352
References		352
6.6	Application of Enzymatic Reactors for the Degradation of Highly and Poorly Soluble Recalcitrant Compounds	355
	Juan M. Lema, Gemma Eibes, Carmen López, M. Teresa Moreira, and Gumersindo Feijoo	
6.6.1	Potential Application of Oxidative Enzymes for Environmental Purposes	355
6.6.2	Requirements for an Efficient Catalytic Cycle	357
6.6.3	Enzymatic Reactor Configurations	358
6.6.4	Modeling of Enzymatic Reactors	364
6.6.5	Case Studies	365
6.6.6	Conclusions and Perspectives	374
References		375
Index		379
