Contributors	ix
Introduction	xi
<i>Chris Helliwell and Tim Doran</i>	
 PART 1 RNA interference in plants	
 Chapter 1 Hairpin RNAi in plants	1
<i>Louisa Matthew</i>	
1.1 Introduction	1
1.2 Discovery of hairpin RNAi	1
1.3 The molecular mechanisms of hairpin RNAi	2
1.4 Using hairpin RNAi in plants	5
1.5 Flexible hairpin RNAi methods	9
1.6 Applications of hairpin RNAi in plants	12
1.7 Summary	15
 Chapter 2 Virus-induced gene silencing (VIGS) to study gene function in plants	26
<i>Xiaohong Zhu and Savithramma P. Dinesh-Kumar</i>	
2.1 Introduction	26
2.2 Principles	30
 Chapter 3 The use of artificial microRNAs in targeted gene silencing	50
<i>John Paul Alvarez and Yuval Eshed</i>	
3.1 Introduction	50
3.2 Relevant issues in miRNA biogenesis for amiRNA efficiency	52

3.3	The pros and cons of using amiRNAs in gene silencing	62
3.4	Future directions to extend amiRNA technology	64
3.5	Conclusions	70

PART 2 RNA interference in animals

Chapter 4 RNAi in *Caenorhabditis elegans* 85

Nicholas M. Johnson, Julie-Anne Fritz and Carolyn A. Behm

4.1	Introduction	85
4.2	Delivery of exogenous dsRNA	86
4.3	General considerations for the design of an RNAi experiment	88
4.4	Large-scale RNAi preparations for biochemical, proteomic and microarray analyses	91
4.5	Inducible and tissue-specific RNAi using hairpin transgenes	91
4.6	High-throughput RNAi screens in 96-well format	92

Chapter 5 RNAi in *Drosophila* 114

Steven Whyard

5.1	Introduction	114
-----	--------------	-----

Chapter 6 RNAi in fish and crustaceans 150

Mario Pablo Estrada, Juana María Lugo and Yamila Carpio

6.1	Introduction	150
6.2	RNAi in crustaceans	150
6.3	RNAi in fish	158
6.4	Conclusions	166

Chapter 7 RNAi in chicken embryos 183

Nick J. Van Hateren, Raman M. Das and Stuart A. Wilson

7.1	Introduction	183
-----	--------------	-----

Chapter 8 RNAi in mammalian cells 205

Yan Zeng

8.1	Introduction	205
8.2	RNAi and related mechanisms	205
8.3	siRNAs and miRNAs: analogous guide RNAs for RNA silencing	206

8.4	RNAi in mammalian cells: searching for the right siRNAs	208
8.5	RNAi in mammalian cells: getting siRNAs into cells	211
8.6	RNAi in mammalian cells: verifying the specificity of RNAi experiments	214
8.7	Concluding remarks	214
Chapter 9	siRNA and shRNA design	228
	<i>Debra J. Taxman</i>	
9.1	Introduction	228
9.2	RNAi design methods	230
Index		255
