
Contents

Preface		vii
Chapter I	Signaling Pathways Mediated by the Neurotrophins <i>Juan Carlos Arévalo and Kenneth K. Teng</i>	1
Chapter II	Signaling Functions of Reactive Oxygen and Nitrogen Species <i>Igor Afanas'ev</i>	37
Chapter III	Cell Traction Force: Generation, Transmission, Regulation, and Measurement <i>James H-C. Wang, Jianxin Chen, Bin Li and Bhavani P. Thampatty</i>	69
Chapter IV	Model Independent Impedance Matching <i>Jing Yuan</i>	85
Chapter V	Modulation of Cell Death, Signal Transduction and Cell Response by Oxidative Stress in the Progression of Chronic Liver Diseases <i>Erica Novo, Elena Zamara, Lorenzo Valfre di Bonzo and Maurizio Parola</i>	103
Chapter VI	MAPK Signaling Pathways as Targets for Gastrointestinal Cancer Therapy: From Laboratory to Clinical Trials <i>Xia Wang and Jing Yuan Fang</i>	145
Chapter VII	Studies of the Endothelial Cell-Specific Signal Transduction Pathways (New Paradigm for the Development of Potent Anti-angiogenic Therapies) <i>Shigeru Kanda, Yasuyoshi Miyata and Hiroshi Kanetake</i>	175
Chapter VIII	Apoptotic Signal Transduction of Brain Glia Cells <i>Kyoungho Suk</i>	201

Chapter IX	The Role of the Receptor-Like Kinases SYM10 and SYM37 in Nod Factor Perception and Signal Transduction During Pea-Rhizobium Symbiosis Development	229
	<i>E. A. Dolgikh, I. V. Leppyanen, V. E. Tsyganov, A. Y. Borisov, R. Geurts and I. A. Tikhonovich</i>
