

CONTENTS

Preface		vii
Chapter 1	Megakaryocytopoiesis: From Marrow Stem Cells to Circulating Platelets	1
	<i>Aaron Tomer and Varda Deutsch</i>	
Chapter 2	A Novel Serum-Free Culture System for the Analysis of Human Hematopoietic Progenitor Cells	41
	<i>Mary Beth Hanley, Elizabeth Sinclair, Willis H. Navarro, Mary E. Keir, and Joseph M. McCune</i>	
Chapter 3	Potential of Bone Marrow Stromal Stem Cells to Repair Bone Defects and Fractures	61
	<i>Stan Gronthos and Andrew C.W. Zannettino</i>	
Chapter 4	Adult Neural Stem Cells and Cellular Therapy	81
	<i>Philippe Taupin</i>	
Chapter 5	The Cardiogenic Potential of Mouse and Human Embryonic Stem Cells: Cognitive Research to Envision the Therapeutic Use of the Cells	99
	<i>Michel Puc��at</i>	

Chapter 6	Hemopoietic Stem Cells and Autoimmunity: Impaired Mechanisms of Thymic Selection or Genetic Predisposition?	117
	<i>Masha Fridkis-Hareli, Joaquín Zúñiga and Edmond J. Yunis</i>	
Chapter 7	Control of Tissue Regeneration through Oxygen Concentrations	151
	<i>Jessica A. Shafer, Alan R. Davis and Elizabeth A. Olmsted-Davis</i>	
Index		167
