List of Appraisal sheets and Look-up tables	viii
Introduction to SWIMMER	xi
Registration details	xii
Foreword	xiii
Key contributors	xv
Acknowledgements	xvii
Preface	xxi

Section 1 Introduction

1.0 Introduction to wetlands and functional assessment	3
1.1 Introduction	3
1.2 What is a wetland?	5
1.3 The importance of the wetland resource	10
1.4 Realising the benefits of wetland functioning	21
1.5 Threats and impacts on the wetland resource	35
1.6 Challenges for the future of wetlands and their management	41
1.7 What is a functional approach?	47
1.8 Introduction to the functional assessment procedures (FAPs)	49
1.9 The Functional Assessment Procedures CD-ROM	61
1.10 The application of functional analysis	65
1.11 Further reading and references	72

Section 2 Wetland database establishment

2.0 Introduction	83
Objectives	83
Method	83
Output from database establishment	84
Data recording and references	84
Further reading and references	85
2.1 Fieldwork preparation	86
Introduction	86
2.1.A Assessment area (AA) delineation and map preparation	86
2.1.B Contributory area (CA) delineation and map preparation	89
2.1.C Collection of desk information on assessment area (AA) and contributory area (CA)	91
2.1.D Confirmation of rights of access	110
2.1.E Selection of required field equipment	110
2.1.F Further reading and references	111
2.2 Hydrogeomorphic (HGMU) delineation	112
Introduction	112
2.2.A Check and enhance prepared AA Map	113
2.2.B Subdivide AA into its main components	115

2.2.C	Subdivide AA components into HGMUs: preparation and procedure	116
2.2.D	Further reading and references	126

2.3 HGMU characterisation 127

	Introduction	127
2.3.A	Recording of geomorphic indicators	128
2.3.B	Recording of hydrological indicators	132
2.3.C	Recording of ecological indicators	138
2.3.D	Habitat and vegetation identification	142
2.3.E	Part 1: Land-use and site management, field indicators	172
2.3.E	Part 2: Collection of HGMU information	183
2.3.F	Assignment of a hydrological code to the HGMU	189
2.3.G	Estimation of HGMU area	195
2.3.H	Nutrient input characterisation	196
2.3.I	Trace element input characterisation	213
	Further reading and references	222

2.4 Recording sheets 223

2.4.A	Recording Sheet 1	224
2.4.B	Recording Sheet 2a	226
2.4.B	Recording Sheet 2b	227
2.4.B	Recording Sheet 2c	228
2.4.B	Recording Sheet 2d	229
2.4.B	Recording Sheet 2e	230
2.4.C	Recording Sheet 3	231
2.4.D	Recording Sheet 4	232

Section 3 Functional assessment

3.0	Introduction	235
	Method	235
	The syntax for combinations of answers in look-up tables	236
	An example of how to use the look-up tables	236
	Further reading and references	238

3.1 Hydrological functions 241

	Introduction	241
	Hydrological functioning in wetlands	243
	Further reading and references	246
	Hydrological functions assessed in these procedures	247
3.1.A	Floodwater detention (function)	247
3.1.B	Groundwater recharge (function)	261
3.1.C	Groundwater discharge (function)	265
3.1.D	Sediment retention (function)	271
3.1.E	Rapid quantification of hydrological functions	280

3.2 Biogeochemical functions 316

	Introduction	316
3.2.A	Nutrient retention (water quality function)	326
3.2.B	Nutrient export (water quality function)	375
3.2.C	<i>In-situ</i> carbon retention (function)	416
3.2.D	Trace element storage (function)	423
3.2.E	Trace element export (function)	460
3.2.F	Organic carbon concentration control (function)	486

3.3 Ecological functions	498
Introduction	498
3.3.A Ecosystem maintenance (function)	507
3.3.B Food-web support (function)	557

Section 4 Scoring and appendices

4.0 Functional analysis summary	619
Functional Analysis Summary Table	619
When the functional assessments are done	619
Ecosystem services	622
References	623
Manual scoring	624
Scoring the functions	624
Scoring for 3.1 Hydrological functions	628
Scoring for 3.2 Biogeochemical functions	629
Scoring for 3.3 Ecological functions	632
Appendix 1 Scientific terms	638
Glossary	638
Alternative terminology	642
Appendix 2 Information sources (United Kingdom)	644
Appendix 3 Reference list for codes	648
Appendix 4 Publications and theses produced during FAPs development	650
Appendix 5 Conversion of process outcomes to functional scores – Functional Assessment Procedures CD-ROM	655
1. Hydrological functions	655
2. Biogeochemical functions	656
3. Ecological functions	659
Index	661
