
Contents

	List of Contributors	v
	Preface	ix
	Foreword	xi
1	Analysis of Bifidobacterial Populations in Bowel Ecology Studies Gerald W. Tannock	1
2	Genomics of Bifidobacteria: Where We Stand Now and Where We Are Going Marco Ventura, Francesca Turrone, Francesca Bottacini and Douwe van Sinderen	17
3	Bifidobacterial Ecology and Comparative Genomics: Perspectives and Prospects Marco Ventura, Francesca Turrone, Francesca Bottacini, Vanessa Giubellini and Douwe van Sinderen	31
4	Metabolism of Bifidobacteria David A. Sela, Neil P. J Price and David A. Mills	45
5	Acid and Bile Resistance and Stress Response in Bifidobacteria Borja Sánchez, Lorena Ruiz, Douwe van Sinderen, Abelardo Margolles and Aldert L. Zomer	71
6	Probiotic Properties of Bifidobacteria Maddalena Rossi and Alberto Amaretti	97
7	Antimicrobial Activity of the Genus <i>Bifidobacterium</i> Ismail Fliss, Arthur C. Ouwehand, Ehab Kheadr, Sampo Lahtinen and Stephen J. Davids	125
8	Interaction of Bifidobacteria with the Intestinal Mucosa with a Focus on Immunomodulating Effects Eiji Miyauchi, Jin-zhong Xiao and Soichi Tanabe	145
9	Safety Assessment of Bifidobacteria Maria H. Saarela	163
10	Synthesis and Utilization of Exopolysaccharides and Prebiotics Sandra Macfarlane, Katie E. Blackett and George T. Macfarlane	175

11	Antibiotic Resistance/Susceptibility Profiles of Bifidobacteria and Molecular Analysis of Atypical Resistances	195
	Baltasar Mayo, Sigrid Mayrhofer, Susana Delgado and Konrad J. Domig	
12	Viability and Stability of Bifidobacteria in Commercial Preparations	217
	Kamila Goderska and Catherine Stanton	
13	Mobile Genetic Elements, Cloning Vectors and Genetic Manipulation of Bifidobacteria	235
	Pablo Álvarez Martín, Simone Guglielmetti and Baltasar Mayo	
	Colour plates	A1
